

CLUB THAT HELPS THE COMMUNITY

Genoa Women Planning Comprehensive Program for Year

NEARLY ONE HUNDRED MEMBERS

Constitution Published for the Education of General Public—New Members Wanted

The Genoa Community Club is a growing organization, because it justly merits a healthy condition. Or perhaps it is more logical to say that the club is healthy because of its rest activity. It is doing things. The rest room is one of the club's accomplishments and it has plans for the future which will materialize to the benefit of everyone, if the present pep and united efforts are maintained.

There is no limit placed on the membership, except that every woman who joins must have the interests of the community uppermost in her mind and be willing to co-operate actively in the affairs of the club. Men are not eligible to membership every man can and should be ready to listen and aid when approached by a committee.

The club has no sinking fund and no surplus. At present it can not afford to have the constitution printed in book form. The Republican takes pleasure in publishing the constitution below for the benefit of those members who have not read it, and for the benefit of those who should be members.

Article 1.—Name
This association shall be called the Genoa Community Club.

Article 11.—Object
The object of this club shall be to promote mutual sympathy, and united effort for the betterment of the community.

Article 111.—Officers
SECTION 1.—The officers of this club shall be president, two vice-presidents, recording secretary, corresponding secretary, treasurer, and auditor.

SECTION 11.—The officers shall be elected by ballot at the annual meeting in May, and shall continue in office two years. The president, first vice-president, corresponding secretary and treasurer shall be elected in the even year, and the second vice-president, recording secretary and auditor in odd years. All officers shall be elected by plurality vote.

In order that this may be put into effect the second vice-president, recording secretary and auditor elected in 1920 shall hold office for but one year, with the privilege of re-election for a second term of two years. Thereafter no person shall hold the same office for more than one term.

SECTION 111.—A nominating committee of three members shall be appointed, one by the president, one by the board of directors, and the third by the club, at the March meeting.

SECTION IV.—Vacancies in office may be filled at any regular meeting or special meeting called for that purpose, in the same manner as at the annual meeting.

Article IV.—Board of Directors
SECTION 1.—The board of directors shall be composed of the president, first and second vice-presidents, recording secretary, corresponding secretary, treasurer, auditor and the chairman of each of the standing committees of the club.

SECTION II.—The board of directors shall meet at 2:30 p. m. on the Friday preceding the regular meeting of the club, and at any other time upon call by the president. A majority of the Board of Directors shall constitute a quorum.

Article V.—Duties of Officers
SECTION I.—The regular term of office of all officers shall commence at the adjournment of the annual meeting at which they are elected.

SECTION II.—The president shall preside at all meetings of the club and of the officers. He shall appoint all standing committees and shall be ex-officio a member of the same.

SECTION III.—The vice-presidents shall assist the president and in their order, shall in the absence of the president, perform her duties, the second vice-president also acting as chairman of the social committee.

SECTION IV.—The recording secretary shall keep a record of the minutes of each meeting of the club, keep a list of the members of the club, receive all moneys due the club and pay the same to the treasurer, giving or taking receipt for each sum transferred; notify delinquent members of their failure to pay dues.

SECTION V.—The corresponding secretary shall conduct all correspondence of the club and act as chairman of the membership committee which shall notify all members of special meetings. She shall also attend to the press notices and write the necessary letters of courtesy.

SECTION VI.—The treasurer shall pay all the bills of the club, upon

MARRIED IN SYCAMORE

Joseph Patterson and Mrs. Catherine Wright Wed Saturday

Mr. Joseph Patterson of this city and Mrs. Catherine Wright of Charter Grove were united in marriage at the congregational parsonage in Sycamore on Saturday, Oct. 2, Rev. F. L. Hanscom officiating.

Both the bride and groom are well known throughout this part of the county, having resided here many years. They will make their home at the Patterson residence on Sycamore street.

ENGLISH SERVICES

Services will be conducted in English next Sunday morning, at 10:30 at the Lutheran church.

written order signed by the president and secretary, keep account of the receipts and disbursements, and submit the book in which the records are kept to the auditor at least one week before the annual meeting.

SECTION VII.—The auditor shall audit the books of the secretary and treasurer and report to the club at the annual meeting. All bills must be forwarded to the auditor after being certified correct by the person contracting them.

Article VIII.—Duties of Committees
SECTION I.—The social committee shall recommend a place of meeting and have general charge of the room or rooms agreed upon, and shall have charge of all social functions of the club.

SECTION II.—The civic committee shall report at all regular or special meetings of the club anything concerning sanitary conditions, material municipal cleanliness, moral municipal cleanliness, good citizenship, beautifying the city etc.

SECTION III.—The philanthropic committee shall have charge of the necessary charities.

SECTION IV.—The literature committee shall furnish one program a year and perform any further duties delegated to it by the board of directors.

SECTION V.—The program committee with its chairman consists of the chairman of the Civic, Music, Philanthropic and Literature committee. This committee shall purchase all stationary, prepare and have printed the calendar.

SECTION VI.—The legislative committee shall keep in touch with legislative matters and present them to the club.

SECTION VII.—The music committee shall furnish one program a year and other musical numbers when requested.

Article VIII.—Membership

SECTION I.—The qualification for membership shall be character, intelligence and reciprocal advantage of membership to the club and the individual.

SECTION II.—All members are expected to take an active part in the work of the club.

SECTION III.—Any person wishing to withdraw from the club, may do so by sending a written communication to that effect to the board of directors.

Article IX.—Dues
SECTION I.—The annual dues of members shall be One Dollar (\$1.00) payable during the first quarter.

SECTION II.—Members failing to pay dues before the November meeting shall be at once notified by the secretary, and those not paying before the first of January shall forfeit all rights of membership and their names taken from the rolls.

SECTION III.—Any one who becomes a member of the club after February first shall pay one-half the annual dues for the current year.

SECTION IV.—Dues for the current year or half year, as the case may be, must be paid upon election to membership.

Article X.—Quorum
Five Members shall constitute a quorum.

Article XI.

SECTION I.—These by-laws may be amended upon formal notice and upon two thirds vote by those present. They may be amended at any annual meeting by a unanimous vote without previous notice.

SECTION II.—Any member may invite resident guests at any regular meeting, except "Guest Day," upon payment of ten cents. Non-resident guests of members shall be guests of the club and their names and addresses shall be recorded by the secretary.

SECTION III.—Regular meetings of the club shall be held the first Monday in the months, from October to May inclusive, at 2:30 p. m., unless otherwise changed.

SECTION IV.—Special meetings may be called by the president or by any three members, but no business shall be transacted except that for which the meeting was called and which shall have been stated in the call.

SECTION V.—A courtesy fund of Five Dollars to a committee shall be placed in hands of department heads to be used at their discretion and any part of it remaining at the end of the year returned to the treasurer.

SECTION VI.—In the conduct of the meetings, Roberts Rules of Order shall be the authority for parliamentary procedure.

THIS WAS NEWS IN THE YEAR 1895

Democrats Precrastinate in Auban Matter, Says Editorial

CAMPAIGN FOR IRISH FREEDOM

I. Q. Burroughs Puts in Iron Hitching Posts—New Sidewalk on Main Street

The items were taken from columns of the Genoa Issue, under date of October 10, 1895.

A new well has been put in at the school house.

I. Q. Burroughs has placed gas pipe hitching posts in front of his place on Main street, a big improvement over the old wooden posts.

The tile walk taken up from Main street is being laid on Sycamore street to the Illinois Central depot.

The Kingsten base ball team went over to Capron Friday and were done up to the tune of 22 to 0.

A board sidewalk has been laid on the east side of Emmett street, from Main to John Feigenharr's farm, (Jackson street).

Mrs. E. Crawford was in Chicago Monday and purchased an additional stock of military goods.

(History repeats) Editorial: Shall Cuba be free? Well, not as long as dilly-dallying Democratic administration is in power. They would rather take it under advisement for a few months in order that the blood-thirsty Spaniards can wipe out all chance of an interference.

Prof. D. M. Gibbs occupied the pulpit at the Kingston M. E. church last Sunday. Prof Gibbs was superintendent of Genoa schools.

An eight foot cement walk is now in front of every business house on Main street except one.

The president issued an order placing General Nilson A. Miles at the head of the United States Army.

(They are fighters) From the headquarters of the Irish National Alliance in New York city an appeal was issued calling for money to carry on the new campaign for "the complete independence of Ireland by any way consistent with the law of nations."

PROTECT BUICK BUYERS

No Danger from Price Reduction Until July 1, at Least

The following telegram received by Geo. Loptien announces the policy of the Buick Motor Co. as to prices for the season of 1921:

"Dodge Brothers policy has ever been to give full value for the price asked. There will be no reduction in the present prices of Dodge Brothers motor cars. Newspaper reports to the contrary are absolutely untrue."

Dodge Brothers announcement was no surprise to us," said the local dealers. "In fact it is only a substantiation of Dodge Brothers business principles. At no time have they ever demanded an excess amount for their product. As in the past, they will continue in the future to demand a fair return for their efforts."

"The mere fact that the demand for Dodge Brothers cars is still greater than the supply, despite the great expansion program of the factory, has absolutely nothing to do with the decision to continue the present prices. In marketing their cars Dodge Brothers have never made a point of price and will never sacrifice the quality of their product to enter price competition."

Accordingly in the future delivery of 1921 models a guarantee will be given purchaser that we will refund such amount as any future list price on 1921 models made by the Buick Motor Company of Flint, Mich., is lower than the list price of such model at the time of delivery.

CITY ATTORNEY WEDS
Miss Miller of Waterman is the Happy Bride

City Attorney G. E. Stott and Miss Miller of Waterman were married at the M. E. church Tuesday morning at nine o'clock, Rev. L. B. Lott officiating. Shortly after the ceremony the couple left Genoa in their car for a few days' trip. They will make their home on Genoa street.

Mrs. Stott is a sister of Will Miller of Genoa and has for some time been keeping house for Mr. Stott and his daughter, Mr. Stott is a home-loving man, he knows he has found a wife who can make a home, so everyone is happy.

MAY NEVER WALK AGAIN

Ross Hall, the man shot by a police officer at Rochelle several days ago, still remains in a serious condition in the Rochelle hospital. The police have him in nominal custody, but it is doubtful if the young man will never walk again.

Want to sell it? Use a want ad.

Community Club Bakery Sale will be held in Rest Rooms at Three o'clock Saturday Afternoon, Oct. 9.

MAY REORGANIZE OLD THIRD

Famous Old Regiment of Illinois Saw Two Wars

The great old Third Illinois, whose fighting men have won renown for it in two wars, is again to be reorganized according to tentative plans that are being made by state officials in cooperation with Colonel Charles Green former head of the old Third, says the DeKalb Chronicle.

DeKalb will have a chance to be the seat of a company in this reorganized Third if the people of the city are interested enough to back the company up, guarantee a membership of at least 50 and encourage and assist the organization generally.

Major Harry Goodison has received word from Colonel Green of the proposed plans for the rehabilitation of the Third and offer of a company to DeKalb under terms indicated.

If there is not local interest there it will be given, probably, to Sycamore as the policy is to send the companies which are rejected to the town nearest the former seat.

A number of the cities which had companies in the old Third have indicated their willingness to foster the growth of a new company and their possession of the old companies is assured.

Aurora had two companies of the old Third, Rockford had two, Pontiac, Ottawa, DeKalb, Bolvidere and Elgin were among the cities holding companies. The regimental band was stationed here shortly before the war.

NO CHANGE IN PRICE

Dodge cars Will Sell at Same Price, Says Dealer

Official confirmation of press dispatches from Detroit, announcing that there would be no reduction in the price of Dodge Brothers Motor Cars, has been received by Duval, Ave & Rudolph, the Dodge Brothers dealer in this city. A telegram from C. W. Matheson, acting general sales manager to the local dealer, reads:

"Dodge Brothers policy has ever been to give full value for the price asked. There will be no reduction in the present prices of Dodge Brothers motor cars. Newspaper reports to the contrary are absolutely untrue."

Dodge Brothers announcement was no surprise to us," said the local dealers. "In fact it is only a substantiation of Dodge Brothers business principles. At no time have they ever demanded an excess amount for their product. As in the past, they will continue in the future to demand a fair return for their efforts."

"The mere fact that the demand for Dodge Brothers cars is still greater than the supply, despite the great expansion program of the factory, has absolutely nothing to do with the decision to continue the present prices. In marketing their cars Dodge Brothers have never made a point of price and will never sacrifice the quality of their product to enter price competition."

Accordingly in the future delivery of 1921 models a guarantee will be given purchaser that we will refund such amount as any future list price on 1921 models made by the Buick Motor Company of Flint, Mich., is lower than the list price of such model at the time of delivery.

MOTHER IS CALLED

Mrs. Nellie Murszewick Died Monday At Twelve

Mrs. Nellie Murszewick died at the home of her parents, Mr. and Mrs. W. W. Story, in Genoa, Monday at the noon hour.

Mrs. Murszewick, who resided in Belvidere, was the oldest of three daughters. She is survived by her husband, two sisters and her parents.

Funeral services were held at the Lutheran church this (Thursday) afternoon. The deceased was 29 years of age.

THE NEW PASTOR

Rev Roy Crocker Comes from Stockton to Genoa

Rev. Roy Crocker will fill the Genoa M. E. Church pulpit during the coming year and will preach his first sermon on Sunday, Oct. 10. Rev. Crocker comes from Stockton, Ill. He is married and has two children.

Rev. L. B. Lott who will take a year's vacation from the ministry will soon leave for Downers Grove where he will make his home. He has not fully decided as to the work he will take up. Whatever it may be, he has the best wishes of his many Genoa friends.

WANTS \$30,000 FOR WIFE

After 24 years of happy wedded life, in which she was content to share the frugal but sufficient means of her husband, an "insatiable fondness for feminine finery" led Mrs. Augustus A. Boslough from the arms of her husband into the arms of his cousin, Alfred A. Moslough of Mendota and Earlville, according to a declaration filed last week in the circuit court at Ottawa by Augustus A. Boslough in a suit for \$30,000 as alimony for the alienation of the affections of his wife.

FATHER FINN DEAD

Rev. Thos. Finn passed away in Rockford Tuesday at the age of 64 years. Father Finn had been in Genoa on several occasions and will be remembered as a lecturer of exceptional ability.

GOVERNOR NAMES NINTH OF OCTOBER

Fire Prevention Day in Illinois Subject of a Proclamation

CLEAN UP RUBBISH IS SUGGESTED

Inspect Smoke Pipes and Chimneys and Teach Plan of Fire Prevention

Governor P. O. Lowden issues the following proclamation:

Fire losses in the United States are a matter of gravest concern. Material resources in this country are being burned at the rate of a million dollars a day. In the State of Illinois the fire waste is averaging more than a million and a half dollars a month. Lives lost through fire and accidental burns number close to 25,000 annually in the United States, to say nothing of the countless persons injured and maimed.

This wholesale waste of life and resources not only adds to the burden of high prices, but is a handicap to our national prosperity, inasmuch as more than seventy-five per cent of this waste is preventable, the record is deplorable, particularly at this time, when conservation should be uppermost in the minds of all.

Therefore, I, Frank O. Lowden, Governor of Illinois, do hereby proclaim Saturday, the ninth day of October, 1920, as Fire Prevention Day, urging that this day be made the occasion throughout the State of bringing to our citizens the meaning of this enormous unnecessary destruction of life and property, and the necessity of reducing it;

That appropriate educational exercises be held in every community in order to stimulate individual careflessness and a sense of personal responsibility on the part of everyone as regards fire;

That the lessons of fire prevention be particularly impressed upon the children in all schools, for seed effect sown in the minds of the young is sure to bear fruit in the rising generation;

That public and private places be thoroughly cleaned up and all rubbish and waste safely disposed of, to reduce danger of fire, as well as promote health;

That all heating apparatus, chimneys, electric wiring and ventilating devices be carefully examined and necessary repairs made, so that the hundreds of fires due to these causes with their attendant suffering and loss, may be materially reduced;

That all public and private places where people assemble—especially hotels, factories, theaters, schools, institutions and churches—be inspected and every safeguard against fire, as well as adequate exit facilities, be provided, to the end that our State be spared from holocaust;

That fire drills be held and continued at frequent intervals in schools, factories and public buildings, so that occupants may be thoroughly trained in making a safe and orderly exit in case of emergency;

That competent and able-bodied watchmen, in number sufficient to afford proper protection, be maintained at all buildings holding valuable contents;

That best possible building regulations, fire prevention ordinances and means of protection against fire be provided in every community;

That Chambers of Commerce and civic organizations lend their organized efforts to an effective observance of the day along the lines indicated, cooperating to the fullest extent with the public authorities.

Realizing the tremendous power of the press, it is particularly requested that the newspapers give their active and generous support in carrying out the aims and purposes for which this day is designated.

THE MARKETING COMPANY

To Increase Capital Stock a Million Dollars

The St. Charles and Chemung condensaries of the Borden company were sold this afternoon to the Milk Producers' Co-operative Marketing company.

The deal was closed and papers were signed at the marketing company offices shortly after noon when word was received from the New York offices of the company that the offer of the marketing company had been accepted.

The details of the sale announced by The Elgin Daily News were: Borden sell the St. Charles and Chemung plants to the marketing company for a total of \$175,000.

The plants are to be taken over as soon as possible, the St. Charles plant tomorrow and the Chemung plant later.

The marketing company will begin the condensing of milk at the plants on taking them over.

MANY ATTEND THE NEY FAIR

Fully One Thousand People Brave the Chilly Winds

FOUR SPEAKERS ON PROGRAM

Plenty of Enthusiasm but Exhibits Are Few—Kingston Tigers Win

About one thousand people braved the chilly winds last Thursday and attended the annual fair, live stock and produce exhibit at Ney.

The exhibit of live stock was fair, but the display of cookery, canned goods and produce did not come up to expectations and the record of previous years.

The program of events was interesting, however and held the crowd during the afternoon and evening. The Marengo base ball team failed to appear so a hastily organized team from Genoa was pitted against the Kingston Tigers. The latters played entirely in keeping with their vicious name and put it all over the Genoa aggregation. As far as the writer can learn, the score has never been told.

County Advisor Roberts of DeKalb county and Carncross of McHenry county spoke in the afternoon as did Attorney W. J. Fulton of Sycamore.

In the evening Rev. Geneise of Hinckley spoke on "Americanism." All the speeches were thoroughly enjoyed.

The Kingston band, under direction of Prof. C. F. Toenniges of DeKalb was at its best and gave an excellent concert in the evening.

THE FIRST MEETING

Community Club Opens Season at Home of Mrs. E. W. Brown

About sixty ladies gathered at the home of Mrs. E. W. Brown Monday afternoon, Oct. 4, for the first meeting of the year, the program opening with a solo by Mrs. Millie Peterson Engle.

The address was delivered by Mrs. Edward S. Bailey of Chicago, first vice-president of the Illinois Federation of Women's clubs. Among the many interesting subjects of which she spoke was the great necessity of having club headquarters, also of the many things accomplished by the Federated clubs of Illinois.

She praised highly the work that has been done by our local club and gave the officers and members much encouragement for the new year.

After the address a business meeting was held. The social committee then took charge and refreshments were served.

Following are the standing committees:

Social—Marrilla Byers, Della Fisher, Guylla Patterson, Emily Scott, Irene King, Bonnie Faber.

Civic—Cora Schoonmaker, Blanche Kiernan, Adah Shesler.

Philanthropic—Della Stewart, Orilla Parker, Maggie Drake, Minnie Johnson, Mabel Buck, Mattie Smith.

Program—Ray Mackenzie, Cora Schoonmaker, Della Stewart, Blanche Holtgren, Florence Leitch.

Literature—Blanche Holtgren, Maude Goding, Carrie McCoy.

Legislative—Alma Kohn, Edna Swan, Ruth Bevan.

Music—Florence Leitch, Millie Engle, Lois Brown.

Rest Room—Cora Schoonmaker, Laura Lindgren Helen Smith.

Edict Chairman—Lorene Brown.

Membership—Mabel Baldwin, Essie Austin, Emily Brown, Minnie Mac Smith, Edith Bennett, Amelia Awe, Leta Tischer, Elizabeth Burroughs, Myrtle Kyler.

SOMONAUK'S PROGRESS

Those who have been working industriously the past few weeks for a stock pavilion in Somonausk saw their hopes realized Monday evening when the Breeders' Sales Corporation was organized with a capital stock of \$10,000.

Following the organization of the company all of the plans and specifications submitted by Brooks Hoover, for the enlarging and remodeling of the Dienst Hitch Barn, were approved and Mr. Hoover was authorized to proceed with the work.

FATHER FINN DEAD
Rev. Thos. Finn passed away in Rockford Tuesday at the age of 64 years. Father Finn had been in Genoa on several occasions and will be remembered as a lecturer of exceptional ability.

The GREAT SHADOW

by A. Conan Doyle

AUTHOR OF "THE ADVENTURES OF SHERLOCK HOLMES"

COUSIN EDIE.

Synopsis.—Writing long after the events described, Jack Calder, Scot farmer of West Inch, tells how, in his childhood, the fear of invasion by Napoleon, at that time complete master of Europe, had gripped the British nation. Following a false alarm that the French had landed, Jim Horscroft, the doctor's son, a youth of fifteen, quarrels with his father over joining the army, and from that incident a lifelong friendship begins between the boys. They go to school at Berwick, where Jim is cock boy from the first. After two years Jim goes to Edinburgh to study medicine. Jack stays five years more at Berwick, becoming cock boy in his turn. A visit of Cousin Edie Calder of Eyemouth to West Inch gives no hint of the part she is to play in the lives of the two friends.

CHAPTER II—Continued.

One day, when I came in from the sheep, there was my father sitting with a letter in his hands, which was a very rare thing with us, except when the factor wrote for the rent. Then when I came nearer to him I saw that he was crying, and I stood staring, for I had always thought that it was not a thing that a man could do. My mother sat beside him and stroked his hand like she did the cat's back when she would soothe it.

"Aye, Jeanie," said he, "poor Willie's gone. It's from the lawyer, and it was sudden, or they'd ha' sent word of it. Carbuncle, he says, and a flush o' blood to the head."

"Ah, well, his trouble's over," said my mother.

My father rubbed his ears with the tablecloth. "He's left a' his savings to his lassie," said he, "and by gorn, if she's not changed from what she promised to be she'll soon gar them flee. He doesn't say how much, but she'll have enough and to spare, he says. And she's to come and bide with us, for that was his last wish."

"To pay for her keep," cried my mother sharply. I was sorry that she should have spoken of money at that moment, but then if she had not been sharp we should have been on the roadside in a twelvemonth.

"Aye, she'll pay, and she's coming this very day. Jock, lad, I'll want you to drive to Ayton and meet the evening coach. Your cousin Edie will be in it and you can fetch her over to West Inch."

And so off I started, at quarter past five, with Souter Johnnie, the long-haired fifteen-year-old, and our cart with the new-painted tailboard, that we only used on great days. The coach was in, just as I came, and I, like a foolish country lad, taking no heed to the years that had passed, was looking about among the folk in the inn front for a slip of a girl with her petticoats just under her knees. And as I slouched past and craned my neck there came a touch to my elbow, and there was a lady, dressed all in black, standing by the steps, and I knew that it was my cousin Edie.

I knew it, I say, and yet had she not touched me I might have passed her a score of times and never known it. My word, if Jim Horscroft had asked me then if she were pretty or no I should have known how to answer him! She was dark, much darker than is common among our border lassies, and yet with such a faint flush of pink breaking through her dainty color, like the deeper flush at the heart of a sulphur rose. Her lips were red and kindly and firm, and even then, at the first glance, I saw that light of mischief and mockery that danced away at the back of her great dark eyes. She took me then and there as though I had been her heritage, put out her hand and plucked me. She was, as I have said, in black, dressed in what seemed to me a wondrous fashion, with a black veil pushed up from her brow.

"Ah, Jack," said she, in a mingling English fashion that she had learned at the boarding school, "No, no, we are rather old for that." This because I, in my awkward fashion, was pushing my foolish brown face forward to kiss her, as I had done when I saw her last.

"Is this our carriage? How funny it looks. And where am I to sit?"

"On the sacking," said I.

"And how am I to get there?"

"Put your foot on the hub," said I; "I'll help you." I sprang up and took her two little gloved hands in my own. As she came over the side, her breath blew in my face, sweet and warm, and all that vagueness and unrest seemed in a moment to have been shredded away from my soul. I felt as if that instant had taken me out from myself and made me one of the race. It took but the time of the flicking of the horse's tail, and yet something had happened, a barrier had gone down somewhere, and I was leading a wider and a wiser life. I felt it all in a gush, but, shy and back-

Why, there was Major Elliott, a man that had buried three wives, and had twelve pitched battles to his name. Edie could have turned him round her finger like a damp rag—she, only new from the boarding school. I met him hobbling from West Inch, the first time after she came, with pink in his cheeks and a shine in his eye that took ten years from him. He was coking up his gray mustaches at either end, and curling them into his eyes and strutting out with his sound leg as proud as a piper. What she had said to him the Lord knows, but it was like old wine in his veins.

I saw the corner of a newspaper thrusting out of his pocket, and I knew that he had come over, as was his way, to give me some news, for we heard little enough at West Inch.

"What is fresh, major?" I asked.

He pulled the paper out with a flourish. "The allies have won a great battle, my lad," says he. "I don't think 'Nap' can stand up long against this. The Saxons have thrown him over, and he's been badly beat at Leipzig. Wellington is past the Pyrenees and Graham's folk will be at Bayonne before long."

I chuckled up my hat. "Then the war will come to an end at last," I cried.

"Aye, and time, too," said he, shaking his head gravely. "It's been a bloody business. But it is hardly worth while for me to say now what was in my mind about you."

"What was that?"

"Well, laddie, you are doing no good here and now that my knee is getting more limber I was hoping that I might get on active service again. I wondered whether, maybe, you might like to do a little soldiering under me."

My heart jumped at the thought. "Aye, would I!" I cried.

"But it'll be clear six months before I'll be fit to pass a board, and it's long odds that Boney will be under lock and key before that."

"And there's my mother," said I. "I doubt she'd never let me go."

"Ah, well, she'll never be asked to now," he answered, and hobbled on upon his way.

I sat down among the heather, with my chin on my hand, turning the thing over in mind, and watching him in his old brown clothes, with the end of a gray plaid flapping over his shoulder as he picked his way up the swell of the hill. It was a poor life this at West Inch, waiting to fill my father's shoes, with the same heath and the same gray house forever before me. But over there—over the blue sea—ah, there was a life fit for a man.

For two days I turned it over in my mind, and on the third there came something which first brought my resolutions to a head and then blew them all to nothing, like a puff of smoke in the wind.

I had strolled out in the afternoon with Cousin Edie and Rob, until we found ourselves on the brow of the slope which dips away down to the beach. I pulled an armful of bracken to make a couch for Edie, and there she lay in her listless fashion, happy and contented, for of all folk that I have ever met she had the most joy from warmth and light.

There was a ship coming up with the wind—a black, sedate old merchantman—bound for Leith as likely as not. Her yards were square and she was running with all sail set. On the other tack, coming from the north-east, were two great, ugly, lugger-like craft, with one high mast each, and a big, square, brown sail. A prettier sight one would not wish than to see the three craft dipping along upon so fair a day, but of a sudden there came a spurt of flame and a whirl of blue smoke from one lugger, then the same from the second, and a rap-rap-rap from the ship. In a twinkling hell had elbowed out heaven, and there on the water was hatred and savagery and the lust for blood.

We had sprung to our feet at the outburst and Edie put her hand, all in a tremble, upon my arm.

"They are fighting, Jack," she cried. "What are they? Who are they?"

My heart was thudding with the guns, and it was all that I could do to answer her for the catch of my breath.

"It's two French privateers, Edie," said I. "Chasse-marees, they call them, and you'll see one of our merchant ships, and they'll take her as sure as death, for the major says that they've always got heavy guns, and are as full of men as an egg's full of meat. Why doesn't the fool make back for Tweed-mouth bar?"

"You are my very own now. I'll stay and marry you."

(TO BE CONTINUED)

"Mapping" the Air.

The greatest discovery yet made in exploring the air is that the atmosphere consists of two layers, the lower extending from sea level up to 10,000 meters, in which there is a steady fall of temperature with elevation. This is called the troposphere. Above this there is no fall, and up to 20,000 meters a slight rise. The upper layer is known as the stratosphere. It is actually possible today for an airplane to rise from the ground to the bottom of the stratosphere, say about six miles, in one hour. If we want to explore somewhat higher, say 20 miles, we install light instruments on a sounding balloon.

A Looking-Back Word.

A woman always has time for reflection when she sees a mirror.—Cartoons Magazine.

Figures compiled in England show that the world's consumption of tea is steadily increasing.

Left-Overs

By LILY WANDELL

(© 1920, by McClure Newspaper Syndicate.)

The usual series of parties for an engaged couple began, Cam generally in the background watching Deborah out of the corner of his eye. How she basked in the continual sunshine of admiration! It thrilled him to think that he had won her. She was new in town and immensely popular, and he had always been too engrossed in following his vocation of a professor to bother about social affairs. But Deborah, with her brilliance of a woman in full bloom, had shaken him out of his retirement.

A very young girl, too short for Cam's taste, had seated herself on the other end of the sofa. Cam glanced at her and decided he did not like her. She was too small, her hair too straight and black, her skin too dark and her eyes, slanting like an Oriental's, black and large, and her lips being small and painted very red. She smiled faintly, almost timidly.

"I'm your neighbor," she ventured. He did not like her voice either. It was low-pitched and throaty. Deborah's was clear and distinct.

"Neighbors?" then smiling at the settee. "Oh, I see."

"That was not what I meant. I am visiting Mrs. Ingram, who lives next door to you. I've seen you loads of times."

It sounded slightly reproachful, and Cameron Daw, being of a sensitive nature, felt then and there called to make up for his seeming incivility.

Later, before the party was over, when she expressed a desire to go home, Cam accompanied her the short way, simply as a courtesy to Mrs. Ingram, to whom he felt indebted for many little neighborly kindnesses.

Somehow or other he got talking about stars to the girl, and when he returned to the scene of festivity the guests had left, including Deborah. He was amazed; he had had no idea that he had stood more than an hour explaining the solar system to a slant-eyed girl. At any rate he went home congratulating himself that he was engaged to Deborah and not to Mrs. Ingram's young visitor, poor little thing. He felt sorry for her, she seemed so forsaken, a little different from other girls. Even her name, Vashti, had a headish sound, quite in tune with those dark almond-shaped eyes and painted lips.

The next day he lingered near the party fence. This had nothing to do with his neighbor's guest; he was interested in a vine growing there, a troublesome vine that needed no end of tending and adjusting. And after he had fussed with it for quite a while, Vashti did appear and came over to see what he was doing. She might have been a hardy little brown plant herself, as she stood there in wood-colored skirt and sweater, adorned by a single splash of red, a ripe berry, her painted lips.

He explained the vine to her, all about its botanical family, and similar wild vines that grew in nearby woodlands. He suggested that after his classes they might look for some.

It was not on this walk, but during their second or third jaunt, that he learned about Bolsie. Vashti in confiding whispers told him all about the quarrel that had occurred the day before his sister's party. Bolsie, it proved, was a senior, and from Vashti's description, very hard-hearted and unforgiving. He was not taking any steps to make up; he seemed to take a malicious enjoyment seeing her lonely and forsaken. Vashti wanted to know what to do about it.

"Let's stir him up to action," suggested Cam hoysily, "make him see the green-eyed monster—frighten him and then—" he stopped a moment and added slowly: "I'm sure Deborah won't mind." It did not sound very positive.

"Who on earth is Deborah?" giving the name a funny little twist.

"Why, surely you know. Miss Heath? I'm engaged to be married—"

Vashti interrupted with a delicious laugh. "I'll not be fooled! I don't believe for a moment that you would marry a left-over!"

"Vashti!" cried Cam in a shocked voice, "really you don't realize what you're saying! Left-over! Deborah's not more than thirty-two or three, quite a bit younger than I!"

"But quite a bit too old for you!" mimicked the girl, laughing, and then, with appealing sweetness, "I'm sorry though!" And Cam did not know whether she meant that she was sorry for him or for her rude remark about left-overs.

He explained to his fiancée over the telephone about his obligations to Mrs. Ingram and the very nice opportunity he had of reciprocating by helping her to entertain her guest. He hoped Deborah would understand. She said she did perfectly, and reminded him of one or two dinner dates and about making a list for the wedding invitations.

Cam found himself squirming out of different social engagements. His fiancée was very sweet about his seeming neglect; he almost wished she would be a little huffy and more exacting. But she was very busy herself with dressmakers and shopping, and all sorts of showers and luncheons. Nevertheless Deborah was bound to notice how things stood; she was clever, though, and refrained from nagging, and went on with gay preparations.

As for Cam, he wondered why he

had ever insisted upon so short an engagement period. Here was his wedding coming off in less than two weeks! He could not believe it; it could not be possible. He did not like being hurried like this; he wanted time to think. Think about what?

Then and there he determined to fight the thing out. Why be a coward and lie to himself? Why procrastinate? He was wildly in love with little Vashti and, what was more, he was ready to admit it—to the world, if necessary. Deborah was so sensible—he thanked God for that—he could talk the thing over with her. Tonight was a dinner dance; he could talk to her then. He could not bear to meet her and act the hypocrite. So he wrote her a letter releasing her from her engagement to marry him and sent it over to the Heath home by a special messenger. Then, feeling wonderfully relieved and light-hearted, he hurried out to the garden and robbed all the June bushes of their floral offerings and took them next door.

Vashti, in old blue and gold, her lips unpainted and her cheeks aglow, met him in the big Ingram library. "I'm so glad you've come," motioning a place for him on the davenport; "I've had a wonderful yet difficult afternoon. I've been fighting with myself! Struggling with my mean little self—"

"Vashti!" he interrupted, taking one warm little brown hand within his own. "I've been doing the same—and everything is all right, darling—"

She nodded, smiling. "I'm so glad, for myself I mean. You see, I just couldn't stop thinking of Bolsie one minute, and I'm afraid making him jealous did not work at all. So I just stopped lying to myself and fought it all out this afternoon, and I decided that the silly old quarrel was all my fault, and that I would sit down and write Bolsie and tell him so, and say I was sorry! And I did, too, and sent it to him by special messenger. Don't you think that was the best and bravest way?"

Cam clutched the little hand tighter for a second, then he got to his feet. After mumbling a few sentences he left without saying what he had come to tell her. Vashti did not notice anything amiss; she was too occupied planning her own happiness.

In September, just before the fall term, Professor Daw returned from an extended tour of the Canadian Rockies. He looked and felt very fit. Fresh glacial breezes had blown all mental inebriation from his mind, leaving a flow of thought as clear and fine as a mountain stream.

Very briskly he walked the avenue to the Heath place. He had not bothered to telephone.

The maid at the door shook her head to his question in astonishment. "I thought everybody knew, sir, that they left yesterday."

Cam was terribly disappointed. "Did she leave an address?" he asked hopefully.

The girl smiled. "Not that I know of, sir. Honey-moon couples don't as a rule."

"Honey-moon! Married!" Then wildly distracted: "To whom, to whom?"

"Mr. Brothers, sir. Some people called him Mr. Bolsie."

In this university town the Ladies' Civic society has placed neat green cans for rubbish at certain corners. Before one of these receptacles Cam stopped, drew from his pocket an unopened letter addressed to himself in large backward characters, and on the back of which was a large monogram, the most prominent letter "V" standing out boldly. He tore the envelope carefully in strips and threw it into the depository. He did not care for left-overs.

BELOVED BY ALL PARISIANS

Solemn and Sacred in Memory is the Square Known as the Place de la Concorde.

"The spot where France weeps," the Place de la Concorde, is one of Paris' greatest showplaces. Thousands died there in the blood of madness of the French Revolution; the allied enemies of Napoleon held a solemn Te Deum there in 1814; in 1871 the hated Prussian encamped in the beautiful square; later the same year it was the scene of fierce and bloody conflicts between the Versailles troops and the Communards, who had erected barricades at one of its entrances. Since 1871 until recently the statue dedicated to the city of Strassburg had been continuously draped in mourning, and known as the "Lost Sister," keeping Alsace-Lorraine alive in the minds of Frenchmen.

It is a place of lovely fountains and statues. Originally it was intended as a center of commemoration, where statues and monuments might be erected to celebrate the memory of great Frenchmen and their deeds. There are in it now eight colossal statues, representing eight principal cities of France—Lille, Rouen, Nantes, Bordeaux, Brest, Marseilles, Lyons and Strassburg. There is now talk of erecting in it some immortal conception of the present conflict and its victorious outcome.

Efficiency Complication.

"You mustn't ask the telephone operator the time of day when your clock stops."

"Why not?" inquired the new subscriber.

"Because it takes up too much valuable time."

"But it takes up more of every body's time when you get the wrong number once or twice before you can call up a friend or a jewelry store to make the same inquiry."

"ASPIRIN"

WARNING! Unless you see the name "Bayer" on tablets you are not getting genuine Aspirin prescribed by physicians for 20 years and proved safe by millions. Name "Bayer" has same meaning as 14 Karat on gold.

SAFETY FIRST! Accept only an "unbroken package" of genuine "Bayer Tablets of Aspirin," which contains proper directions for Headache, Earache, Toothache, Neuralgia, Colds, Rheumatism, Neuritis, Lumbago, and for pain generally. Strictly American!

Handy tin boxes of 12 tablets cost but a few cents—Larger packages. Aspirin is the trade mark of Bayer Manufacture of Monocetate (ester) of Salicylic Acid.

The Reason.	Nearly Every House Has One.
"What a rasping voice Smith has."	"What's a bug in this house."
"No wonder; he went yesterday to his dentist and had his teeth filed."	"What kind?"
	"A golf bug."

Kill That Cold With

FOR Colds, Coughs AND La Grippe

Neglected Colds are Dangerous

Take no chances. Keep this standard remedy handy for the first sneeze.

Breaks up a cold in 24 hours—Relieves Grippe in 3 days—Excellent for Headache

Quinine in this form does not affect the head—Cascara is best Tonic Laxative—No Opiate in Hill's.

ALL DRUGGISTS SELL IT

All laws are broken to obtain a crown.—Spanish Proverb.

When the heart speaks, glory itself is an illusion.—Napoleon.

Important to Mothers

Examine carefully every bottle of CASTORIA, that famous old remedy for infants and children, and see that it bears the Signature of *Dr. J.C. Fletcher* in Use for Over 30 Years. Children Cry for Fletcher's Castoria

Washington's Millionaire Colony.

Washington is becoming a community of millionaires. According to estimates made from income tax returns—the basis being an income of \$50,000 or more a year—the District of Columbia contains no fewer than 150 persons worth one million dollars or more. From season to season the number of wealthy Americans who settle in the national capital, mainly attracted by its social opportunities, is perceptibly growing.

A Treat in Store.

"Now, Tommy," said the wife of Balliff Bifkins, "be a good boy while I'm gone and I'll reward you."

"What'll you gimme, ma?" asked the precocious child.

"I'll let you go down to the court-house and hear your father bawl: 'Order in court!'"—Birmingham Age-Herald.

Origin of Slang.

Slang originated from the gypsy tongue. It used to be a secret language of that race. It is by no means of modern date, being well known in the classic ages of Greece and Rome.

Most Amazing.

"Algy is losing his memory. It's been going on now for two months."

"But how could it?"

An old eagle is better than a young sparrow.—German Proverb.

The cost is small
The benefit is great

Those who feel ill results from tea or coffee drinking soon profit by a change to

Studying Nature In Her Nome

By John Dickinson Sherman

The American School of Wild Life Protection and Propagation in the future Mississippi Valley National Park

CLASS AT PICTURED ROCKS

VIEW FROM PIRKS PEAK

ROUTE OF THE WISCONSIN

FACULTY—KEYES, SHIMEK, PAMMEL, KAY

THE American School of Wild Life Protection and Propagation at McGregor, Iowa—the region of the proposed Mississippi Valley National park—is the outward and visible sign of an inward and spiritual desire to give the study and knowledge of nature its rightful place in our twentieth century scheme of life.

The American people are a nation of lovers of the beautiful in nature. The national park movement, with an army of enthusiasts behind it, is one of the liveliest causes of the times. That is why we have established since 1872, when the first national park in the world, the Yellowstone, was created, a system of nineteen national parks and thirty-five national monuments.

Yet it is true beyond question that in general the hundreds of thousands of yearly visitors to our beauty spots of nature thrill with an emotion that is quite apart from understanding of the scene before them. America has the noblest scenic magnificence that is easily accessible in all the world. And among the greatest of its manifold values is the fact that it is the record of America in its making. An appreciation of this magnificence and its values will add to its enjoyment.

To gain this understanding and appreciation is one of the several motives impelling the activities of the School of Wild Life Protection and Propagation at McGregor.

The American frontier is no more. Gone are the buffalo herds that covered the great plains. Extinct is the passenger pigeon. Civilization and wild life cannot exist together. The automobile takes the tourist everywhere. The airplane means the end of the silent places. In a few years the American will have to go to his national parks to see the wild animal life of his native land in its natural surroundings. For the national park is the one sure wild life sanctuary of earth—the one and only place where wild life is sufficiently free from molestation to hold its own against man and civilization.

So, to protect and propagate wild life by keeping inviolate the national parks and by establishing more national parks is another purpose exemplified in the American school in the area proposed for the Mississippi Valley National park.

This proposed national park lies in the northeast corner of Iowa and the southwest corner of Wisconsin. The Mississippi divides it; the Wisconsin and Yellow empty into the Mississippi from the east and west within the boundaries. About 15,000 acres, land and water, including 4,000 acres of Mississippi with islands, are under consideration. There are 1,671 acres in the Wisconsin State park at the mouth of the Wisconsin. Mrs. Martha B. Munn of New York has offered to give the 125 Iowa acres forming the scenic keystone. It is proposed that the Federal Government shall purchase for park purposes about 9,000 acres appraised at about \$224,000.

Scientific, educational and historically the area is worthy of national park honors. Geographically the area is just the place for a national park. There is no scenic national park worthy of the name between Rocky Mountain in Colorado and Lafayette in Maine. Railroads and transcontinental automobile highways run close by. There is river transportation. Big cities surround the site. Fully 20,000,000 people are within a few hours of the area.

The Mississippi Valley National park project in all its ramifications is backed by the General Federation of Women's Clubs, the Mississippi Valley association and a long list of organizations of large variety.

The attitude of the General Federation of Women's Clubs is typical. The work of this nation-

wide organization with a membership of 2,500,000 is carried on through a dozen or more departments. One of the most important of these is the department of conservation, which promotes the use without abuse of the natural resources of the United States.

At the biennial convention of the General Federation this summer in Des Moines, Iowa, one day was largely devoted to conservation. In the morning, in the convention, Mrs. John Dickinson Sherman, chairman of the conservation department, made her report and spoke on "The Conservation Outlook." She called attention to the fact that the natural scenery division of work, added by her to the department six years ago, was then considered as of little importance, natural scenery not being ranked as a natural resource of value; now natural scenery was recognized as a great national asset and the natural scenery division was the most popular in the department. George H. Maxwell, executive director of the National Reclamation association, delivered an address on "Our Conservation Problem."

Next was a "Natural Scenery Luncheon." In honor of Director Stephen T. Mather of the National Park service of the department of Interior, in charge of Mrs. Charles H. McNider, chairman of the natural scenery division, attended by more than 250 delegates. Mrs. Sherman presided. She said, in brief, that any constructive work that advances the use, development and preservation of our natural resources must necessarily be based on accurate information and careful study of conditions. A practical, comprehensive study of natural scenery and nature would lay a foundation for an understanding and an appreciation of our natural resources. The children of today should be given the opportunity to gain a first-hand, intimate and scientific knowledge of the earth, her products, of nature's bounty and nature's ways.

Director Mather outlined the activities of the national park service; asked the federated club women to urge upon members of congress the necessity of larger national park appropriations. He laid special emphasis upon the educational mission of the national parks. He would promote by every possible means the interpretation of the natural sciences which are illustrated by the scenic features, flora and fauna of the national parks, encourage the popular study of their history, exploration, tradition and folklore and improve every opportunity for the protection and propagation of bird and wild animal life.

Dr. L. H. Pammel of Iowa State college, chairman of the Iowa state conservation board, spoke in behalf of the Mississippi Valley National park project. He set forth the many and varied attractions of the region. He emphasized the fact that 20,000,000 people lived within a radius of 500 miles and that 85 per cent of the people can not travel to the national parks of the scenic West for vacations. The Northern Mississippi Valley congress was of the unanimous opinion that a series of national parks should be established in the Mississippi valley. He appealed to Director Mather to give the Mississippi Valley National park project impartial consideration.

In the afternoon the conservation conference was held in the auditorium. The program included addresses by Col. W. B. Greeley, head of the forest service, and Russell T. Edwards of the American Forestry association.

An interesting and important feature was "Natural Scenery—Iowa's Program," by Mrs. McNider and Mrs. Francis E. Whitley, past president of the Iowa Federation of Women's Clubs. Iowa is one of the most progressive states in the conservation of natural beauty spots. Its people have surveyed the state and have recommended more than fifty scenic areas for state and county parks.

Dr. B. Schimek of the University of Iowa made an eloquent address on "Moral and Spiritual Aspects of Conservation." This is a large subject.

National park enthusiasts believe that recreation amid scenes of natural beauty is the best antidote for the manifold evils of our complex modern civilization.

All these things, you see, lead up directly to the American school and its work. This is the second summer of the American School of Wild Life Protection and Propagation. The Iowa Conservation association met at McGregor in 1919 and out of it developed the school. This year it was of larger scope and greater significance. The purpose is to bring instructor and student into close touch relative to the subjects for which illustration is furnished by the environment. The students were of all walks of life and of all ages.

The patrons of the school were Dr. E. A. Birge, president Wisconsin university; Dr. W. T. Hornaday, New York Zoological gardens; Dr. W. A. Jessup, president Iowa State university; Enos A. Mills, Longs Peak, Colo.; Dr. T. S. Palmer, secretary A. O. U., Washington, D. C.; T. Gilbert Pearson, National Association of Audubon Societies. The directors were: Fred G. Bell, F. S. Richards, T. A. Jayne, T. J. Sullivan and L. P. Bickel.

The departments and instructors were: Geology, Dr. George F. Kay, dean of the liberal arts college of Iowa State university; Iowa parks, Dr. L. H. Pammel of Iowa State college, chairman of the state conservation board; botany, Dr. Bohumil Shimek of the Iowa State university; archeology, Prof. Charles B. Keyes of Cornell college; ornithology, Rev. Leroy Titus Weeks, rector of Trinity church, Emmetsburg. The fee was nominal, \$2. George Bennett was secretary and registrar; Karl D. Bickel, treasurer of student fees; Logan Blizard, committee chairman. Committees with the following chairman handled all arrangements: roads, T. J. Sullivan; music, Mrs. Otkin; finance, F. S. Richards; meals and lodging, Logan Blizard; grounds, Fred G. Bell; tents and cottages, William Meyers; boats, Frank Sloane; automobiles, Al Clemens; signs, John Kramer; reception and information, Fred Phillips.

The activities of the school were varied and enjoyable. In addition to the class work and matters of routine instruction there was a river trip on a big steamer; many addresses and stereopticon lectures; picnic luncheons, a community supper; music by the McGregor band; a union sledge; a formal opening and a general conference on the closing day.

Gov. W. L. Harding of Iowa, to further the Mississippi Valley National park project, called a conference of those most active in its promotion. The conference was held at La Crosse. Among those present from Iowa were: Governor Harding, State Senator Newberry, Assemblyman Becker, Doctor Pammel, Joseph Kelson, J. F. Ford, W. L. Albert, F. C. Bell, Logan Blizard, John Kramer, C. A. Luce, J. M. Berry, G. Pederson, C. A. Spinner, B. Hendrick, G. W. Eaton, Julius Boeck, Florence Clark, Mrs. F. C. Bell, Mrs. Logan Blizard and Mrs. C. A. Luce. Minnesota was represented by D. Lange, president of the state forestry association. Frank D. Lowman, superintendent of parks, represented Illinois. Among those present from Wisconsin were Congressman John J. Esch, Alderman Funk of La Crosse, C. L. Harrington of the conservation commission and Judge J. H. Long.

Governor Harding presided and Mr. Harrington acted as secretary. An executive committee was appointed, consisting of Governor Harding, chairman; Mr. Harrington, secretary; Mr. Lange and Mr. Lowman. All state organizations will unite in promoting the establishment by congress of a national reservation in the scenic area under consideration.

In a conference of Governor Harding, Director Mather, Doctor Pammel and W. F. Bickel arrangements were made to have Chairman Good and other members of the house appropriations committee visit the area which a large part of the Mississippi valley hopes will be made the Mississippi Valley National park.

WOMAN SLAYS HER AVENGER

Shoots Man Who Had Killed Two Others Who Had Attacked Her Honor.

ARGUES OVER MOTOR

First Husband Ambushed and Killed Six Years Ago—Her Ranch Foreman and His Father Were Shot by Wilson.

Winfield, Kan.—A year and a half after he had shot two men to death on the main street of Tahlequah, Okla., to avenge his wife's honor, Homer S. Wilson, himself, was shot and killed on a lonely country road, near Winfield, Kan., by Mrs. Wilson. He is the fourth man, intimately acquainted with his pretty dark-haired wife, who has perished.

Charles West, first husband of Mrs. Wilson, was shot and killed from ambush near Tahlequah six years ago. Then Frank Anthony and his father, William, fell at Wilson's hands because Wilson charged young Anthony, foreman of Mrs. Wilson's ranch, at Tahlequah, had been too friendly with Mrs. Wilson while her husband was in the army.

Were Returning From Cattle Buying Trip.

Mrs. Wilson killed her husband as they were returning from a cattle buying trip to Dexter, 22 miles east of Winfield. With the Wilsons at the time were Charles Ridgeway and Ed Glass, who have ranches near Dexter.

Wilson had been driving his automobile very fast, according to the story told by eye witnesses to the tragedy. When a stop was made for tire trouble and Wilson left the car, Mrs. Wilson slid into the driver's seat, insisting she would drive. An argument followed and Mrs. Wilson suddenly shot twice with an automatic pistol she had taken from the flap of one of the seats.

After Wilson had been induced into the service he complained to the draft officials that his wife had reported suf-

WHY DRUGGISTS RECOMMEND SWAMP-ROOT

For many years druggists have watched with much interest the remarkable record maintained by Dr. Kilmer's Swamp-Root, the great kidney, liver and bladder medicine.

It is a physician's prescription. Swamp-Root is a strengthening medicine. It helps the kidneys, liver and bladder do the work nature intended they should do.

Swamp-Root has stood the test of years. It is sold by all druggists on its merit and it should help you. No other kidney medicine has so many friends.

Be sure to get Swamp-Root and start treatment at once. However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

All the virtues by excess may degenerate into vices.

"Cold in the Head"

Is an acute attack of Nasal Catarrh. Those subject to frequent "colds in the head" will find that the use of HALL'S CATARRH MEDICINE will build up the system, cleanse the blood and render them less liable to colds. Repeated attacks of Acute Catarrh may lead to Chronic Catarrh.

HALL'S CATARRH MEDICINE is taken internally and acts through the blood on the mucous surfaces of the system, thus reducing the inflammation and restoring normal conditions. All Druggists. Circulars free. F. J. Cheney & Co., Toledo, Ohio.

A woman that hath wisdom gives her kisses sparingly.

USE "DIAMOND DYES"

Dye right! Don't risk your material in a poor dye. Each package of "Diamond Dyes" contains directions so simple that any woman can diamond-dye a new, rich, fadeless color into old garments, draperies, coverings, everything, whether wool, silk, linen, cotton or mixed goods.

Buy "Diamond Dyes" — no other kind—then perfect results are guaranteed. Druggist has "Diamond Dyes Color Card"—16 rich colors. Adv.

Better weak beer than an empty cask.—Danish Proverb.

For The Best Shine Ask For The Big Can

Mrs. Wilson Suddenly Shot Twice.

fering at the hands of her foreman, Frank Anthony. When he returned from the army he engaged Anthony in a duel in the street, shooting him twice. The elder Anthony rushed around a corner and was shot dead by Wilson as he reached for his fallen son's gun.

Acquitted Under "Unwritten Law."

The successful duelist was acquitted by the jury under the "unwritten law." He testified at the hearing that his wife had confessed the Anthonys had ambushed and killed her former husband and had sworn also to kill Wilson.

Wilson, thirty-five years old, gained fame in the cattle country through his ability as a lariat thrower. He was with the 101 Ranch Wild West show several years as chief of its cowboys, touring Europe and South America with that circus. Mrs. Wilson is of Indian blood, according to friends.

Bathtub Is Too Warm.

Philadelphia.—Before going upstairs to take a bath, Solomon Salkin, proprietor of a hardware store in Philadelphia, lighted an oil lamp and placed it in the store directly below the bathroom.

Later, Solomon, sitting in the bathtub, noticed that the water was becoming unusually warm. He turned on the cold water. It failed to reduce the temperature. Getting out to investigate, Solomon found flames eating through the floor beneath the tub. He suffered a \$4,000 loss before firemen extinguished the blaze.

Wasp Bored Holes Through Ear.

Springfield, Mass.—Rushing into the office of an ear specialist, Miss Lillian Beechly had a wasp which had punctured her ear four times removed by the physician.

Sure Relief

BELL'S ANTACID TABLETS FOR INDIGESTION

BETTER DEAD

Life is a burden when the body is racked with pain. Everything worries and the victim becomes despondent and downhearted. To bring back the sunshine take **GOLD MEDAL HAARLEM OIL CAPSULES**. The national remedy of Holland for over 200 years; it is an enemy of all pains resulting from kidney, liver and acid troubles. All druggists, three sizes. Look for the name Gold Medal on every box and accept no imitation.

Teamster's Life Saved

"Peterson Ointment Co., Inc. I had a very severe sore on my leg for years. I am a teamster. I tried all medicines and salves, but without success. I tried doctors, but they failed to cure me. I couldn't sleep for many nights from pain. Doctors said I could not live for more than two years. Finally Peterson's Ointment was recommended to me and by its use the sore was entirely healed. Thankfully yours, William Haase, West Park, Ohio, care P. G. Reitz, Box 199." Peterson says: "I am proud of the above letter and have hundreds of others that tell of wonderful cures of Eczema, Piles and Skin Diseases. Peterson's Ointment is 25 cents a box. Mail orders filled by Peterson Ointment Co., Buffalo.

Stock Raising in Western Canada

is as profitable as grain growing. Successes as wonderful as those from growing wheat, oats, barley, and flax have been made in raising Horses, Cattle, Sheep and Hogs. Bright, sunny climate, nutritious grasses, good water, enormous fodder crops—these spell success to the farmer and stock raiser. And remember, you can buy on easy terms.

Farm Land at \$15 to \$30 an Acre

—land equal to that which through many years has yielded from 20 to 45 bushels of wheat to the acre—grazing land convenient to good grain farms at proportionately low prices. These lands have every rural convenience; good schools, churches, roads, telephones, etc., close to live towns and good markets. If you want to get back to the farm, or to farm on a larger scale than is possible under your present conditions, investigate what Western Canada has to offer you. For illustrated literature with maps and particulars regarding reduced railway rates, location of land, etc., apply to Dept. of Immigration, Ottawa, Can., or C. J. BROUGHTON, Room 412, 112 W. Adams St., Chicago, Ill.; M. V. MACINNES, 175 Jefferson Avenue, Detroit, Michigan Canadian Government Agents.

Hopelessly Out of Fashion.

Despite his shabby clothing and empty pockets, it was evident that he had seen better days. A sympathetic soul began to chat with him, anxious to hear his story. Over a cup of cocoa he told his tale. "Yes," he said, "I've been quite a personage in my time; in fact, the cynosure of all eyes." His auditor waited in silence for an explanation. "It was the tattooed man in the circus," he went on. "And how did you lose your job?" he was asked. "Public went crazy on moving pictures," he said, "and mine wouldn't budge!"

Quite All Right.

Glady and George, recently engaged, were having one of their spats. Glady was endeavoring to make things clear to George, who was inclined to be obstinate. "No, George, dearie," said she. "I am afraid it's quite impossible. The thing can never be. We should never get on well together. You know I always want my own way." "That will be all right, Glady," replied George, "you can continue wanting it after we are married."

Better be convinced by words than blows.—Danish Proverb.

SHOWS BEGIN AT 8:00 p. m.

The pins for men in many designs at Martin's.
Mrs. Geo. Loptien was a Chicago visitor Tuesday.

Boudoir lamps make attractive gifts. See Martin.

Mrs. G. C. Rowan was a Rockford visitor Wednesday.

Mrs. J. T. Shesler is spending this week end in Chicago.

Mrs. J. Molthan is visiting friends at Hinsdale this week.

New lot of Columbia records just received at W. W. Cooper's.

Max Stoll of Chicago visited at the home of his mother over Sunday.

Good alarm clocks and plenty of them at Wetzel Bros. Sycamore.

Mrs. F. O. Holtgren and Mrs. N. P. Thurber were Rockford visitors Friday.

The Ladies' Aid Society will meet at the home of Mrs. Lewis Anderson Friday of this week.

Mike Gordon is in the hospital in Elgin recovering from a recent operation for appendicitis.

Mrs. Wm. Reid and Mrs. H. Kellogg attended the Methodist conference at Rockford Monday.

Mrs. N. P. Thurber of Milwaukee visited last week at the home of her sister, Mrs. F. O. Holtgren.

Miss Irene Corson of Chicago will spend the week-end with her parents, Mr. and Mrs. Albert Corson.

Community club Bakery Sale will be held in the rest rooms at three o'clock Saturday, October 9.

Beautiful ivory manicure sets, combs, brushes, mirrors, jewel boxes, powder and hair receivers at Martin's.

Twice as large an assortment of jewelry etc. as you would expect to find at Wetzel Brothers, Sycamore.

Mrs. Mary Sackett of Elgin was a guest at the home of her niece, Mrs. E. W. Brown, Saturday and Sunday.

Remember that three o'clock Saturday afternoon in the rest rooms the Community club bakery sale will open.

Mrs. Henry Wahl spent Wednesday with her daughter, Miss Helen, of Elgin, who is ill with inflammatory rheumatism.

Dr. Hill went to Chicago Wednesday where he will enter the Illinois Central Railway Hospital for a minor operation.

Mrs. Geo. Brungart of Rockford was a guest a few days last week at the home of her parents, Mr. and Mrs. Wm. Schmidt.

Mr. and Mrs. M. W. Chapin and daughter, Irma of Jefferson, Ohio, were guests last week of Mr. and Mrs. Wm. Reid.

Mrs. Anna Balcom and Mr. and Mrs. Wm. Watson were dinner guests of Mr. and Mrs. James Darcy of DeKalb Sunday.

E. C. Stillwell, who for a year or more has been running the Schmidt black smith shop, packed up and left Genoa this week.

Mr. and Mrs. Joe Patterson and Mr. and Mrs. Fred Patterson were Sunday guests at the John Patterson home in Rockford.

Mrs. H. Ream and Mrs. John Gahl, Mrs. Ernest Johnson and Mrs. Geo. L. Johnson were among the Elgin passengers Wednesday.

Mrs. Hemenway is visiting this week with her daughter, Miss Marjorie, who is attending the Columbia School of Music in Chicago.

Born to Mr. and Mrs. Elmer Peterson, at the Sycamore hospital on Wednesday, Oct. 6, a daughter. Both mother and baby are doing nicely.

Mrs. H. Mackenzie entertained Mrs. Edward S. Bailey of Chicago Tuesday. Mrs. Bailey is the 1st Vice-president of the Illinois Federation.

Mrs. E. W. Brown and sons will go to Marengo Friday for a few days' visit with the former's father, N. Woleben. Mr. Brown will drive over Sunday.

Mrs. F. M. King is enjoying a month's vacation in Joliet and Chicago. Mr. and Mrs. P. J. Lapham accompanied her to Joliet, making the trip by auto.

Mrs. Q. I. Cochrane, who has been spending the past several months with her mother, Mrs. Electa Peterson, left Wednesday for her home in Kansas.

Mrs. C. A. Stewart and daughter, Alice, returned to their home in Chi-

cago this Thursday, after a week's stay with the former's mother, Mrs. Caroline Sager.

Lloyd Hoover who has been employed at the Genoa Cash Grocery for several months, is now working in a grocery store at Freeport where his parents reside.

Mrs. Grace Wilkes and son, who have been spending the past four months with the former's sister, Mrs. Zoe Forsyth, left Wednesday for their home in Seattle, Wash.

Mrs. Kuhns of Chicago spent Thursday and Friday of last week with her daughter, Mrs. J. T. Shesler. Miss Patty Shesler accompanied her grandmother home for a week's visit.

There will be cakes, cookies, doughnuts, parjeter house rolls, wheat, corn and brown bread and baked beans for sale at the community club sale at three o'clock Saturday.

The Charter Grove community club will meet at the Charter Grove church, Tuesday evening, Oct. 12. A good program will be given and refreshments served. Everyone welcome.

Mrs. Lillie Dyer and son, John, Mrs. A. G. Stewart, Mrs. Eva Worcester and Miss Jennie Destchner saw the play "Abraham Lincoln" at the Blackstone theatre in Chicago Saturday.

Mrs. R. B. Field returned Wednesday from a few days' visit with Mrs. F. W. Marquart of Valparaiso, Ind. She found Mrs. Marquart able to be about the house and muchly improved in health.

Genoa motorists while in Rockford should bear in mind that lights must be left burning when car is parked at the curb, regardless of whether the streets are well lighted or not. The police will sure get you if you forget.

Geo. Hoffman and son, Frank, returned from New Jersey last Thursday, where they attended the funeral of the former's oldest brother. There were ten children in the family and all were present, the first time in many years.

R. B. Field, Geo. J. Patterson and S. T. Zeller left in the latter's car Monday for the fishing and hunting grounds, thirty miles north of Hayward, Wis., where G. W. Johnson makes his home. Thos. G. Sager went up on the train a few days before.

Mrs. H. H. Shurtleff has had as her guests the past week, Mrs. Harris of Los Angeles, Calif., and Mrs. Rumbaugh of Lincoln, Neb. Mrs. Harris and Mrs. Rumbaugh are daughters of Elder E. H. Burlington, who was pastor of the advent church in this city, some forty years ago.

Mr. C. M. Corson and daughter Guylla and the latter's son, Charles, returned Monday from a week's visit at the W. O. Holtgren home at Hartford, Mich. Mrs. Corson, who accompanied them there, went on to Grand Rapids where she will receive treatment at a sanitarium in that city.

About forty members of the Home and Foreign Missionary Societies attended the meeting held at the home of Mrs. T. N. Austin Tuesday afternoon. The lesson on community welfare work, was well handled by Mrs. F. O. Holtgren. When the business part of the program was completed, Mrs. J. T. Shesler gave one of her delightful readings. A social hour followed, which was in the nature of a farewell for Mrs. L. B. B. Lott, who has so earnestly given her time to this organization for the past two years. A beautiful ivory manicuring set was presented Mrs. Lott as a token of remembrance.

Case Bell.

In an Irish case of a domestic riot involving much injury to person and property, a witness in the course of a vivid narrative swore as follows: "He says to me, 'Is that your father?' And I says to him, 'It is me father.' And he says, 'It is well you told me, for I thought he was an ould gorilla,' and then the fight began, me lord."—From the Argonaut.

Peculiar Amusement.

Francis Bacon was so fond of fine clothes that he spent his odd time in trying to devise new styles and features of dress. During his life he made some 1,200 drawings of freakish costumes. When he could not get anybody to wear them, he hired a number of men to don the grotesque attire and to promenade the streets for his pleasure.

Stuck Up for His Pa.

Parson Blank took his little son to prayer meeting for the first time. During the prayer one of the deacons uttered a loud "Amen." Willie suffered this to pass without remark, but when the "Amen" was presently repeated he could stand it no longer, and rising in his seat he exclaimed, "Don't mind him, papa, you pray just as long as you want to."—Boston Transcript.

The Oldest Piano.

The oldest piano in existence was made by Cristofori in the year 1720, and is still in good condition. But its sound is more like that of a harp than a piano, for its wires, instead of being struck by hammers are plucked by points of quill or of hard leather.

BUILD YOUR CREDIT

For it is the backbone of industry and the foundation of every successful enterprise.

Be it in private or business life your credit is as good as you yourself make it.

The Exchange State Bank has facilities for handling your credit requirements and freely offer them to your legitimate needs.

Emblem of Satisfaction

BUICK

Emblem of Satisfaction

SURENESS of operation, power for hard, fast travel over all kinds of roads, capacity to stand up, are developed to the highest degree in the new Nineteen Twenty One Buick Series.

For two decades, Buick engineers have built Buick cars on these sensible lines for buyers who look upon the motor car as a business utility.

Each of the new models is equipped with the Buick valve-in-head motor,—a

guarantee of power and positive performance.

With its capacity for service, Buick combines striking beauty. In resilience of spring suspension and appointments that make for riding comfort the new models are especially appealing.

In the new Buick three passenger roadster, you will find a car which meets every requirement for sure, swift, comfortable transportation for every business man.

THE WOOL POOL

Growers Have 30,000,000 Pounds in Storage in United States

The 13 middle west states that have 30,000,000 pounds of wool in storage will sell under one agency. This decision was made at a meeting of farm bureau presidents and secretaries at Manhattan, Kans., this week. Farmers from 87 Illinois counties have 1,500,000 pounds of wool stored in the Illinois Agricultural Assn wool pool in Chicago.

J. F. Walker, chairman of the rail road pool committee, said that the practice of chopping up old wools and reworking them into cloth has interfered with the wool market. Virgin wools have advanced 250 per cent since 1914 while shoddy has advanced 500 per cent. This makes the sheep grower have to compete with a rag man and gives the customer a much poorer fabric. The "truth in fabric bill," which has been recently introduced into Congress, will pro-

tect the producer and the consumer by compelling the manufacturers to label their goods, stating exactly the amount of shoddy used.

BIT BY RATTIESNAKE

Ten-year-old Boy of Hartland is Victim of Reptile

The ten-year-old son of Mr. and Mrs. Wm. Love, living on the Dan Kane farm in Hartland, five miles southeast of Harvard, was bitten by a rattlesnake last Friday. The boy was in cornfield where there were weeds in considerable quantity when the snake, hidden in the weeds, suddenly appeared and inflicted a wound on the boy's leg near the knee. The snake just as suddenly disappeared after biting the boy, who was hurried to the Cottage hospital at Harvard, by his father for treatment. Save for severe and constant pain for several days thereafter, the boy appears to be recovering from the effects of the wound. Rattlesnakes are so uncommon that the appear-

ance of even one has aroused keen interest.

STATEMENT
Statement of the ownership, management, circulation, etc., required by the act of Congress of August 24, 1912.

Of The Republican published weekly at Genoa, Ill., for April 1920. State of Illinois) ss County of DeKalb)

Before me, a notary public, in and for the state and county aforesaid, personally appeared C. D. Schoonmaker, who, having been duly sworn according to law, deposes and says that he is owner of The Republican, and that the following is, to the best of his knowledge and belief, a true statement of the ownership and management of the aforesaid publication for the date shown above by the act of August 24, 1912, embodied in section 443, postal laws and regulations, printed on the reverse of this form, to-wit:

1. The name and address of the publisher, editor, managing editor and business manager is C. D. Schoonmaker, Genoa, Illinois.

2. That the owner is C. D. Schoonmaker, Genoa, Ill.

3. That the known bond holders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds are none.

C. D. Schoonmaker, Owner
Sworn to and subscribed before me this 6th day of October, 1920.
Olive Ferdon
Notary Public

What "Mark Twain" Means.
"Mark twain" is a river term used by the leadman in indicating soundings. "Mark twain" means that the water is about two fathoms deep. A story is told that while Samuel L. Clemens, whose nom de plume was Mark Twain, was a pilot he asked a friend who was taking soundings what pen name he should assume. Just then the friend called out "Mark twain," and Mr. Clemens took that name. He used it regularly in signing his stories while he was a reporter on the Virginia City Enterprise.

Determining Height of Mountains.
The height of mountains is ascertained by barometric observation, showing the pressure of atmosphere at the lower and higher levels. An instrument called the mountain barometer is graded especially for this purpose. It can also be done with a leveling instrument and theodolite, but either way requires technical knowledge.

Road Law Easy to Learn.

Highway Law is not hard to understand. It is universally recognized as the clearest expressed and the simplest system of law on our statute books. It speaks, not in terms of dead phrasing, but in simple, direct, forceful language. Any motorist who cares to do so can ascertain his legal rights and liabilities in his state in 15 minutes' reading, and he won't need an attorney to interpret it for him, either.—Chesia O. Sherlock in Motor.

Tea Blended to Suit Water.

Whenever a large town in the British Isles changes its source of water supply, a sample is taken by the tea blenders, in order that the right blend of tea may be made to suit that particular water.

Daysman an Arbitrator.

A daysman is an arbitrator, umpire or judge. The term is of Anglo-Saxon origin and is still used in the northern part of England to describe an unofficial judge or arbitrator to whom a matter in dispute is referred. The origin of the term is obscure.

Quite a Send-Off.

From an English paper: Rev. E. Thomas will preach his farewell sermon on Sunday next. The choir will render an anthem of joy and thanksgiving specially composed for the occasion.—Boston Transcript.

Value of Ton of Gold.

The mint value of gold does not vary, but remains constant at \$20.67183462 per troy ounce, or \$18,84151 avoirdupois. Basing a calculation upon this value, a ton of gold would be equivalent to \$602,923.

Iodine.

Iodine, the most important by-product of the nitrate industry, is extracted from the liquor which remains after the nitrate has been precipitated. Although some sodium iodate is contained in practically all caliche, iodine is produced by only a portion of the nitrate companies, and the output of these companies is carefully regulated by a producers' trust, in order that the limited market may not be overstocked.

Catarrah Cannot Be Cured

with LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarrah is a local disease, greatly influenced by constitutional conditions, and in order to cure it you must take an internal remedy. Hall's Catarrah Medicine is taken internally and acts thru the blood on the mucous surfaces of the system. Hall's Catarrah Medicine was prescribed by one of the best physicians in this country for years. It is composed of some of the best tonics known, combined with some of the best blood purifiers. The perfect combination of the ingredients in Hall's Catarrah Medicine is what produces such wonderful results in catarrah conditions. Send for testimonials free.

Ford
THE UNIVERSAL CAR

The Ford Sedan, with electric starting and lighting system, demountable rims with 3 1/2-inch tires all around, is the ideal family car because of its general utility and refined and comfortable equipment. Finely upholstered. Plate glass windows. An open car in the spring, summer, and early fall. A closed car in inclement weather and winter. Rain-proof, dust-proof. In the city or the country, a family car. The low cost of operation and maintenance is not the least of its charms. Won't you come in and look it over?

E. W. Lindgren

Nobody thinks anything now of going away on a trip

I THE railroads were partly responsible. But it wasn't until the automobile reached its present state of development that the old barriers against travel were finally broken down.

II More people own automobiles today than ever thought of owning a horse and buggy in the old days.

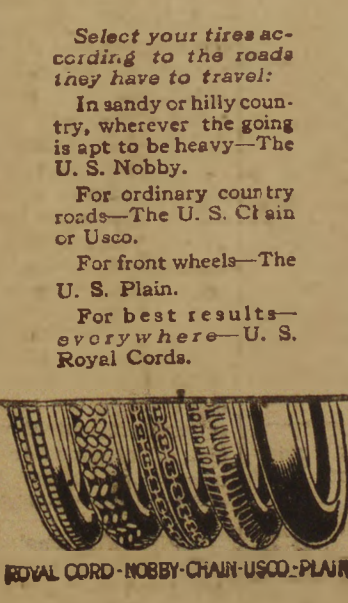

III That's because the cost of motoring has been brought within reach of the average citizen's pocketbook.

IV We look upon it as part of our job to keep it there. If it weren't for the trade of the man with the medium priced car there wouldn't be much in this tire business for us.

The less a man has to spend on motoring, the more important it is that his tires should be of first quality.

Any tire is not good enough for the small car owner. He wants a tire that will give him just as much for his money in the small size as the big car man gets for his money in the large size.

In thinking over what kind of tires we would represent in this community we tried to put ourselves in the place of the car owner. And we believe we hit it exactly when we selected U. S. Tires.

INSURANCE—Call on C. A. Brown, or Lorene Brown, Genoa, Ill., or insurance. Any kind, anywhere.

Age Of Used Cars Is Often Confused

Dealer Offers to Give Accurate Information, Even to People Who Buy From Competitors

An unusual service, in view of the fact that it is intended primarily for persons who do business with a competitor, has been announced by the Duval, Awe & Rudolph Garage, Dodge Brothers dealers in this city. The service is for the benefit of those who buy used Dodge Brothers motor cars on the open market and who are in doubt as to the age and condition of the car.

"Any man who buys a used Dodge Brothers motor car, if he brings it to us for inspection, can learn definitely when the car was built," said Mr. Duval of the above mentioned garage firm. "While we operate a used car market ourselves we will gladly give this information because we feel that a man who owns a Dodge Brothers car is a member of the family, regardless of whether he comes in through the front or back door, and we owe him certain definite courtesies."

"Owing to the fact that Dodge Brothers cars are not built in series of models and never have shown any material change in appearance, it is often very difficult to determine just how old the car is. Therefore it is easy to make gross misrepresentation to prospective purchasers. Many a man has been told he is buying a 1919 Dodge Brothers car when in reality the car was built three or four years earlier. Unscrupulous persons occasionally resort to this practice deliberately, but very often it is done through error as persons outside our own organization have no accurate way of deciding this important point."

"Dodge Brothers have supplied us with complete records of production, so that we are enabled, through certain numbers on the car, to tell just when it was built. Therefore it is apparent that nobody is ever deceived on this point when he buys from our used car market. It is also our policy to overhaul every car we take in before putting it back on the market. We insist on having used cars in good condition before they are sold. This not only makes satisfied customers, but it tends to maintain the good reputation of Dodge Brothers motor cars."

"It would pay the public to be more careful in buying used cars. People should insist on the accurate information they are entitled to when buying. They should, above all, know just whom they are doing business with and try to determine whether their future good will and satisfaction means anything to the person they are buying from or whether immediate profit is the sole object of the deal."

"Meanwhile we shall be glad to help along the cause of better used cars by giving purchasers the information that will enable them to tell whether they have been honestly dealt with."

Duval, Awe & Rudolph Garage
Genoa, Illinois

Children and Books.

It does the child no harm to make the acquaintance of books which were not written for children. In a home where the great books that have inspired or amused successive generations are accessible an active-minded child is likely at some time to get at them. If we want our children to fall in love with the better kind of books let us provide them with opportunities for meeting such books without too much formality.

True Standard of Manhood.

Man comes to himself only when he has found the best that is in him and has satisfied his heart with the highest achievement of which he is capable. That alone to him is the real measure of himself, the real standard of his manhood.—Grit.

First Fire Engine in America.

The first fire engine in America was presented to the town of Shelburne, Nova Scotia, by King George III in 1774.

USED TOBACCO AS INCENSE

American Indians Inhaled Fumes as They Burned the Fragrant "Weed" to Their Gods.

Smoking was a habit acquired by European nations from the Indians of America. In 1492 Columbus found them using tobacco, not as is now done, but as an incense burned in honor of their deity.

Tobacco smoking began as a religious rite. Tobacco was used by the Indians much as oriental nations made use of myrrh or frankincense in their religious observances. Voyagers to America after Columbus revealed different customs in the tobacco habit. It was discovered that in certain parts of the continent the natives inhaled the incense until they became exhilarated or even intoxicated by the fumes. This meant for them that they derived inspiration from the good pleasure of their deity. The honor paid to the deity came back upon them in exhilarating profusion.

From that step was not far to ascertain that incense offered to a god could be employed as a medicine. It was drawn into the mouth through a hollow tube—a kind of pipe—and then expelled as smoking. To the rationalizing European it was left to transmit the poor Indian's worship into an ordinary pleasurable habit.

GIVE STIMULATION TO GENIUS

Toxins Manufactured in Man's Own System Powerfully Affect the Associative Faculties.

Genius is a question of sensitization of protoplasm—it goes back to physical fact. And the foundation of the greatest cathedral of beauty ever erected by the mind of genius rests squarely upon the flesh of a man's body, writes Jeanette Marks in the Yale Review. Sensitized protoplasm vibrates in answer to outside impressions, with concentric waves of varying diameter. The stimulated, sensitized protoplasm sets the associative faculties to work, and the bigger this associative faculty, the bigger the genius. It is just here in the morbid stimulation of protoplasm that toxins, drugs, alcohol, enter in. Disorder reigns supreme, chaos, noise, nervousness, near-madness, through the stimulus of some toxins manufactured in a man's own system. Tea, coffee, drugs, alcohol, seem temporarily at least to put the mental furniture in order, to bring harmony where there has been disorder. Opium is not genius. Madness is not genius. But both would sometimes appear to have the power to act as umpire for genius where its right to go forward is in question. And it would seem that the purchasing power in dreams was even greater in insanity than with either alcohol or opium.

Cork Fabric.

Not so long ago we saw a description in a foreign paper of a fabric which was made from cork by a recently discovered, French process. It was said to be waterproof, a non-conductor of heat and unbreakable. By using a special machine, thin slices of cork are placed in chemical baths to remove the resinous parts which make cork more or less brittle. Upon the removal of the resin the sheets of cork become flexible and may be compared in that respect with leather. In fact the sheets may be folded and bent without breaking. By combining the cork sheets with any suitable cloth, preferably a thin and strong cloth of good color, an excellent waterproof material may be obtained. According to the description given an adhesive preparation is employed to glue the cork to the cloth; or if a stronger garment is desired, the cork sheets are placed between two layers of cloth.

Longest and Shortest Days.

The days generally known as the longest and shortest days of the year are the days which occur when the sun is farthest removed from the celestial equator. There are two such points in the ecliptic, one where it touches the tropic of Capricorn and the other where it touches the tropic of Cancer. The former is known as the summer solstice and the latter the winter solstice to those who inhabit the northern latitude and vice versa. The sun attains these two points on June 21 and December 21, which are commonly known as the longest and shortest days of the year.

Divers in Ancient History.

The earliest mention of diving is made by Homer, about 850 B. C., in the "Iliad," when Patroclus compares the fall of Hector's charioteer to a diver diving for oysters; and Thucydides tells of divers being used to remove submarine barriers placed with the object of impeding or injuring the Grecian fleet at the siege of Syracuse. These divers had no apparatus save a stone to carry them quickly to the bottom and to cling to for the brief period, about two minutes, they could stay below. This is called natural diving and is still in use for collecting sponges and pearls at Ceylon and in the Mediterranean.

Reindeer Good Travelers.

Surprising records have been made by Alaskan reindeer in long distance travel, and also in speed tests, says Carl J. Lomen in the National Geographic Magazine. Indeed, for short distances, the deer can outrun the dog or horse. At an annual reindeer fair in Alaska two deer pulling a sled and driver made five miles in 14 minutes 82 seconds, and ten miles in 27 minutes 20 seconds.

WE CONTEND

that all advertising in the Genoa Republican is read and will bring results if the advertiser will follow the few simple rules to which one must adhere in writing an advertisement. Tell the truth in straight, plain language, tell no more than truth and tell it in as few words as possible. If this were your space, Mr. Dealer, other people would be reading your announcement as you are reading this. You can tell 2,000 readers each week just what you have on your mind, and at a fair rate, thru the columns of

PREPAREDNESS NOW
MEANS LOWER PRICES ON YOUR COAL SUPPLY -
GLAD I BOUGHT MINE EARLY -
COLD WAVE COMING -
COAL PRICES ADVANCE

Have you thought about your next winter's coal? It is certainly a mighty big question. There is no two ways about it—there is not enough for everybody. At the present time only one-third of the normal production is being mined—it cannot be helped because cars cannot be had to carry the coal away from the fields.

Do you intend to be without fuel next winter.???

Bill has Small consolation for all his campaign effort, at least.

Fred E. Sterling, the successful Republican candidate for the nomination as lieutenant governor, is the party's one best bet. His record is unassailable and he owes no political debts.

Senator Harding is safe and secure in his candidacy. The Republican (Bill Thompson's paper) has come out for him. Do not blame the senator; he had no voice in the matter.

Every citizen should be a politician to the extent of exercising his franchise at the polls at every opportunity. It is undoubtedly true that many have become disgusted and actually feel like never going to the polls again. This is entirely the wrong attitude to take and the man or woman who thinks twice will not become a slacker as a citizen. The very man or woman who has given subjects of public policy and public officials sufficient study to become disgusted, is the very citizen who should express his views by word of mouth and at the ballot box. It is surely up to the individual thinkers to overcome the evils that exist today. The intelligent voter must overcome any lead gained by irresponsible spellbinders who by eloquence and absurd promises, sways the voter who is willing to give full credence to such utterances. When every thinking, intelligent citizen becomes a booster for the best and a voter at every opportunity, we will have no fear of the radical element, and the crooks and incompetent will soon be out of office.

GETTING TOGETHER

The Car Service Division of the American Railroad Association has published figures showing that the railroads of the United States during August handled a greater volume of freight traffic than ever before in that month, even in the war years of 1917 and 1918. As the grain moving season progresses, the demand for cars is increasing, and the pinch of car shortage cannot help manifest itself through the coming months.

The extent to which the railroads are regaining their efficiency as the congestion and other effects of the labor troubles which were acute in April are being overcome, is indicated in the large increases now shown in the statistics of revenue freight car loading, compiled by the Commission on Car Service. There is, throughout the entire railroad industry, a greatly improved situation. This is not only important to the railroads, but it is even more important as it reflects the welfare of the country.

The railroads are the most highly organized, or unionized, of any of the country's industries. The railroad brotherhoods have demonstrated time and again that they are able to protect the interests of railroad wage workers. Railroad managers have in recent years treated with the brotherhoods, and although there have been a lot of disagreements, each situation has smoothed itself out. But during last Spring the yard men of Chicago precipitated an "outlaw" railroad strike. This extended to other parts of the country, but the brotherhoods joined with the railroad managers in suppressing the revolutionists, and the "outlaws" were emphatically defeated. A similar situation has occurred in the strike of the Brooklyn Rapid Transit employees. In the latter instance, as in the situation with reference to railroad employees, a serious condition was brought on through a minority of the employees attempting to overturn the contracts made between the employers and the employees. The responsible labor element in unions throughout different industries are insisting that contracts made in their behalf shall be carried out. In order to enforce this rule they are themselves, ridding their membership of "outlaws" who do not recognize their moral responsibility in living up to their contracts.

The situation with reference to the coal industry emphasizes the conditions stated above with reference to other industries. All official circles in the National Capital are determined that the wage awards to coal miners cannot be repudiated, and it still remains to be seen whether the "outlaw" element will be strong enough to prevent the country from getting coal this winter.

Mother Otter's Job.

young otters—blind and downy born in a soft-lined nest under shelter of an inaccessible bank; the mother will at first hardly leave them, save on feverish rushes after the food necessary to keep up the supply of milk. To guard them she sleeps, like many a human mother, with at least one ear awake. When they open their eyes she cautiously carries them to bask for a while in the winter sunshine, for their birthdays are often in January. When they can clamber she teaches them the woodcrafts of the immediate vicinity of the "hover," and then communicates many of the valuable lessons she has learned, sometimes taking occasion to punish the unruly members of the family by biting them.

Saint Lucy.

Refreshing as a spring on a July noon, lovely as the song of the thrush at the close of a gaudy day, is the life-record of Saint Lucy. The dear girl, whose name, from the Latin (lux, lucis) means "light," was born in Syracuse in 304 A. D. Her startling beauty brought a mob of suitors at her feet. But she had vowed herself to the religious life and declined their addresses. A young nobleman, maddened with love for her, accused her to the governor as professing Christianity. In the fearful persecution under Diocletian she was martyred. She is represented in art as holding a platter with her two eyes upon it.—Chicago Journal.

Warned by Sandpaper Label.

A device for protecting people from taking doses from poison bottles by mistake is a sandpaper label. The ordinary label is pasted on a piece of sandpaper large enough to go all round the bottle, so that when anyone takes up the bottle in the night, no matter how dazed from sleep he may be, the rough, unfamiliar feel of the sandpaper rouses him and he recognizes at once that the bottle contains poison of some description. The printed label tells the kind of poison in the bottle.

Proved.

Mr. Murfee—Sure an' what's the matter with the goat this mornin'?

Mrs. Murfee—Sure, he eat up a pair of my old corsets.

"Didn't I tell you that corsets were unhealthy?"

"Father of the Automobile?"

This title was given to Gottlieb Daimler, who constructed the first gasoline engine automobile.

On Peruvian Railways.

The railways of central Peru spread out in a Y, at the right-hand end of which is Huancayo, something more than 200 miles from Lima. At every railroad station, old women crowd through the cars selling the favorite nectar of the Incas, all purchasers drinking from the same cup, and generally several from the same filling. Nearly every traveler has his own supply of a more potent native beverage.

Picture Lora.

To paste new paper on picture backing, cut the paper the proper size, float it in water till it is quite wet, apply the paste to the frame and, wiping off actual drops from the paper, press it in place. As the paper dries it shrinks, stretching smooth.

If you want to hang a small picture from an invisible wire and find difficulty in locating a beam in which to make it fast, run your eye along the mopboard till you see where that is nailed. Hang the picture in a line with that. Small pictures hung on wire nails with taut wire won't show the wire nor skew on their nails, if two nails are used to pass the wire over instead of one.

To prevent ugly dust lines on the paper behind pictures drive a small brass-headed tack in each lower corner of the frame to hold it out from the wall so air can circulate behind it.

Here's How to Do It.

When a cork slides down inside a bottle it is very difficult to get it out unless one has the necessary tools, and they are not always available. A good way to extract it is to grease the neck of the bottle with vaseline, then hold the bottle under cold water. When the bottle is as cold as possible, spear the cork with a hatpin, or even shake it until it blocks the neck of the bottle and sets straight with the neck. Then gradually heat the bottle or pour hot water over it and the expanding air will generally force the cork out with a slight pop.

Close to Perpetual Motion.

The nearest approach to perpetual motion was a clock constructed in 1774 by James Cox, a jeweler at Shoe Lane, London. This clock kept the scientific world guessing for years. The energy that made it run was derived from the changes in atmospheric pressure—a barometer was the sole motive power. Ferguson, the scientist, saw this clock; said it unquestionably would run until its parts wore out. The last heard of it, it had been sent as a gift to the Chinese emperor, from whom it later was stolen.

Armor for the Gopher.

"Golfers who fear snakes," says a traveler, "might try the 'tin armor' tactics resorted to by wanderers in the tropical swamp lands. It is the custom of some explorers to fasten a bright tin disk over their ankles. This gleaming spot attracts the reptiles, which invariably strike at it and nowhere else. The stroke is thus rendered harmless and leaves the snake in a position to receive a knockout blow at the intended victim's discretion.—London Chronicle.

Dentist's Memorial.

It is a far cry from the powdered hen-bone seeds, the incantations and pain, the gold rings and ox teeth of the forgotten past to the work of a modern dental surgeon, but like his predecessors in the profession, the modern operator leaves behind him his monument. It may be a cross of gold which he erects to his memory as a product of his mechanical skill, or maybe he has taught the children of the world the secrets of health or the esthetic value of a pleasing smile.—Exchange.

The Conflict

By LILY WANDEL

(© 1920, by McClure Newspaper Syndicate.)

Angola tiptoed softly upstairs to reach her room without meeting any of the family. She wanted to go to bed without talking; she wanted to think, but a soft thump, thump warned her that her mother was waiting for her as usual. As she switched on the light in her room Mrs. Lamonde appeared.

"It's awfully late, Angie," she admonished gently; "get right to bed, dear. Don't fuss around."

"All right," yawned Angola; "good night."

Mrs. Lamonde hesitated. "Did you have a nice time?" she asked, half-anxiously, half-disapprovingly.

"Nice time?" slipping out of her dress and raising her eyebrows. "It was very wonderful."

"I don't like it," murmured her mother almost wistfully.

"You mean that you do not understand it at all," corrected her daughter rather rudely.

"And your father doesn't like it either," warned her mother more energetically.

Angola yawned again as a gentle hint for her mother to leave, but Mrs. Lamonde sat down on the edge of the bed. "It's made an awful difference in you, Angola, and it troubles me. You don't seem to be one of us any more. Sort of up in the air, thinking about something else, on a higher level. I don't like my little girl that way." There was a pleading note in her voice.

Angola smiled in a very superior, pitying manner. "There's a special meeting Monday afternoon for matrons of the Nooscopic Society of Hypostases. Why don't you go? We had a most interesting talk tonight by a Mrs. Barry about 'Interwisdom of Pre-thought.'" It was so stimulating, Mr. Lawrence said.

Mrs. Lamonde gave her daughter a blank stare. "That Lawrence boy! He

Her Mind Felt Like a Great Ball of Wool Unraveled.

used to be such a sensible lad. I don't understand it at all."

"Well, why don't you go Monday afternoon and become enlightened?"

"It's my sewing afternoon for the hospital. And I wouldn't go anyway. You know, Angie, that Lawrence boy—"

Angola pointed to the little china clock. "I'm all ready for bed. Couldn't we discuss him some other time?"

Mrs. Lamonde flushed and hastily rose from the bed. "Good-night, daughter; I laid out your things for church tomorrow; everything's ready."

"Oh, I'm not going!" (her hand on the electric light switch).

"I'm afraid I must insist. Your father doesn't like it, this not going to church with the family. You haven't been for quite a number of Sundays."

"I do not feel the need of it, mother. You'll have to go without me."

"Speak to your father tomorrow morning, Angola," answered her mother. "You had better be dressed and ready to go."

Angola smiled in a cool, tolerant way. "Good-night," and turned off the light. She closed the door after her mother and slipped in bed, lay there with wide-open eyes, troubled. Her mind felt like a great ball of wool unraveled, knotted, in one terrible tangle. She did not know any more what she believed and what she did not, or what she understood. She was not sure about anything, except that she loved Will Lawrence. She was very positive about that. Everything else was a puzzle, very disturbing and wearying.

All evening she had listened to vague, mystifying explanations that seemed to run around in a circle, tie one completely up in endless windings of indefinite, incomprehensible reasonings. At least, that is the way it seemed to Angola. To be absolutely

frank with herself, she had to confess that she did not understand a word of it and that it made her feel very uncomfortable, disquieted and ignorant. She felt like some one gasping for fresh, pure air.

To give up the Nooscopic Society of Hypostases meant to lose Will Lawrence. And Angola would have joined the Society of Fools if it need be, just to be near Will. But now as she lay, troubled and worried, on her bed she realized that sooner or later he was going to find her out. Some day she would slip and make some foolish remark and then he would know that she was a little fraud.

Angola wept, for truly everything looked hopeless. She could not understand the teachings and principles of this wonderful society, and the very little that she could grasp made her miserable, upset all her own beliefs, swept out the nice little everyday feelings and comforting thoughts, and on the other hand, to give up Will would break her heart.

It was almost daybreak when, completely exhausted, her problem unsolved, Angola fell asleep. It seemed that she had just dozed off when somebody shook her gently. "It's after nine, Angie; hurry and get dressed."

Because the clothes were laid out conveniently Angola put them on, but she had decided very positively that she would not go to church.

A bright-eyed, Sunday-clad family greeted her at the breakfast table; they all seemed so rested, so thoroughly at peace; Angola envied them. One by one they finished eating and excused themselves to get ready for church. Angola toyed with her toast, quite unconcerned about the hatted and coated family.

"Come, Angie," bid her father pleasantly; "you'll be late."

"Oh, don't wait for me; I'm not going," she announced calmly.

Mr. Lamonde gave his daughter a swift keen look of disapproval. "Angola," and something in his voice made his daughter get up, "if you are well enough to be eating breakfast, I think you are able to come to church with us."

"Father, really, I'm no child. If I do not feel the need of attending service—"

Mr. Lamonde was not a very patient man; something in his daughter's manner irritated him. "Get your hat and coat, young lady," he commanded in none too gentle a tone, "and hurry!"

Very unwillingly Angola complied with his order. Sulkily she trotted along with the other members of the family, giving little, short, snappish answers when spoken to. Her parents attributed it to going to bed so late; they did not know of the misery in Angola's heart. They walked along in the peaceful Sabbath sunshine, a cheerful contentment on their faces, while Angola wrestled with torturing thoughts. She dreaded the long monotony of the service, the singing; it would only add to her unhappiness.

They entered the church. Coming from the bright sunshine, it seemed almost dark, a lovely soothing dimness that rested the eyes. It was cool, too, delightfully refreshing. Angola felt that as she sank wearily in the family pew, and the quietness, the solemn stillness, it fairly breathed peace into your heart. She closed her eyes and drank in the atmosphere of tranquility. There was nothing to understand, to reason out, just sweet peace, yours to take without asking.

The organ began to play softly, swelling gently to great inspiring efforts. Like a wonderful voice calling, urging, reassuring. Angola listened, strangely comforted. It swept the tangle of torturing thoughts away, brushed off all the disquieting, incomprehensible teachings. She yearned for the singing, to give thanks, for she was at peace.

When the benediction had been read and a soft rustle of a moving congregation filled the church, Angola turned, too, and looking in a pew a few yards away saw—Will Lawrence.

Near the doors where it was somewhat crowded Angola felt a hand gently press her gloved fingers. She looked into Will's eyes; neither spoke. It was not necessary; their understanding was perfect.

ROME HAD HOUSING PROBLEM

Conditions in Capital of the Great Empire Were at Least as Bad as Present Time.

Ancient Rome of twenty centuries ago had far more rent gougers than houses. Imperial Rome had 46,000 houses to rent and 1,794 private "palaces," says Allen W. Porterfield in the New York Evening Post. The upper "400" and big interests monopolized sites where sites were most needed. Caesar's co-triumvir, Marcus Licinius Crassus, had a habit of buying up dilapidated houses, wrecking them and selling the land at prices that make usury sound like charity. He had 500 slaves whom he utilized, and when he had no work for them himself he loaned them to others interested in the building business.

Rents were enormous. It was impossible to secure a flat for what now would mean \$400 a month. Sulla lived in a basement in order to live within his means. The subletter also came into existence and was accustomed to charge 33-1/3 per cent more for a house than he was charged. Martial, the great epigrammatist, was at one time obliged to climb 200 steps to his hall bedroom.

The Way of It.

"How has Mrs. Dubbs managed to cross the social chasm?"

"I think she does it with her bridg parties."

NEW POINTS IN AUTUMN MODES

THE handsome fur-trimmed suit shown in the accompanying picture includes, among other attractions, the newest points of the autumn styles. It begins by accepting the vogue for velours and continues to follow fashion's signposts by buttoning straight up the front from waistline to chin and by adopting the high, rolling collar of fur. Its narrow belt of velours crosses at the front and buttons at each side in the manner generally approved for coats—the styles of the hour are written in its lines.

But, with all this following of important phases of new modes, the designer of this suit succeeded in being original by cutting the coat and fur trimming on unusual lines. The bottom of the coat at the front and

back is cut in a wide scallop and the fur border is graduated in width—wide at the center of the scallop and narrowing toward the ends. Beaver is the fur employed on a light brown velours, but any of the short-haired furs might be used instead on colors they look best with, as sealskin on taupe or squirrel on royal blue.

The second suit in the group is adapted to any of the wool suitings and has a coat cut finger-tip length, with skirt gathered on to the body. A panel in the back, outlined with embroidery, embroidered bands at the front and a high fur collar bring it up to the level of suits for formal wear, and made in sturdy materials it will prove very dependable for all-round wear.

In the Realm of Neckwear

NECKWEAR is a broad term that embraces many different kinds of neckpieces and matched sets—including vestees and cuffs. Up to the present time nothing new or unusual has made its appearance in the realm of neckwear, but we may look for new developments soon, as the holidays dawn over the horizon of fashion. It is impossible to predict how important these particular accessories may become.

At present organdie, in white and light colors, or lace and net, continue to make the dainty collar and vestee or collar and cuff sets that enjoy an unabated popularity. These sets are displayed with the new suits and very often ecru or tan organdie replaces the pure white or light colors that have embellished summer clothes. Fillet lace and the perennial "val" still hold first place, although other laces are gaining attention. These neckpieces come up frocks and suits amazingly—it is not likely women will part with anything so becoming unless they can replace it with another they like as well.

Many sets are made at home, as the manufacturers have placed bandings of organdie which make the work easy, among the ready-made pieces. These bandings are tucked or lace trimmed and come in pale colors and white. One may buy also net with tucks, puffs, lace insertions and edgings which are easily made up into neckwear.

Trimmed With Drawn Work. Many of the volles and georgette blouses are trimmed with drawn work. Small beads and elaborate handwork are also being used.

A collar and vest of net and lace appear in the picture. The collar is a straight piece of the ready-prepared material and this gives it the proper adjustment on the neck—which is somewhat high at the back. The vestee is extended below the waistline and in this regard it differs from most vestees, but the little apron effect is pretty.

Julia Bottomly

Fall Hats Flamboyant.

The oriental continues to hold sway in the hat realm. No somber shades are shown. Leading colors are copper royal and Algerian blue, mahogany canary yellow. Gaudy embroideries in soutache, wool, tinsel, metallic threads and celluloid or wooden beads carry out the eastern effect. The Hindu and Chinese coole turbans are still much in evidence, as are the summer novelties made of wooden shavings dyed in gorgeous hues. The combination of the shavings with duvety of a contrasting color is very popular.

Trimmed With Drawn Work.

Many of the volles and georgette blouses are trimmed with drawn work. Small beads and elaborate handwork are also being used.

The KITCHEN CABINET

Every occupation lifts itself with the enlarging life of him who practices it. The occupation that will not do that no man really has a right to occupy himself about.

MORE CASSEROLE DISHES.

Veal hearts are most savory and when well cooked taste much like venison. Fry four slices of bacon to a crisp, remove from the frying pan and fry a small sliced onion in the hot fat. Trim and wash four veal hearts;

slice them, roll the pieces in flour and fry them in hot fat. Place the hearts in a heated casserole, add to the fat in the pan a cupful of water or stock, a minced pimento, a teaspoonful of salt and half a bay leaf. Pour the mixture over the hearts and cook two hours. Five minutes before serving add the slices of bacon.

Braised Calf's Liver.—Make small slits with a knife in the liver and insert minced onion and slices of bacon, using one onion and two ounces of bacon to two pounds of liver. Brown fat and flour, three tablespoonfuls each, add liver and roll until well seared in the fat and flour. Place in a hot casserole, add a sliced carrot, a bit of bay leaf, salt, one-half cupful of strained tomato, a cupful of hot water or stock and bake two and one-half hours.

Vegetables en Casserole.—Cut turnips, squash, or cauliflower into small pieces and cook in salted water until tender. Drain, place in a casserole with two minced green peppers, a tablespoonful of butter and one-half cupful of cream or rich milk. Bake in a moderate oven fifteen minutes. Then pour over a cream sauce, add a layer of buttered crumbs and cook uncovered until the crumbs are brown.

Kidney en Casserole.—Select sheep's kidneys, skin, dip into a mixture of minced parsley, onion and thyme. Add a tablespoonful of flour, cayenne and salt to taste. Add two tablespoonfuls of butter and cook in a casserole for thirty minutes. Remove, pour over a cupful of clear stock mixed with a tablespoonful each of flour and butter; cover with buttered crumbs and bake one hour. When ready to serve put several tablespoonfuls of cooked rice in the casserole around the kidneys with rolls of crisp bacon. Serve with toast.

"Oh for a new generation of day dreamers. They will not ask is life worth living—they will make it so. They will transform the sordid struggle for existence into glorious effort to become that which they have admired and loved."

WORTH WHILE GOOD THINGS.

Apples are fruit of which one never tires and they are usually in season in some form.

Spiced Apple.—Wipe, core and pare six large apples and arrange them in a baking dish. Mix sugar, a pinch of salt and cinnamon to taste to fill the cavities. Add water and bake until the apples are soft, basting often with the sirup in the dish. Remove to the oven and brown. Chill, serve with sugar and cream. For the meringue use the whites of two eggs, four tablespoonfuls of sugar and one-half teaspoonful of flavoring extract.

Scrambled Eggs With Corn.—Take one cupful of fresh grated corn, three eggs, one cupful of milk, one tablespoonful of finely minced green pepper, one tablespoonful of butter and one-half teaspoonful of salt. Put the corn, pepper and half the milk in a saucepan and cook five minutes. Beat the eggs and half a cupful of milk together, add to the corn and cook slowly, stirring constantly until set. Add butter, salt and serve on slices of buttered toast.

Deviled Oysters.—Take two dozen oysters, one cupful of cracker crumbs, one tablespoonful each of catsup and Worcestershire sauce, one small onion, one tablespoonful of butter, salt and pepper as required; saute the chopped onion in the butter, chop oysters fine and turn into the onion. Stew ten minutes, add three eggs and the other ingredients and stir until of the consistency of scrambled eggs.

Sauce Henriette.—Wash one-half cupful of butter and divide into three parts. Put one piece in a saucepan with the yolks of three eggs slightly beaten and mixed with one-half tablespoonful of lemon juice and one tablespoonful of water. Set the saucepan into a larger one of hot water, place over the fire and stir constantly until the butter is melted. Add a second piece of butter, and when melted the third piece, then add two tablespoonfuls of tomato puree, one of Worcestershire sauce, one-half tablespoonful of parsley, one-half teaspoonful of minced parsley, one-half teaspoonful of salt and a dash of cayenne. This sauce should be perfectly smooth and of the consistency of a boiled custard. To prepare the tomato puree cook a cupful of tomato until thick, reduce to three tablespoonfuls, then put through a sieve.

The Little Pool. I am too small for winds to mar My surface, but I hold a star.

SAVING SUGGESTIONS.

The outlook for the coming year is not at all promising in regard to lower prices for food, so the wise housewife is making saving, rather than spending, her social standard. We must be contented with simple food, simple pleasures and simple clothes. If we all pull together we may hope to help conditions. The consumer must help to see that the farmer gets reasonable prices for his products and he must endeavor to help the government to protect the consumer from the extortion of unscrupulous speculators. The great hue and cry of the people that the farmer is profiteering would cease if those who make it understood the real fact that the farmer is the poorest paid worker in this country; he averages 11 cents an hour. When the farmer strikes and refuses to sell or produce except for his own use we may appreciate something of the burden he has borne.

Food carefully served, nicely prepared and garnished is much more appealing than carelessly prepared food and thus there is less waste. Sauces, seasonings and various garnishes are important food adjuncts.

One need not be niggardly or parsimonious in serving food. The children should have plenty of plain food and a growing boy or girl needs as much as an adult. The following suggestions were given us during the war, but they are as necessary now with nearly everything higher in price than two years ago:

Pack eggs before the fall prices make such packing too expensive. The sterile egg keeps much better than the fertile. In some states the splendid custom of having a cockerel day and killing off all surplus stock is one to be recommended to every state in the Union. Eggs packed in one part of water-glass to ten parts of water will keep indefinitely. Boil the water, cool it, add the water-glass. Thirty or forty cents' worth will cover 24 dozen eggs.

Don't order more perishable foods than can be wisely used. Plan meals ahead to avoid waste and by ordering ahead it helps you, the butcher and the groceryman.

Think truly and thy thought Shall the world's famine feed; Speak truly and each word of thine Shall be a fruitful seed; Live truly and thy life shall be A great and noble creed.

INTERESTING SPICES AND CONDIMENTS.

Spices may be grouped into four classes: Those which are the bark of the parent plant; those which are its fruit or flowers, those which are its root stocks and those which are its seeds. Cinnamon and cassia are closely related. The bark of the cinnamon tree is usually stripped from the shoots when about two years old, which are fermented to make the stripping easier. Cassia buds are the undeveloped flowers of the cassia tree. The crop of both cinnamon and cassia are harvested from May to November. Because of the warm cordial effect of cinnamon, tea made from it is used for colic and nausea.

Chicken fat is a most tasty fat; every spoonful should be saved.

The vanilla bean is contained in the pod or fruit of one of the orchids, a vine with spikes of large fragrant flowers. This plant is native to Mexico, South America and Asia. The flavor is so generally liked that the demand far exceeds the supply and other flavors similar to vanilla are used, as it is becoming more and more scarce.

In China the Canton ginger is famous for confections and flavoring, and is a great favorite in this country. It comes in small jars or packed in boxes as crystallized fruit.

The active principle of horseradish, its volatile oil, is identical with its near relative, mustard. Horseradish while popularly considered merely a condiment, is used medicinally. It is so beneficial and stimulating to the digestive organs that it is often prescribed as a tonic to create appetite when a general run-down condition prevails. It is considered an excellent blood purifier and good for the kidneys. Mixed with honey it is a most efficacious cough remedy.

Ginger and horseradish are the chief representatives of the root stock type. These roots are known and grown in both hemispheres. The American colonies inherited the old Dutch and English uses of both for seasoning meats, pickles and the ginger root in preserves, sweetmeats, cakes and for medicinal uses.

What Would You Do?

FACED by the necessity of providing for yourself, what would—what COULD—you do? Hundreds of women enter uncongenial, ill-paid employment because they lack either experience or capital.

Neither is necessary to succeed under the liberal-profit-sharing plan through which Franco-American toilet requisites, preferred by particular women for more than thirty years, can be sold to your neighbors and personal friends.

Your Chance!

If you long for independence and are willing to devote energy and enthusiasm to the work, write at once for full details concerning our "Retailer's Plan." If not already represented in your community we can offer you a generously paid position in which any woman may win success.

The Franco-American Special Combination Treatment Box, for either dry, normal or oily skins. Most popular and effective of toilet treatments.

Law Should Protect Alaskan Big Game Against Pot Hunters and Wolves.

By DR. W. T. HORNADAY, New York Zoological Gardens.

It is perfectly clear that there are today several conditions in the game situation that stand in need of radical improvement. I think that those conditions and improvements may be listed, in the order of their importance, as follows:

There should now be a complete stoppage of the sale of game.

There now is necessary a legal system for the more thorough utilization of game and less waste of game.

There should be created a system of regulated hunting by proxy, by which persons living in remote regions, and who positively require some wild meat in order to live in good health, may procure their rightful annual proportion of game.

There should now be a stoppage of all wasteful game-killing, and especially of cow moose, by Indians; and the killing of game by Indians and Eskimo should be strictly regulated.

The destruction of game by wolves should be checked by a relentless war of extermination on the latter. The proper utilization of poison should be provided for by regulation.

It being the bounden duty of the federal government and the territory of Alaska jointly to protect the game of Alaska, an adequate establishment of a game commissioner and a larger force of game wardens now has become necessary. There should be a paid deputy game warden in every settlement large enough to have a postoffice.

The territory of Alaska should be empowered to charge a license fee, to both resident and non-resident hunters, and apply the proceeds thereof to the cost of game protection to the territory.

The federal government should retain its authority to close any area to hunting whenever the decrease of game therein seems to threaten the local extinction of a valuable species.

National League of Women Voters Has Opportunity and Responsibility.

By MRS. CARRIE CHAPMAN CATT, Suffrage Leader.

What are the women going to do with the vote? Are they going to draw back their skirts in disdain from all interest in politics on the ground that it is corrupt, or are they going to be of those who will help swell America's army of voters who put conscience and thought into the scales with party politics and party candidates?

The women are ready for the work before them, but the National League of Women Voters, with state branches formed from the old suffrage organizations, is being perfected to help them find their way through the maze of these besetting questions.

The league is not partisan, but pan-partisan, all partisan. A woman can be a member of it and yet be a member of any political party she may choose.

It is through the political parties that we must work. They furnish us with the machinery through which we are enabled to reach the public, keep the public informed, through which public consciousness is created. Neither state or nation should temporize with the problems of government before them.

The victory means opportunity for more work and added responsibility for women in national service.

"Tasks in Hours of Vision Willed, May Be in Hours of Gloom Fulfilled."

By LYNN HAROLD HOUGH, Retiring Pres't Northwestern University.

"The tasks in hours of vision willed May be in hours of gloom fulfilled."

So declared a thoughtful poet. As a matter of fact, the flash of inspiration never brings enough carrying power to sustain a man through the long drudgery of keeping at a difficult task to its triumphant completion. Some people are all the while having inspirations which they never bring to the test of steady and persistent action. They keep beginning things. They never finish anything.

"Well begun" may be "half done," but it is not entirely done, and so these people are the victims of their own varied enthusiasms. An emotion is a good thing with which to start.

But for a hard task you have to get down to the will. And the will can keep us at work in dull hours and gloomy hours and weary hours. The will can hold us to the task until the long tug is over and the work is brought to an effective conclusion. "I'll bend my moods by the strength of my purposes," said a wise man. He knew one of the great secrets of success.

"England Is Our Nearest Relative In This Many-Peopled World."

By OWEN WISTER, in "A Straight Deal."

In this many-peopled world England is our nearest relation. From Bonaparte to the kaiser, never has she allowed any outsider to harm us. We are her cub. She has often clawed us, and we have often clawed her in return. This will probably go on . . .

I have not sought to persuade the reader that Great Britain is a charitable institution. What nation is, or could be, given the nature of man? Her good treatment of us has been to her own interest. She is wise, far-seeing, less of an opportunist in her statesmanship than any other nation. She has seen clearly and ever more clearly that our good-will was to her advantage. And beneath her wisdom, at the bottom of all, is her sense of our kinship through liberty defined and assured by law.

If we were so far-seeing as she is, we also should know that her good-will is equally important to us, not alone for material reasons, or for the sake of safety, but also for those few deep, ultimate ideals of law, liberty, life, manhood and womanhood which we share with her, which we got from her, because she is our nearest relation in this many-peopled world.

USE LESS SUGAR FOR GOOD JELLY

Canning Experts of United States Department of Agriculture Give Suggestions.

PROPER QUANTITY OF JUICE

Among Other Materials Which Can Be Used for Sweetening Are Honey, Maple Sirup, Corn Sugar, Molasses and Other Sirups.

A good jelly should be bright, clear, and of an attractive color. When removed from the glass it should retain the shape of the mold. Jelly of the right consistency can be cut with a distinct cleavage, retaining the angles where cut. It should sparkle and be tender enough to quiver without breaking.

Wash the fruits, remove stems, and cut large fruits into pieces. With berries, grapes, and currants add one cupful of water for each pound of fruit. For apples, quinces, and other hard fruits add three cupfuls of water to each pound of sliced fruit. Cook until tender. Fruit juices flow more freely when heated.

As soon as the fruit is tender it should be put into a jelly bag and allowed to drip. If the fruit is overcooked, a cloudy jelly is apt to result.

Can Be Made With Less Sugar.

Good jellies can be made with much less sugar than many housekeepers thought possible a few years ago. Some persons like these products made with less sugar better than the old-fashioned kinds that were sometimes so sweet that the flavor of the fruit was spoiled. Canning experts of the United States department of agriculture give the following suggestions for using sugar economically:

Reduce the amount of sugar ordinarily used by one-fifth or one-fourth—that is, use four-fifths, or three-fourths cupful of sugar instead of the whole cup called for in the recipe. In the case of non-acid fruits

Remove Jelly From Stove When It Will "Sheet Off" From Spoon.

particularly, the absence of sugar will be less noticeable if one-fourth teaspoonful of salt is added for each cupful of fruit juice. The salty taste will disappear after the product has stood for a few weeks, but the favor will be richer than if the salt were not used.

Another way to save sugar is to substitute for part of the granulated sugar called for in the recipe, honey, maple sirup, corn sugar, molasses, the new malt sirups, which are superior to those formerly on the market, or one of the other sirups sold under various trade names. Some of these sweeteners have a distinctive flavor, and at first it may be best to use those only with fruits that have a pronounced flavor of their own, such as grapes, cranberries, plums, currants, and loganberries.

Quantity of Juice for Jelly.

About two quarts of juice boiled rapidly in a shallow pan gives a jelly with better color and consistency. When the proportion of sugar to juice has been determined, measure the fruit juice and place over the fire to cook. When the juice begins to boil add the sugar immediately and stir until the sugar is dissolved. When the sugar is dissolved cook the juice as rapidly as possible. Long, slow cooking tends to darken the product and to destroy the pectin, which will cause the jelly to be less firm.

A good means of determining when the cooking is finished is to test the juice with a spoon or paddle. Dip the spoon in the boiling sirup, remove, cool by moving it back and forth for a few seconds, and then allow the jelly to drip from it. As long as there is sirup present, it will run from the spoon. When the jelly point is reached, it will break from the spoon in flakes or sheets. Remove from the fire immediately and skim. Skimming at this time saves waste. After skimming pour at once into hot, sealed glasses and set aside to cool. Cool as rapidly as possible.

For Cleaning a Basin.

To clean a basin or bathtub put a little coarse salt into the dampened tub or basin, and then rub it over lightly with a cloth dipped in turpentine.

CONDITION OF FEET OF BIG IMPORTANCE

"Well-Fitting Shoes Are of First Consideration.

Hose Should Be Long Enough to Give Toes Free Play and Not Bothered by Uneven Darns—Put Plaster on Tender Spot.

(By United States Public Health Service.) The pleasures of walking or standing depends to a large extent on the condition of the feet.

The importance of well-fitting shoes cannot be over-estimated. The shoes should have heavy soles, moderate heels, and be neither tight nor loose. A laced shoe is best under ordinary circumstances, but in certain occupations where changes may have to be made quickly, a congress garter meets conditions best.

New and stiff shoes are almost sure to be very uncomfortable; shoes should be worn sufficiently beforehand so that they will adapt themselves to the shape of the wearer's feet and be comfortable.

All hose should be long enough to give the toes free play. Great care should be taken to have all darns smooth.

After the day's work the feet should be carefully washed and dried. After the hose so as to have them dry when they are to be put on again. The shoes should be placed so that they can be well dried out before replacing on the feet.

If the feet are swollen or hot, or tend to be sensitive (tender), wash them in salt water or rub with medicated alcohol and dry before putting on hose. Dust with talcum powder and put some of the powder on the hose and into the shoes.

A change of hose and shoes—by having two pair—alternating daily, is very comfortable as much standing or walking has to be done.

Cover tender spots with surgeon's "zo" plaster, applied directly, if walking must be continued and it is inconvenient to change hose or shoes.

Blisters are best treated by washing the feet thoroughly in hot water, then taking a clean needle and pricking through the skin—not directly into the blister—and gently pressing out fluid till blister is flat.

To toughen and harden the feet soak them for some time in a dish containing cold tannic acid solution—a tablespoonful of acid to two quarts of water. A solution of medicated alcohol and salt answers the same purpose.

MANNER OF HOUSE CLEANING

Many of Old Methods Are Wrong in Principle and Faulty in Practice—Some Good Hints.

Many of the common time-honored methods of house cleaning are wrong in principle and faulty in practice. Dry sweeping and dusting is often worse than useless. Scrubbing with soap and water, wiping with damp cloths, and thorough prolonged airings are of decided value. Vacuum cleaners are very useful but their use is not within reach of everybody.

In dusting, a damp rag should be used, subsequently washing the rag out in warm soap suds. Some surfaces such as walls, furniture, metal beds, doors and other wood work may advantageously be wiped off with a rag moistened with turpentine, kerosene, or paraffine oil.

Nothing can approach sunlight combined with airing for a simple efficacious disinfectant. It is, therefore, a good plan to place clothing, blankets, rugs, draperies and similar goods in the open air in the sun light, beating and brushing out the dust before returning them to their place in the house.

A can of paint for use in the kitchen and other places where the woodwork and walls are much subject to wear, and perhaps a coat of white wash in the cellar will go a long way to give the finishing touches to the house cleaning. Clean-up and paint-up is a very useful slogan.

DON'T USE CANNING POWDERS

Their Excessive Use May Be Attended With Serious Effects—No Good Reason for Risk.

In some communities there is a wide-spread use of canning powder. Both boric and salicylic acid are sought from druggists for this purpose. Large quantities of these acids are also sold at a high price under fanciful canning compound names.

The United States department of agriculture warns against the use of any preserving powder or canning compound. Their use may be attended with serious effects upon digestion and health. It is entirely practicable to "put up" fruits and vegetables so that they will keep indefinitely by processing the products with heat. There is no reason for taking the risk of using canning powders.

HOUSEHOLD HINTS

Aluminum pots, pans or other utensils should never be washed in water containing sal-soda.

If you wish to dry clothes in a hurry when it is raining, hang them in the house and turn on the electric fan.

EFFICIENCY OF FARMER VARIES

Some Are Able to Detect and Eliminate the Low-Paying or Losing Enterprises.

OTHERS SHOULD MAKE MORE

Information Obtained in Keeping Records Is Valuable in Assisting Farmer to Secure a Balanced Business for Next Year.

Farmers, just like other business men, vary widely in the degree of efficiency displayed in running their business. Some are able to analyze the farm business and thus to detect and eliminate the low-paying or losing enterprises. Others, lacking the knowledge of how to make a systematic analysis of the business as a whole, know that their profits are not what they ought to be, without knowing how to go about it to increase them. They may be able to find and correct the obvious errors in the small-sized farm business, but in handling a business of considerable size they often fail to spot the enterprises that are losing money for them. Such men may or may not make money, but at best they fall short of making as much as they might. A farmer may be making a large net profit on his potatoes and losing it all by keeping low-producing cows. Similarly a man may be making money on his cows and losing part of the profit on another enterprise. Hence the paramount importance of records to the farmer.

Farm Returns Studied.

Careful studies made upon a large number of farms enable the office of farm management of the United States department of agriculture to make some interesting statements in this regard. For instance, they find that only 10 per cent—usually less—of the farms studied are managed so as to secure better-than-average returns from all four factors—size of business, yield of crops, live stock, and labor—while from 20 to 30 per cent of the farms considered have only one factor better than the average. It must be understood that no one of these factors will determine success.

The figures given which relate to the labor income will prove most interesting to farm employers. The analysis has reduced the labor cost of farm work to figures. An acre of hay, on an average farm, costs the labor of one man and one horse for a ten-hour day to cut, cure, and harvest it; oats, wheat, and barley, one and a half days of man labor and three of horse;

Without Keeping Records the Farmer Cannot Tell How Much He Is Making and on What Crops.

corn for the silo, three man days and five and a half days for a horse; onions, sold in bunches, require about 93 days of man work to only ten for the horse; dairy cows take 180 days of man time every year and two days of horse time—so on through a list that includes about every item of farm effort. This information is valuable both in securing a balanced business and in assisting the farmer to estimate his labor needs for the coming year. It is contained in a new publication of the department of agriculture, bulletin 1139, "A Method of Analyzing the Farm Business."

Advice of Experts Available.

With the bulletin go blank forms for the purpose of preparing the analysis. Upon these blanks the farmer can inventory his business and then, if he feels unqualified to abide by his own judgment upon the results shown, he may secure the advice of experts by submitting the data gathered to his county agent, or to his state agricultural college, or he may send it directly to the department of agriculture to have the analysis made.

MARKET FOR SURPLUS TRUCK

Fruit and Vegetables Otherwise Wasted Can Be Sold in Small Quantities by Using Motor.

The motor truck express routes in many localities make it possible for the farmer to market his surplus fruit and vegetables in small quantities that would otherwise be wasted. When there is more than enough for canning purposes this method should not be overlooked.

FARM WOODLAND CAN BE MADE PROFITABLE

Erroneous for Farmers to Saw Up Choice Timber.

Many Valuable Logs Go Into Cross Ties When They Would Bring Much More Money if Sold as Saw Logs—Other Hints.

It is a mistake to saw up choice logs of white oak, ash, cherry and yellow poplar for rough uses at home or to use clear black walnut for gate boards or split up white oak butts for fence posts. This fact is emphasized in many ways in a new publication, "Forestry and the Farm Income," issued by the forest service, United States department of agriculture. Farmers are told that many valuable logs go into cross ties when they would bring the owner much more if sold as saw logs. Likewise, large numbers of rapid growing trees are cut which produce only one small tie, whereas, if left to grow for from three to five years, they would yield more than double the profit. To avoid making

Farmers Should Familiarize Themselves With Uses for Which Timber Is Adapted.

such mistakes, owners of farm woodland should familiarize themselves with the uses for which each kind of timber is best adapted.

Timber that is cut in the late spring and summer months should be handled with special care to avoid injury, because freshly cut wood is then more likely to be attacked by insects and fungi than during the colder months. Seasoning proceeds more rapidly during the warmer season and may cause excessive checking, which is not beneficial to the timber. If rightly handled, posts, poles and logs may be cut at any season without their durability being affected. In no case should wood be allowed to lie in direct contact with the ground. The opportunity for insect attack and decay can be reduced to a minimum by peeling the timbers and open-piling them off the ground in a shaded but dry place. This, however, does not retard checking of the wood.

Logs are sometimes stored under water, in the hot season, to prevent blue stain, checking, insect attack, and decay. Painting the ends of logs with a yellow ochre or barn paint will very materially retard injury by end checking. Painting peeled timbers with creosote will prevent sap stain and decay.

NEW SEEDINGS FOR PASTURE

Sheep Better Suited for Grazing Than Horses or Cattle—Rye Favored for Fall Pasture.

New seedings of clover and timothy should be pastured lightly. Sheep are better suited for this purpose than horses and cattle, but care must be used to prevent them grazing the new meadows too closely. Stalk fields, from which the corn and stover have been removed, furnish considerable feed in the form of grasses, weeds and an occasional stalk and ear of corn. It is well to allow the stock to clean up this feed that would otherwise go to waste. In order to provide more good fall grazing it is a good plan to sow rye at the last working of the corn crop.

BETTER BREEDING MEANS BIGGER BIRDS

Following are average weights of Barred Plymouth Rock grades of the first, second and third generations, government poultry farm, Beltsville, Md.:

	Gains
Breeding of Poultry—Lbs. Lbs.	
Original mongrels	4.40
First generation, Barred	5.63
Second generation, Barred	6.22
Third generation, Barred	6.49
Weights were taken about	
March 1 each year.	

POISON FOR CABBAGE WORMS

Insect Powder Mixed With Flour Will Be Found Satisfactory—Harmless to Humans.

Insect powder mixed with three or four times its bulk of flour and left overnight in a tight container is an effective poison for the common cabbage worm. It is harmless to persons. Apply when the dew is on, using a sifting top can or a powder blower.

I SUFFERED THREE YEARS

Finally was Restored to Health by Lydia E. Pinkham's Vegetable Compound.

Lowell, Mass.—"I was all run down and had an awful pain in my right side, was persistently constipated and had very bad nervous prostration. I suffered for three years and was perfectly miserable until a friend was telling me to try Lydia E. Pinkham's Vegetable Compound and I found it a wonderful medicine. I can now do twice as much work and I recommend the Vegetable Compound to other women. You can use these facts as a testimony."—Mrs. M. THEALL BESSEY, 188 Appleton Street, Lowell, Mass.

Why women will continue to suffer so long is more than we can understand, when they can find health in Lydia E. Pinkham's Vegetable Compound.

For forty years it has been the standard remedy for female ills, and has restored the health of thousands of women who have been troubled with such ailments as displacements, inflammation, ulceration, irregularities, etc.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

Bad Stomach Sends Her to Bed for 10 Months

Eatonio Gets Her Up!

"Over a year ago," says Mrs. Dora Williams, "I took to bed and for 10 months did not think I would live. Eatonio helped me so much I am now up and able to work. I recommend it highly for stomach trouble."

Eatonio helps people to get well by taking up and carrying out the excess acidity and gases that put the stomach out of order. If you have indigestion, sourness, heartburn, belching, food repeating, or other stomach distress, take an Eatonio after each meal. Big box costs only a trifle with your druggist's guarantee.

HOXSIE'S CROUP REMEDY

Saves life, suffering and money. No opium. No nausea. Sure, swift and safe. 50 cents.

FRECKLES

POSITIVELY REMOVED. Dr. Barry's Freckle Cream. 25c. Sold by Druggists.

For sale—Small Block Ky. Oil Stock paying div. Large daily production. On pipe line. Bright future. Management the best. Price \$1.00 per share, cash with order. W. A. Pollard, Leases-Stocks, Bowling Green, Ky.

WANTED—Energetic men and women to distribute samples and take orders for the biggest selling household necessity on market. \$5 to \$10 a day sure. The Dobbyn Mfg. Co., 1138 Wrightwood Ave., Chicago, Ill.

Save Time.

"A man ought not to kiss and tell." "Still, some summer girls don't mind if you tell a few other nice fellows who are coming down."

Why That Lame Back?

Morning lameness, sharp twinges when bending and an all day back-ache; each is cause enough to suspect kidney complaint. If you feel tired all the time and are annoyed by dizzy spells, headaches and irregular kidney action, you have additional proof and should act quickly to prevent more serious kidney trouble. Use Doan's Kidney Pills, the remedy that is recommended everywhere by grateful users. Ask your neighbor!

An Illinois Case

Peter Seeger, painter, 120 Eleventh St., Streator, Ill., says: "A hard cold settled in my joints and back. My back ached so it was hard to get around to do my work. My muscles were contracted and hurt every move I made. I took about two boxes of Doan's Kidney Pills and they completely cured me."

Mrs. H. F. Branch and daughter, Esther, returned home Friday from a visit in Michigan.

Mrs. Edith Bell and two children spent the week-end with the former's brother, Ray Helsdon and family in Bensonville.

Mrs. C. A. Myers returned home Sunday from a visit with relatives and friends in Cortland, Sycamore and DeKalb.

Mrs. Frank Wilson was shopping in Rockford Wednesday.

Never Change.
Some men are like phonographs—every day they roll off exactly the same records.—Boston Transcript.

can you keep sweet at home?

Our religion is measured by the way we act at home. Our families usually know us as we really are. Away from home some of us put on company manners.

Does your religion help you bear with a smile the monotony, the pain and the struggle of every day life?

We can be religious without church attendance, but without the church religion would not long persist, and the church will die unless believers attend its services. The church merits your earnest support. Can we count on you? We need your help.

Come Sunday and Every Sunday

Wm. Japp and family spent Sunday at the H. Robinson home in Plato.

Aviation and the Compass.
Many aviators firmly believe that there are magnetic currents or disturbances in the upper air which affect the compass and make it "go crazy." Long experiments and careful investigation, however, seem to prove conclusively that it is not the compass, but the plane which moves distractedly, in the first place, and that the apparent insanity of the compass is due to these movements and the vertical magnetic component of the governing force. The maddest of compasses, the most contradictory and insane of cards, will steady down to a quiet behavior once the plane is on a straight, level course for a period of time greater than the period of the compass.

How Needles Are Made.
It was not until after 1885 that needles were entirely made and finished by machinery. The present-day process of making needles may be described as follows: The first operation is to cut the needle wire into eight-foot lengths; this is done by winding it into a coil of sixteen feet circumference and then cutting this coil into exact halves with powerful cutting shears. The coiling of the wire is so managed that there are 100 pieces in each half when cut.

A Backhander.
(Caller on being shown photograph)—So that is your husband, is it? I know he must be good looking—your children are so pretty.—Boston Transcript.

Sculpture of Poe.
Olaf Mjorkman, American Scandinavian sculptor, has created an impressionistic sculpture of Edgar Allan Poe, with the raven hovering over the head of the great American poet. It is considered one of the most remarkable conceptions of the subject.—Argonaut.

High School Notes

Earle Russell, Editor

The historic man with the big stick again made his very unexpected appearance in the High School on Friday, October 1. Although Mr. MacKenzie's remark was of a very innocent nature, Myrtle recognized the historical character and was immediately thrown into a state of convulsive and hysterical laughter which lasted for some minutes. She made a rapid recovery and it is believed that affairs will again run smoothly if the matter is not further mentioned. At least we hope for the best.

Mr. MacKenzie thought that mirth was caused over the fact pertaining to the Puritan discipline during church.

Franz Kraus has been appointed official recorder of the number of flies caught during this season. He has reported 903,564,201,987,241 flies caught since the installation of the new fly trap. We hope to double this number by the first of January. However, we believe this to be a fairly good start.

Telephone rings: Mr. Moore, "Donald, please answer that call." Donald, "Hello, Oh you want to speak to Mr. Mackenzie?" "Well I think he is in jail, you had better call there."

A number of the High School students attended the Ney Fair last week and reported it to have been a great success as far as the Agriculture class was concerned and it was rumored that Gus had received highest award for corn. However we believe that it was Gus that "took the cake."

Ill-Flated Orchid Hunters.
Not very long ago a New York man, traversing a Venezuelan forest on an exploring expedition, came upon a hut wherein were found three human skeletons and thousands of dead orchid plants. From between the ribs of one of the skeletons grew an orchid of rare beauty. The three unfortunates had evidently been murdered.

No Kentucky Silver Mines.

The Bureau of mines states that there are no silver mines in Kentucky. There is an old legend which prevails throughout the country regarding lost silver mines in that state, but there is no foundation for it.

And the Audience Smiled.

A well-known statistician was giving some statements about a certain industry at a public dinner. "These are not my figures, ladies and gentlemen," he said. "They are the figures of a man who knows what he is talking about."

SULPHATED

If your battery is acting queer—if it won't hold its charge etc.,—come to us NOW.

Maybe a separator is broken or the sediment in the bottom has caused sulphation.

In either case, or if the trouble is from any other cause our GENUINELY EFFICIENT BATTERY SERVICE will remedy the trouble at the least cost and inconvenience to you.

EXPERT BATTERY SERVICE in all its branches.

Let us serve you.

B & G GARAGE

Genoa

Illinois

We have just received a large carton of **BORDEAUX**
