SOIL IMPROVEMENT ASSOCIATION PICNIC Rockford Maroons Trot Home with Genna's

AT THE GROVE ON THE DE KALB COUNTY FARM, SATURDAY, SEPTEMBER 6. 1913

PROGRAM:

10:00 a. m.—Inspection of DeKalb County Farm fields.

ment Association.

12:00 Noon-Everybody bring their dinner and enjoy a good visit

during the noon hour.

1:00 p. m.-Hon. Fred L. Hatch, Spring Grove, Illinois.

"Alfalfa, Silage and the Dairy Cow in Northern Illinois." 1:30 p. m,-Hon. A. N. Abbott, Morrison, Illinois.

"Alfalfa, Silage and the Production of Pork and Beef."

2:00 p. m.—Judge W. B. Quarton, Algona, Iowa. 'The Growing of Sweet Clover and Its Uses."

2:30 p. m.—Brother Leo, Notre Dame, Indiana.

"How the thousand acres of tillable land on the Notre Dame University Farms has yielded an annual profit the past four years of from \$9,000 to \$12,000."

3:00 p. m.-Prof. Chas. E. Thorne, Wooster, Ohio. (Director of the Ohio Agricultural Experiment Station.) "Farm manures reinforced with Rock phosphate."

DeKalb County Farmers and neighbors have a rare opportunity to spend a pleasant and profitable day together. Such a gathering of talent, of men who have done things, has never before taken place

in Illinois for a like purpose. Mr. Farmer or Land Owner or Tenant: Saturday, September 6, A BAT IN THE HANDS OF A MAROON can be worth \$1,000 to you if you will take home the truths these LOOKED LIKE A TREE TO HANSON men will present, and have in you the stuff to put them into practice,

year will pay for the labor of three men during the season. We will show you a field of soy beans on land that last year pro- the Rockford Maroon's fifteen, duced \$25 00 worth of soy beans per acre, but two years ago the grain Result, Rockford 13, Genoa 1.

was hardly knee high. This is only a part of the farm. Abbott and Hatch, both farmers, are two well known to DeKalb ford are credited with the honor

County farmers to require further mention,

Judge W. B. Quarton, Algona, Iowa, is perhaps America's best The former wrenched his knee authority on Sweet Clover. The Judge feeds sweet clover hay to his in the first inning, however, and Guernsey cattle, to his horses, and he will tell you of Frank Clover- was compelled to quit the game. dale's 150 acres of sweet clover at Delmar, Iowa.

Brother Leo, Notre Dame, Indiana, I consider Indiana's most useful citizen. Brother Leo had brains enough to put into practice those things the Experiment Station had proved profitable and practicable. His first order for limestone was given for fourteen carloads. He told me that they worked less hard, worried less and now have something for their labor. Brother Leo is not an orator, but a man who does things in practice. He fed the carload of three-yearold steers that took first place at the International, 1912. It is worth going 100 miles to hear this man, in his way, tell what has been done by putting brains back of labor.

Prof. Chas. E. Thorne, Wooster, Ohio, stands out with our Dr. C. G. Hopkins in having done the cause of Agriculture more good than any other man living. Director Thorne started the use of Rock Phosphate a number of years before Illinois began the work.

The Ohio work is considered the best work in the world showing that we can use rock phosphate in connection with decaying organic

Third Annual Conference for Country Life Conference

Farm Monster Basket Picnic Planned by Mr. Eckhardt

Conference of the Illinois Feder- voted in. cessive meetings in the same the contract at a certain time. locality as a means of awakening support and attendance the Third will again be held in DeKalb prove one of the most significant rural meetings ever convened in the state. The general plan of this year's conference is more comprehensive than ever before. The conference proper will be opened Wednesday morning, September 3, by Governor Edward F. Dunne and will close Friday evening, September 5. Special gatherings planned as an introduction and conclusion for these three days of general discussion, will extend the program, however, to cover an entire week. On Monday and Tuesday, September 1 and 2, a special Conference of Country Ministers will convene, and on Saturday, September 6, a big Soil Day will be Moves His Grocery Stock to Fairdale-Will run celebrated by the DeKalb County Soil Improvement Association. In addition, a larger and better

BANKERS' CONFERENCE ADOPTS RESOLUTIONS URGING CUR-RENCY BILL BE AMENDED.

AGREE TO AID LEGISLATION

Policy of Co-Operation With the Administration Wins on Final Day of Sessions Held in Chicago-Want Five Reserve Banks.

Chicago, Aug. 25.—The currency conference, called by the American Bankers' association to consider the Glass-Owen bill now before congress. harmoniously finished its labors at the Hotel La Salle by unanimously adopting resolutions calling for important changes in the measure, and authorizing the appointment of a committee of seven to present them at Washington.

The personnel of the committee is

James B. Forgan, president First National bank of Chicago: George M Reynolds, president Continental and Commercial National bank: E. J. Hill. vice-president National bank of Norwalk. Conn.: R. F. Maddox, vice-presi dent American National bank, Atlanta. Ga.: Sol Wexler, vice-president Whitney-Central National bank, New Orleans; Joseph Chapman, vice-president Northwestern National bank. Minneapolis; Festus J. Wade, president Mercantile National bank, St.

Trip to Washington Walts. None of the seven was named definitely as chairman, but it is expected the head will be assumed by Mr. Forgan as first on the list and also as vice-president of the currency commission of the bankers' association. Neither was the time for the conference at Washington fixed.

Though the bankers-who repre sented 47 states—have no hope that toto by congress, they do think they will win many modifications. The conflicting Chicagoans-George M. Reynolds and James B. Forganagreed upon it, and Mr. Reynolds summed up the general opinion when he termed it:

"An able, dignified, and courteous set of recommendations which will encourage further attempts at legislation on the part of the bankers"

Forces of Conciliation Win. Chairman A. Barton Hepburn of not alter the bill, and urged a large Cheops. attendance at the national convention be before congress.

colonies should become glutted with over-population. In order to guard against that the individual holding was made about twentyeight acres in area, many times larger than the average AN OLD-FASHIONED INDIAN OIL MILL plot in other parts of India, which is very small indeed. Added to ERE and there the country life in India this is the fact that fell work has been done by is changing. The old agricultural implements which have preserved the bubonic plague, and the population has been through the centuries the simplicity

and inefficiency with which the primi-

tive people of the peninsula endowed

them are being discarded, and their

place is being taken by chilled steel

plows and modern harrows, cultivators,

mowers, reapers and threshing ma-

chines, imported from the United

States. At the same time, large irrigation canals, built by the government, are liberating cultiva-

tors from eternal worry over the prospects of

rain. These changes are taking place with

eigners to realize that the transition is going on.

However, each year more and more of the illiter-

ate farmers are sending their sons and daugh-

ters to school and each year they show more in-

terest in the demonstrations held on the experi-

ment farms, and display less opposition to inno-

vations. In a few districts the advancement is

already quite marked. This is especially true

of certain parts of the Punjab-the province of

the Five Rivers, situated in northwestern India

-which are known as the Canal colonies. There

several million acres of land that twenty years

ago was barren waste, today have been con-

verted, thank's to a marvelous irrigation scheme,

into an important grain-producing region, spread-

ing the fame of India wheat far and wide in the

The very first farm that I visited in the col-

onies during a recent tour vividly revealed the

transformation of Indian rural conditions. In the

courtyard, shaded by a spreading jujube tree,

stood a reaping machine. In a mud shed, erected

especially for the purpose of protecting the farm

machinery, I wound four chilled-steel plows, two

of them made in the United States. On the floor

of the low-roofed verandah the farmer's son, a

lad of about twelve, at the highest reckoning,

clad as Dame Nature had dressed him at birth,

but for a scanty breech-clout, stood turning the

wheel of a modern fodder-chopper, which cut

green chari (millet) in small shreds that fell

After further travel and investigation among

the cultivators living round about Lyallpur, the

largest city in the erstwhile waterless wilder-

ness, which now, in the wake of the water car-

ried by the Chenab canal, has become a paradise

for farmers, I found that the cultivator whose

home I had first visited was not a whit more

enterprising than scores of others in the district

who today are employing time and labor-saving

machinery to do all the work on their land. Wher-

ever I went I found agriculturists galore who

owned their own steel plows, harrows, cultivators

and improved fodder-choppers. Occasionally I

would come across a reaper which was the prop-

erty of a progressive individual who profited by

renting it to his neighbors at harvest time. At

one place I even found a steam threshing ma-

Many causes have combined to make the farm-

ers in the Punjab colonies progressive. In the

first place they more or less entirely have been

cut off from their old moorings, and have begun

life all over again in a strange locality. They

have left some of their ultra-conservatism behind

them in the congested Punjab from which they

hailed, and the pioneer conditions that they

found confronting them in the new region di-

vested them of some more of their inborn reac-

tion. The Lyallpur agricultural experiment farm,

located in the very heart of the settlebent, has

demonstrated to them the good results of deep

plowing with chilled-steel plows, and the advan-

tage of using improved implements instead of

farming in the cumbersome, bungling, old-time

way. A still more potent factor that is encour-

aging these farmers to use modern machinery

about him in a succulent shower.

ruthlessly thinned out. As a result there constantly is a dearth of laborers, especially at harvest time. Then, too, during the cotton season it is necessary for the many ginning factories which have been established to coax to them men, women and children who otherwise would be available for field work. This further shortens the labor supply on the farms. Indeed, the shortage is so great that the government irrigation department, which is constructing suplementary canals to bring more water to the Punjab colonies, finds it necessary to employ mechanical exstartling rapidity. The process is proceeding at cavators, since coolies are not to be had for love natural that wages should rise, so that the landowners find it more profitable to employ laborsaving machinery than hands. The same causes which have induced the Pun-

mand. To begin

with, it never was

intended that these

tab colonies farmer to use modern implements are persuading their brothers in other parts of the country to take them up. Whenever one thinks of India he has in mind its teeming millions and cheap scale of wages; but he rarely remembers that the price of labor has risen a great deal during the past few years, and still is rising, compelling the wise native to employ mechanical instead of manual help. Moreover, the agricultural denartment which maintains well-equipped experiment farms at the principal centers of India, and schools and colleges, dotted all over the land where scientific agronomy is taught to the sons

have always looked down upon manual work, and issues popularly written literature for the enlightenment of the agricultural classes, also are exerting their influence to persuade the cultivators all over British India to make use of modern implements. Many of the native states, too, are following the example of the British administration and are carrying on a similar propaganda for the enlightenment of the agriculturists. This is especially true of Baroda and Mysore, two of the largest territories under native rule. It is quite natural therefore that the demand for farm machinery should be growing.

Since most Indian farmers are exceedingly poor and cannot offhand afford expensive implements, they have taken to clubbing together, sometimes as many as ten of them combining their resources to buy a reaper; and in many instances they are go clairvoyant, during the alleged procnot satisfied with this machine alone, but indulge in improved machinery of other descriptions. In the central provinces agricultural associations Chicago from Cleveland, where he is ley suicided. Hawley is a veterinary have been formed to interest the tenantry in the use of up-to-date methods. This means India's salvation; for the implements now in use on the land are of the crudest character imaginable. The Ohio for his return. plow is nothing more than a crooked stick with a blunt piece of iron fastened to the point. The ter of Noah Maddox, thirty-five, girl and while the farmer prepared to handle stands up at right angles, and by this the primitive share is laboriously guided as it is dragged through the hard-baked earth by the pattern will also a state of the point. The primitive share is laboriously guided as it is the primitive share is laboriously guided as it is to Chicago after developing symptoms of rabies. Her father died after the point of the tient bullocks. The cultivating is done with a short-handled hoe, which can be used only when for more than ten hours. Maddox the worker is squatting on his heels, and he waddles along at his task without rising. The corn is cut by a hand sickle and threshed out by the old-fashioned method of driving oxen over and over it. The winnowing is done by pouring the grain out of small baskets held high above the head by a man, either standing on the ground or on a sort of step-ladder, the wind blowing away the light chaff, while the corn falls in a heap be-Fodder is cut into shreds with a small hand-knife. Water is drawn from shallow wells or rivers or ponds, sometimes by a "Persian wheel" operated by one or two oxen, sometimes by hand, sometimes by baskets let down and quickly drawn up and emptied into a shallow, narrow channel which conducts it to the field. In view of all this, the adoption of modern implements is a move in the right direction.

SAFETY DURING STORM

The question of personal safety during a thunder storm is perhaps the most interesting to the majority of people. If in a building which is isolated in the open country or is higher than surrounding buildings in a group, avoid chimney or other flues, open windows or drafts, especially warm currents of air directly below a high tower or flag pole, peak or angle of the structure, is the warning given by the writer in the New York Sun. Keep away from overhead wires entering a building-although these are generally protected by lightning arresters, the currect is not always

If in the open avoid trees, wire fences or poles and if you happen to be the most prominent object in the landscape, as in an open field or on a beach, do not raise a steel rod umbrella, or, in fact, any umbrella, as you may become a living lightning rod without an approved ground connection. If you should happen to be caught in such open space, with lightning discharges coming close, as may be determined by the lessening intervals between flash and report, it is better to lie flat on the ground and risk a soaking than to offer a possible path for a discharge. The reason for this is that the body, being warm, offers a better conductor than the surrounding air, and only a few feet rise is necessary to attract lightning on

Questions as to the action of lightning striking a building are frequently asked, and are some what difficult to answer without going into a lengthy discussion of the various kinds of discharges and other matters of a more or less technical nature. Let us, however, take the most frequent case, that of the ordinary "forked lightning," as seen at a distance, which at close range becomes the blinding flash, with the accompanying instantaneous crash, often causing disastrous results to life and property. This discharge is caused by a difference of potential between earth and cloud. The one is heavily charged with positive electricity ,the other with negative, with the air between acting as an insulator. If the air is sufficient to keep apart the two currents no discharge will take place except from one cloud to another. Now, as the storm moves on it comes closer to the earth or meets some object in its path which offers less resistance than the airmaybe a tree, pole, building, etc. The electrical pressure is so great that the slight decrease in resistance offered by such object is sufficient to pa, Fla., committed suicide by shootcause the current to jump the intervening space ing himself in the European hotel and we have the destructive discharge. This ex. here. He left a note addressed to planation will be clearer to those who have seen Miss Anna Kulogowski of this city the spark gap from colls used on automobiles.

Springfield.-Members of the America can Press Humorists will be treated to a hovelty in the line of entertainment next week at their picnic on former Lieut. Gov. John G. Oglesby's estate near Elkhart. The association holds its annual gathering in Peoria next week and Colonel Oglesby has offered to turn over "Oglehurst" to the jokers Friday. The humorists will be in the private cars of William B. Mckinley, president, and H. E. Chubbuck, vice-president, of the Illinois Traction company.

Peoria.-On a mission which means either the immediate opening and widening of the Illinois-Michigan canal or its confiscation by the government, the new Democratic state canal commission reached Peoria in the steamer Aeolus and proceeded southward. For the first time in the history of the "tadpole ditch" this state commission has the backing of the war department in its efforts to raise injunctions of ten years standing which prevent the improvement and even the maintenance of the canal. Galesburg.-Howard Clayton, son of

Martin Clayton, a farmer, was killed ning destroyed a barn in which he with eight other men had taken refuge from the storm. Charles Cook was abeth Blake. It was placed in a fine shocked but will recover.

Springfield.-Albert V. Webb, a former resident of Chicago, where until May 31, 1913, he was in charge of the American Auto Supply company, will be brought back from England to face a charge of embezzlement. It is alleged that on May 31 of this year Webb de | him to drink two quarts of buttercamped with \$3,600 belonging to the | milk a day. company.

BATTLES MAD DOG IN STATION GELL

Exciting Experience.

Chicago.—Illinois leads all other ANIMAL FOUND RABID

Suspected Canine Locked Up in Adjacent Cell Crawls Through Drain Pipe Connecting the Two Rooms and Burles Fangs in Man's Leg.

Chicago.-John Anderson, an alleged burglar, was taken to the Pasteur institute the other day seffering from wounds on one leg which may but no lives were lost. The electric prove fatal and which he incurred in a desperate fight with a dog in his cell at the 50th street police station. The animal, also a prisoner, has since been found to be suffering from

The dog had been taken to the station after it had attacked and bitten these victims also were treated at the institute.

It was suspected at the time of the first attack that the dog might be mad. The policeman who captured the animal had no safe place in which to keep it and finally concluded to take it to the station and lock it up. It was placed in a cell adjoining the one occupied by Anderson, who was held as a suspect in burglary cases.

During the night the dog prowled and snarling and making so much noise that Anderson, stretched out on his plain board bench, could not sleep. After some hours, however, he

Suddenly the man was awakened by a peculiar scraping sound, and, gleaming at him in his own cell. The

Anderson kicked at the dog with snarling and growling and getting a Edwardsville.-Acting upon the sug- new hold on the leg every time he Anderson was taken to a doctor at

doubt that it was suffering from hydrophobia.

The fact that the dog was able to get from one cell to another is due to defects in the plan of construction of the cells at the 50th street jail.

JOKE GIVES VOICE BACK

Girl Finds Self Speechless After Storm, but Talks Again When "Surprised."

Dollar Bay, Mich.—Every time it thunders Lucy Sephalia, twelve years old, loses her voice.

Six weeks ago she lost her voice during a thunderstorm. Four weeks later it was restored when she was playfully frightened by a friend.

During each electrical storm since that time the same thing happened, but each time her voice has been restored by a prearranged surprise or

Physicians have been studying the case, but no solution has been given.

Buried With Services.

Bridgeport, Conf.—Two veterinary surgeons and the family physican were unable to save the \$6,000 Japanese toy poodle owned by Miss Elizcasket and buried with services.

Chicago.—Carl Olsen, milk wagon driver, arrested for drunkenness, was released on his promise to board the milk wagon. Judge Sabath ordered

FALL TERM OPENS SEPTEMBER 2

F. W. ELLIS, PRESIDENT.

SYNOPSIS.

default the attempt to bride Berny lectares that she would never marry nick, should he ever be divorced. Expromise from father to let Berny Riranger sees Berny in restaurant, cently recognizes her. and follows ome. The stranger, who is Buford, ctor. calls on Dominick.

If the attempt to bride Berny ly the attrical mass of this domestic undeniably interesting the self more than in a play, said:

"Go on, tell research."

A moment later, Buford entered, smiling, almost patronizingly urbane and benign. He was dressed with a rich and careful elegance which gave him a somewhat dandified air. After bestowing upon Dominick greetings that sounded as unctuous as a benediction he took his seat at the end of the cozy corner facing the door which led into the hall. From here he looked at the young man with a close, attentive scrutiny, very friendly and yet holding, under its enfolding blandness, something of absence, of inattention, as though his mind were not in the intimate customary connection with the words that issued from his lips. This suggestion of absence deepened, showed more plainly in an eye that wandered to the door, or, as Dominick fell to the carpet and remained ards." there, hidden by a down-drawn bush of eyebrow. Dominick was in the middle of a query as to the continued success of the "Klondike Monologue" when the actor raised his head and said politely, but with a politeness that contained a note of haste and eagerness beneath it:

"Is Madame at home?" "No, she's not at home," said Madame's husband. "But she may be in any moment now. She generally goes out for the afternoon and gets back about this time."

"Perhaps you can tell me," said Buford, looking sidewise at his gloves and cane as they lay on the end of the divan, "who-you'll pardon my seeming curiosity, but I'll explain it presently-who was the lady that came in here last night at about halfpast seven?"

He looked up and Dominick was suddenly aware that his face was charged with the tensest, the most vital interest. Thrust forward, it showed a hungriness of anticipation that was almost passionate. The young man was not only surprised at the expression but at the question.

"I haven't an idea," he said. "I wasn't at home to dinner last night, and didn't get in till late. Why do you want to know?"

"For many reasons, or for one, perhaps-for one exceedingly important |

He paused, his eyes again turned slantingly on the stick and gloves, his lips tight-pressed, one against the

What Illinois' New Good Roads Statute Will Do.

State Highway Department Is Created and Funds Are Provided for Buildind and Maintaining Roads and Bridges.

Writing in the Edwardsville (III.) create the strte highway department Intelligencer, Nelson L. Ryder gives and provide for "state aid roads," dea careful analysis of the new good clare a distinctly new policy on the roads law recently passed by the part of the state and provide a method Illinois legislature. His article in part by which it undertakes to assist in the follows:

What is known as the "Tice bill" is as heretofore administered by local highway officials, and in addition, mak. the class of such county. ing provision for the state to aid in the construction and maintenance of highways.

It creates and defines the duties of a state highway department, consisting of three highway commissioners, a chief and assistant engineer and necessary employes, as state officers, and of a county superintendent of highways, as a county officer. The state department is a non-partisan board, appointed by the governor, with the approval of the senate.

The county superintendent is appointed and his salary fixed and paid by the county board, his term being six years. The appointment is to be made in the following manner: the county board, within ninety days from July 1, shall certify to the state high way commissioner from three to five names of residents of the county who are considered desirable candidates for such office, the state commission then determines by competitive examination the person or persons best fitted for the office and certifles same to the county board, who appoint from that number. If no one be found qualified, the county board may submit a further list and if no one is then

Nelson L. Ryder.

examination may be appointed.

The law continues the present sysother important work.

Road and Bridge Taxes.

It is estimated that for the following year \$400,000 will be availmotor vehicles or automobiles, and an appropriation of \$300,000 from the general fund was passed by the legisla. about what I eat." ture but vetoed by the governor. Appropriations from the general fund will probably be made for succeeding

This state fund is alloted to the counties in the proportion the road and bridge tax levied in each county bears to the whole road and bridge tax levied in the state.

When an improvement on a state aid road has been determined upca proposals are invited by the state highway commission, and if satisfactory bids are obtained, the contract is awarded and the contractor, upon execution of proper bonds, proceeds to build the improvement, which is, upon completion, inspected by the state highway engineer, and if in compliance with the contract, accepted.

Considering the amount which may be allotted to a county from the state aid fund, and that it is entirely probable nearly all counties will take advantage of the law, it can readily be seen that it will be many years before all the roads which may be selected as state aid roads can be improved. Nevertheless, the law will operate to produce a connected system of highways, built under competent and efficient supervision, and furnishes a method for the beneficial distribution and employment upon rural highways of the funds realized from automobile licenses, and enables the state to bear a portion of the burden heretofore borne by the local municipal-

WHEN GOOD FARMING SHOWS

Results Are Most Apparent During Unfavorable Seasons-Allen Farm a Fine Example.

By H. A. M'KEENE,

Secretary Illinois Farmers' institute. Fairly good crops may be produced in any section of Illinois when the season is particularly favorable to that section, even though the best methods of crop production are not followed. prevail that results of good farming are most apparent. The beneficial results of good farm

management are very apparent on found qualified, a non-resident of the van, in Tazewell county. Mr. Allen answered. county who has passed a satisfactory has adopted the Illinois system of permanent agriculture and each year happy twin-braided girlhood days, adhe treats forty acres of land with tem of highway commissioners, with a 1.500 pounds per acre of raw rockprovision that one commissioner may phosphate. He practices a systematic ular who was my ideal and I never apupon majority vote of a township, be rotation of corn, oats, wheat and proached the shop window where be substituted for the board of three. clover. TELEPHONE EAR NEW MALADY

London Surgeon Says Abstention From Use of the Instrument Is the Only "Treatment."

trouble due to constant use of the

"The ailment is really a form of ear strain," an aural surgeon, who has recently noted several cases, explained recently. "If the eyes are fatigued in one particular way, for example, through overwork in brilliant light, images of the dark, or when the eyes are closed. In the same way, the person whose ear nerves are constantly being irritated by telephone sounds may, as a result of fatigue of the nerves, hear buzzing and clicking sounds continuously when not using the instrument. In other cases the irritability towards this class of sound may result in temporary deafness.

'Without doubt the sudden jars to the auditory nerves brought on by the ear being constantly on the alert for the telephone bell, the painful buzz of the 'engaged' signal, and the straining to hear a 'bad voice,' all tend to produce ear strain. Luckily the only treatment needed is abstention from the use of the telephone for a few days.'

Coaling Plants at Panama.

CALIFORNIA BAD MAN DIES IN LAST DITCH

Shoots Himself Through Head When Pursuing Posse Surrounds Him in Ravine.

Los Angeles, Cal.—"Buck" Van Vrend, the bad man of a hay-baling outfit near Owensmouth, ended his final day as camp tyrant the other day by shooting at whomsoever he fancied, stealing a horse, and, after his horse tumbled into a ditch, holding back the posse following until he shot himself. Deputy Sheriffs Moody and Anderson, who were called to stop the bloodshed, arrived just before Van Vrend

With the given name of Elliott, "Buck" Van Vrend came to the baling camp of Frank Barrett several weeks ago and immediately installed himself as camp bully. Mixed with men not too strict in observing the

wildest of all. His reign of bare knuckles and boot heel-to-the-jaw became intolerable, and the rest of the gang got together and rushed him out of camp several days ago.

He returned escorting a couple of six-shooters on his hips. Immediately he took possession of the camp. With perverted and mischievous energy he tormented all to the limit, capping his dangerous pranks by shooting unwholesomely near anyone that was slow in obeying him.

Bert Thomas lost a piece of his left

Another man had the heel of his boot driven off by one of Buck's bul-The gang got together and made a sortie after Buck. Buck raced out to the stable, stole the fastest horse at leisure and raced across country. The other men in the camp organized a posse, to hang Buck if necessary, but to bring him back at all costs.

Buck was leading the race by a wide margin when his horse tumbled into a ravine with Buck atop of his Into a small creek in the ravine, horse and rider scrambled for footing. The posse arrived at the bank, armed and ready for Buck's surrenthe farm of Ralph Allen, near Dela- exactly what you mean," Aunt Jane | "I don't think there is any room for der. Buck shot several times, then, doubt on that head," said Aunt Jane, when he saw his coign of disadvantage was too dangerous, made one spectacular stand and shot himself

DOUGH SNARES A BURGLAR

Policeman Baffles Prowling Negro by Blinding Him With the Week's Baking.

Highland Park, Ill.-Chief of Police Genest the other day introduced a "Telephone ear" is a form of ear new method into the art of capturing a thief, when he arrested a negro burglar by means of a pan of bread dough accurately thrown.

Chief Genest and Policeman Reipenwald, in response to a telephone call, hurried to the residence of James Prindeville. The burglar had fled, but a commotion in the home of Mrs. A. P. Smith next door attracted their attention.

As the policemen entered the kitchen a negro ran past them and dove through a window. As he leaped Chief Genest seized a pan of dough which was "raising" on a table near by and hurled it at the thief. His aim was accurate. The pan struck the negro's head and the dough, falling into his eyes, so blinded him that his capture was easy. The negro pleaded with his captors to help him clear away the debris.

The man gave the name of Oliver Green, 3540 Sedgwick street. had \$14 and four rings, taken from the Smith home.

Should Not Quarrel. Crown Point, Ind.—Though neither can understand the language of the other, Manuel Courtitis, a Greek, married Julia Gatyas, a Hungarian. An interpreter assisted the justice of the peace.

Likes Simple Food. Towanda, Pa.-Miss Clara Loewus lived twenty weeks on a diet of stale bread, peanut butter and potatoes and now refuses to give up the simple food. It costs only ten cents a day.

Popular Movement. Rome.—The postmaster general has received 300 wedding invitations since the removal of the ban against marriage of telephone girls.

Every time a girl's heart is broken she saves the pieces.
