

SUPERVISORS' PROCEEDINGS

September 10th and 24th, 1918. The annual meeting of the board of supervisors of DeKalb county was called to order at the court house in Sycamore, Ill., on Tuesday, September 10th, 1918, by Alvin Warren, chairman.

The minutes of the proceedings of June 12th were read and approved. Dr. Everett was given the privilege of the floor, and stated that there were about seventy-five registrants who needed operations to qualify them for military service, and requested that committee be appointed to investigate the need and report to this board at this session.

The board met at 9:30 a. m., pursuant to adjournment, on Tuesday, September 10th, and was called to order by Chairman Warren. The roll being called, all members were found present except Messrs. Colby, Stewart and Townsend.

WOMAN WORKS 15 HOURS A DAY

Marvelous Story of Woman's Change from Weakness to Strength by Taking Druggist's Advice.

Peru, Ind.—"I suffered from a displacement with backache and dragging down pains so badly that at times I could not be on my feet and it did not seem as though I could stand it. I tried different medicines without any benefit and several doctors told me nothing but an operation would do me any good. My druggist told me of Lydia E. Pinkham's Vegetable Compound. I took it with the result that I am now well and strong. I get up in the morning at four o'clock, do my housework, then go to a factory and work all day, come home and get supper and wash my face. I don't know how many of my friends I have told that Lydia E. Pinkham's Vegetable Compound has done for me."

Women who suffer from any such ailments should not fail to try this famous root and herb remedy, Lydia E. Pinkham's Vegetable Compound.

**How Illinois Will Look When Great State Road System Is Built**

This map shows the main roads provided by the legislature for improvement if the voters of the state approve the \$60,000,000 bond issue at the election on Nov. 5. There are 4,800 miles of highway in the system, connecting all the main communities of the state. The money for the bonds and the interest is to come entirely from the state automobile license fees, not a cent from the taxpayer who does not own an automobile. The question will appear on the little ballot and will require a majority of all votes cast at the election for members of the state legislature. Governor Lowden says it would be a calamity if the voters should fail to approve the bond issue.

**ALLIES MUST EAT**  
 One Hundred Twenty Million are Depending on United States Today

Industry is falling into two classes—essentials and less essentials. And by essentials we mean essential to the prosecution of the war.

In food there are also vitally essential foods and the less essential. Staples—meat, wheat, sugar and fats—are essential. Fresh vegetables, perishables of many kinds, bulky, unshippable foods are, in a military sense, the less essential.

The second year of our participation in the war brings us a broader plan for food conservation. Not so much particular emphasis on this item and that, but a steady pressure in all directions. The careful and thrifty conservation, the elimination of every type of waste, these are our principles which must be observed, our standard which we must measure up to.

We cannot ship seventeen million tons of food stuffs out of the country and not continue to conserve food. We cannot increase last year's exports to the Allies by fifty per cent and not continue to cut down our own consumption.

The need is very great, our obligation plain. To supply the essential foods to the 120 million people in Europe now arraigned against Germany is our present task. "This is a duty of necessity, humanity and honor."

Even tho the war were to end tomorrow, we must continue to feed Europe for another year.

Try a want adv. It pays.

**ROADS HELP ALL; FEW PAY BILLS**

By **WILLIAM G. EDENS**,  
 President Illinois Highway Improvement Association.

Every voter of Illinois should acquaint himself with the merits of the good roads bond issue question on the little ballot in the election on November 5. The fact that this question is put up to the people for a decision is a distinctive demonstration of the difference between our form of government and that in Germany. The war is teaching us a new realization of the value of our citizenship and the man who has the interest of the state at heart will vote either "yes" or "no" on the good roads bond issue. He will not let the matter slide by neglecting to vote.

The man who neglects to vote in effect casts a vote that is counted against the proposition, because it must receive a majority of all votes cast at the election.

**A Simple Proposition.**  
 What is the bond issue proposition? A very simple thing to understand. The state proposes to take the license fees paid in by automobile owners and construct a system of 4,800 miles of permanent state road, connecting all the counties and important cities and towns. Under the license fees fixed by law, approximately \$147,000,000 will be paid by motorists to the state in the next 25 years. Instead of waiting to do the work year by year, the proposition is to take \$60,000,000 as soon as is convenient after the war and build the 4,800 mile system in a period of five years, or thereabouts.

About two-thirds of the people of the state live directly on the roads, which already have been selected by the legislature. Approximately 86 per cent live either on the roads or five miles from them.

**All Benefit; Few Pay.**  
 While the vast population of the state will be benefited by the road improvement, the cost will be borne only by a few, namely the automobile owners. Governor Lowden is advised by experts that more than \$30,000,000 of the \$60,000,000 put into the system will go to labor. The return to labor is said to be considerably more than \$30,000,000, but the governor puts the amount at a very modest figure notwithstanding this fact, the workingman will not pay a cent toward the cost of the roads unless he owns an automobile. Neither the farm, the home or other property will be taxed, because the automobile license fees will more than meet the expense.

If the bonds are not issued, the motor license fees will be used anyhow for the construction of roads, but they will be built in a relatively disconnected way over a period of years running into the next generation. How much better to build them now, by issuing bonds, use them now and maintain them in such a way that we can hand them to the coming generation as an example of industry and foresight.
