

ENTERED AS SECOND-CLASS MATTER, SEPTEMBER 16, 1904, AT THE POSTOFFICE AT GENOA, ILLINOIS, UNDER THE ACT OF CONGRESS OF MARCH 3, 1879

GENOA, ILLINOIS, MAY 28 1920

VOLUME XV, No. 31

WHAT WAS NEWS IN THE YEAR 1895

Weather During Past Week has not Been Good for Corn

THE TOWN PUMP AND THE DEAD

Dead Rats and Frogs Taken from Well—"Our Hutch" Visits Marengo

Work on the Taylor building commenced this week.

The weather the fore part of the week has not been very healthy for corn and if it continues the corn will have to be replanted.

Lorin Olmstead and Clay Patterson returned Tuesday from a several week's stay in New Jersey.

There is talk of telephone connection between Sycamore and Belvidere, via Genoa and Kingston.

Those who have been using the water from the town pump will be pleased to learn that several dead rats, frogs, etc., have been taken from the well, and the well otherwise cleaned.

The shoe factory employees are now paid off by check, getting them cashed at the Exchange bank.

G. H. Hunt, prescription clerk for H. H. Slater, moved his family here from Kingston this week.

The Marengo Republican speaks thusly of "Our Hutch": "H. A. Kellogg, the irrepresible business hustler and only 'Hutch' of Genoa was in town Tuesday drumming up trade."

The eleventh annual meeting of the high school alumni will be held next week at the home of Edwin Stott.

EIGHTY THOUSAND

Membership of Agricultural Association Still Growing

The total membership of the Illinois Agricultural Association is now 80,165, divided among the counties as follows:

Table listing membership counts for various counties including Adams, Bond, Boone, Bureau, Cass, etc.

HIGH SCHOOL CONFERENCE

Genoa Will Not be Represented This Year

The annual spring meeting of the Northern Illinois high school conference will take place at the DeKalb township high school on Friday and Saturday, May 28 and 29.

The meeting will be of wide scope, the various competitions including athletic, extempore speaking, reading, stenography and typewriting.

The athletic events are 50-yard dash, 100-yard dash, 200-yard dash, 440 dash, 120-yard high hurdles, 200-yard low hurdles, 880-yard run, mile run, discus throw, 12 pound shot put, running broad jump, running high jump, pole vault, relay race and javelin throw.

Some Whispering!

According to an ancient Irish superstition, a vicious horse could be tamed by whispering the creed in its right ear Fridays and in its left ear on Wednesdays till it was cured, which was merely a matter of time, unless it had been born at Whiteside, in which case it was incurable.

Ever Notice It?

A headline runs: "Why Don't Bachelors Marry?" That's so. Why don't they? Come to think, who have never yet seen a bachelor who was married. It's remarkable!—Boston Transcript.

A FINANCIAL STATEMENT

Report of the Genoa Community Club for Year Just Closed

Following is a financial statement of the Genoa Community Club, showing the expenses and deposits for the fiscal year ending May, 1920.

Financial statement table with columns for Expenses (Lyceum, Club Bulletin, etc.) and Deposits (Balance on hand, Lyceum, etc.).

Total Expenses \$468.20, Total Deposits \$566.77, Amount on hand May 1920 \$98.57

CONVICTED IN SYCAMORE

Negro Who Escaped from Joliet and Was Electrocutted

William Jackson, negro, one of nine convicts, who escaped from Joliet, and who was electrocuted while fleeing along the track of the third rail line near Wheaton, in a rainstorm on Monday night, was convicted of burglary and larceny at Sycamore in June, 1917, and sent to the Joliet penitentiary.

Jackson, who was convicted three years ago of robbing a Milwaukee car at Kirkland, tried to cut his way out of the jail in Sycamore with a saw and knife, but was caught in the attempt by Sheriff Scott and placed in another cell. He was the cause of much trouble to the sheriff while he was in jail.

Jackson was what the police term a "hard boiled coon." He came originally from Oklahoma and had done time in the penitentiary of that state. He was also in the Texas prison and was in the state's prison at Pittsburg on a charge of breaking into Baltimore & Ohio cars. While he was in the pen at Pittsburg he made his escape by scaling a 30-foot wall in a hair-raising feat that would have done credit to a movie thriller.

THAT'S JUST IT

Gives up Job that Required Training To Labor

George B. Smith, janitor of the consolidated school at West Bureau, is a former teacher, but quit the profession for an overall job because there was more money in the latter. He is drawing a salary of \$1,500 a year for a 12-month year and has a cottage on the school premises. In addition as janitor he raises garden stuff for his family use.

Mr. Smith taught in Greenville township for several years but quit last September to become janitor of the West Bureau school. The school board regards him as a skilled mechanic besides being a teacher and janitor and also has ability along dramatic lines. He recently coached the cast for the school play and took one of the leading parts in the show.

WOODMEN AFTER CLASS

Team Captains Appointed and soliciting Under Way

The Modern Woodmen thruout the country is enjoying a substantial growth, 12,000 having been initiated in April. Deputy Wilcox of Rockford was in Genoa last week and injected pep into the local camp, No. 163.

Two teams are now at work soliciting members, the teams being captained by W. A. Eklor and W. J. Jeffery. A class of 50 candidates is the mark for which the teams are working and a good start has already been made.

Mrs. R. B. Field and Donald were Rockford visitors Saturday.

DESERT ARMY STEAL A FORD

Two Young Men Now Resting in the County Jail

AUTOMOBILE STOLEN IN FAIRDALE

Sheriff Decker Tracks Men to Chicago and Brings them to Genoa Tuesday

Gerald Unerzagt and James Watson, enlisted men, deserted from Camp Grant Sunday night, went to Fairdale where they appropriated a Ford car, drove to Chicago, where they were captured at the home of Unerzagt and now are resting at the county jail in Sycamore.

Sheriff Decker was notified of the theft at Fairdale. Learning that the men wore uniforms he went to Camp Grant and there found that the two men named above had deserted. Unerzagt enlisted from 1417 Kildare Ave., Chicago. Accompanied by Deputy Sheriff Bill Foster of Franklin township the sheriff went to the above address on Tuesday and sure enough there was the Ford, parked in the alley at the rear of the apartment building. The men, seeing the officers in the alley, attempted to escape thru the front door, but found an officer there to meet them. They then ran up to the third floor where the officers soon cornered them.

Unerzagt and Watson were brought to Genoa Tuesday evening and taken to Sycamore in the Sheriff's machine. Watson enlisted from 730 Jane street, St. Paul.

THE VAUDEVILLE

"Beg Your Pardon" for the Omission last Week

Thru an oversight, possible at times owing to multitudinous duties that demand the attention of the publisher of a weekly paper, The Republican failed last week to mention the vaudeville presented under auspices of the Eastern Star on the 17th.

As a matter of fact the program was one of the best put on in Genoa for some time. Every number was good, the talent displayed being a surprise as well as delight to the audience. Mrs. Pearl Reinken, the director, has a peculiar faculty for bringing out the best there is in her pupils and if there is any latent talent in a person, she will develop it. The program was varied and so entertaining that there is a popular demand for more of the same thing. Such entertainments are not only pleasing, but a mighty good thing for the young people who are giving it their time.

TO CLOSE THURSDAYS

Sycamore and DeKalb Stores to Have Half Holiday

Beginning next week, Thursday, June 3, the weekly half holiday on Thursday afternoons will be an accomplished fact says the Chronicle.

Almost all the store keepers of DeKalb have signed the agreement to close their stores every Thursday afternoon during the months of June, July and August.

The committee announced that the reaction to the plan was practically unanimous and there are only two or three of the men who will not be closed next Thursday.

Shortly afterward the committee announced that word had been received from Sycamore that Sycamore merchants had with practical unanimity agreed to do the same thing so that there will be little business doing in either of the cities on the date in question.

Plans for various forms of public amusement will be inaugurated at once.

This is a mighty good move and the plan could be easily adopted in Genoa without any loss of patronage.

THE GLEE CLUB

Gives a Fine Program at Church Thursday Night

Under auspices of the Genoa Township High school Glee club a fine program was given at the M. E. church last Thursday evening. Every number was good, there being no evidence of lack of preparation nor inferior talent. More of these public demonstrations of high school musical and oratorical ability would be appreciated.

CRUSHED UNDER TRACTOR

John Stouffer of Boone County Meets Terrible Death

A contrivance, fashioned by John Stouffer and attached to his farm tractor, proved to be a death trap and was responsible for the tragic accident on his farm in Manchester Friday morning. This was the finding of the coroner's jury at an inquest conducted by Coroner W. G. Hawkey and Assistant Coroner Floyd Atkins in the afternoon.

The jury found that his death was purely accidental.

Testimony offered at the inquest revealed that Stouffer had made a device to hold the clutch out of gear with motor running. The solution arrived at was that Stouffer had crawled beneath the tractor to adjust something and that while he was beneath it the vibration of the running motor caused the contrivance to slip, allowing the clutch to catch. The machine, thus thrown into gear, started and passed over his body.

Lugs of the tractor ran over his leg, back and chest. His back was broken and his chest crushed in by the machine.

The appliance, which caused his death, the jury found, was put on to save time.

Mrs. Stouffer told the jury she found her husband's body lying beneath the tractor. She said he was lying on his stomach with his hands over his head and the wheel resting on his back.

POTTER STEPS OUT

Office of General Manager of Marketing Co. Abolished

Charles H. Potter, general manager of the Milk Producers' Co-Operative Marketing company, will step out of that office May 31 because of the abolishment of the general manager's office by vote of the board of directors of the marketing company says the Elgin News.

The office will hereafter be divided into five departments, finance, city buying, company buying, purchasing and booking. He will remain in his position as a member of the board of directors of the Milk Producers' association and chairman of the real estate and equipment committee.

Members of the executive committee said today that action has been contemplated for six months and refused to state whether or not there has been a row.

Charles Potter has been general manager of the Milk Producers' Co-Operative marketing company since November 1, 1918 when the organization was completed. He was instrumental in planning the organization of the marketing company and in fighting the buying combine headed by the Nestle's food company.

"The organization of the farmers and the marketing company has been my lifelong ambition," said Mr. Potter today. "It is an organization that handles millions of dollars' worth of products successfully. I am glad that I have had the chance to work for the betterment of such an organization."

FRANKLIN PRICE LIST

Genoa Republican Adopts the 20th Century Idea

Beginning on the 1st of June The Republican will adopt the Franklin printing price list, keeping company with most progressive and wide-awake printing establishments in the country. The list is being adopted from coast to coast and from Canadian border to the gulf. It is nothing more or less than uniform method of figuring the price of a job of printing, the prices for ordinary commercial work being standardized as near as possible, as are the prices of groceries and other commodities.

There will be one set price for every ordinary job of printing. That price will include the cost of stock, labor and profit to the printer.

T. G. FAIRCLOE

Passed Away Tuesday Morning at Sycamore Hospital

T. G. Faircloe, who has been in failing health for some time, passed away at the Sycamore hospital Tuesday morning, May 25, at four o'clock. Funeral services were held in Sycamore Wednesday afternoon, interment taking place in Elmwood cemetery.

Mr. Faircloe leaves a widow, Mrs. Katie (Durham) Faircloe.

CLASS PLAY AND COMMENCEMENT

"Ruth in a Rush" at the Opera House this Thursday Evening

COMMENCEMENT FRIDAY EVENING

Dr. R. L. Lyman of University of Chicago to Deliver Address at M. E. Church

This week distinctly belongs to the six young people who graduate from the Genoa Township High School and all other matters of social nature are only running second in the minds of school patrons.

The class play, "Ruth in a Rush," will be presented at the opera house this (Thursday) evening, the cast having been published in the last issue of The Republican. This play is a comedy and gives promise of appealing to the audience.

On Friday evening at the M. E. church the following students will receive their "sheep-skins":

- Ella Hansow, Glenn Barcus, Guyla Buck, Marjorie Hemenway, Ralph Hansow, Esther Teyler

Mr. Mackenzie has been fortunate in engaging Dr. R. L. Lyman of the University of Chicago to deliver the address. Dr. Lyman comes recommended not only as a man well posted, but as an orator of ability as well.

The complete program for Friday evening, May 28, at the M. E. church follows:

- Organ Prelude, "Tannhauser's Overture"—Mrs. E. W. Brown, Invocation—Rev. L. B. Lott, Chorus, "Beautiful Blue Danube"—High School Glee Club, Salutatory, "National Thrift"—Ella Hansow, "Aviation"—Glenn Barcus, "The College Man"—Guyla Buck, Vocal Solo, selected—Mr. C. J. Bevan, "Music as Recreation"—Marjorie Hemenway, "Mental Chemistry"—Ralph Hansow, Vaudelectory, "Bolshevism"—Esther Teyler, Chorus, "Ciri Biri Bin"—Glee Club, Class Address, "The Great Vision"—Dr. R. L. Lyman, Violin Solo, selected—Miss Dorothy Schoessel, Presentation of diplomas—Principal H. Mackenzie, Benediction—Rev. Lott.

BARBER GOES OVER

Marengo Lawyer Must Pay Penalty for Embezzlement

Attorney J. E. "Gene" Barber, Marengo attorney accused of embezzling several thousand dollars from his clients, is expected to leave the Woodstock county jail tomorrow for Joliet penitentiary, following his sentence in the circuit court at Woodstock.

Judge Donnelly of the circuit court sentenced Barber to an indeterminate term in prison and barred him from practicing law in McHenry county.

The sentencing of Barber ends a hard fight on the part of the authorities of McHenry county to imprison Barber. Numerous clients of the attorney filed charges of embezzlement against the Marengo man last winter. He was arrested once at Java City, N. Y., but escaped only to be captured again in Marengo.

The grand jury today returned an indictment against Barber after hearing his case and he pleaded guilty to the charges. In the circuit court he was disbarred and sentenced to spend from one to fourteen years at Joliet penitentiary.

GRAND THEATRE

- Wed. June 2—"The Poor Boob"—Bryant Washburn, Sat. June 5—"Good Gracious Annabelle"—Billie Burke, Wed. June 9—"Puppy Love"—Dorothy Gish, Sat. June 12—"Pettigrews Girl"—Ethel Clayton, Wed. June 16—"Partners Three"—Enid Bennett, Sat. June 19—"Test of Honor"—John Barrymore, Wed. June 23—"Little Comrade"—Vivian Martin, Sat. June 26—"Lets Elope"—Marjorie Clarke, Wed. June 30—"Rescuing Angel"—Shirley Mason, Admission—Adults, 22 cents, plus 3c tax, total 25 cents, Admission Children, 13c plus 2c tax, total 15 cents, Beginning June 1 shows start at 8:30 p. m.

DIED IN ELGIN

Mrs. Carrie Peterson Passes Away After Three Years' Suffering

Carrie Matilda Carlson was born in East Gotland, Sweden, May 30, 1860, and died at Rest Haven Sanitarium in Elgin May 23, 1920, at the age of fifty-nine years 11 months and 23 days. In May 1883, she came to Illinois and on October 26, 1883, was united in marriage to John Peterson, who preceded her in death March 8, 1913. To them five children were born, two having died in infancy.

The surviving children are Mrs. Anna Coon and Mrs. Millie Engle, and one son, Harvey Peterson, all of Genoa, Illinois, and two grandchildren, Carrie and Charles Coon. She also leaves one brother, Charles Carlson, of Ellsworth, Illinois. At the age of 13 years Mrs. Peterson united with the Swedish Lutheran church. She was also a member of the Royal Neighbor camp in Genoa. Mrs. Peterson lived in the Ney neighborhood for 35 years, and counted every one her friend, all of whom will greatly miss her. She has been a sufferer for 3 years with nervous prostration and death came as a great relief from her suffering. Mrs. Peterson was always ready to lend a helping hand to anyone in need.

Card of Thanks

We wish to express our sincere thanks for the assistance of friends following the death of our beloved mother and for the many kind acts during her years of great suffering. Mr. and Mrs. Wm. Engle, Mr. and Mrs. Harvey Peterson, Charles Coon and family.

THEY MEET

And Two Autos are Taken to The Hospital

Frank Brennan, in his new Ford, and Glenn Buck in a Buick came together at the corner of Main and Genoa streets Tuesday afternoon and both cars are now in the hospital, not hopelessly smashed, but temporarily out of the running.

Had there been a post or silent policeman at the street intersection this would not have happened. We know that some are opposed to the posts, claiming that drivers will not always go around them. That may be all true, but as Mr. Brennan says, had a post been in position at the street intersection last Tuesday, his car nor Mr. Buck's would not have been smashed. Should a driver ignore such center post and hit another car as a result of his carelessness, it is then a simple matter to place the blame where it belongs and make the careless driver pay the costs.

The accident Tuesday was due to a misunderstanding. Brennan, who was driving from the west, thought that Buck, who was coming in from the east, was about to turn north on Genoa street as he (Brennan) was about to do. On the other hand Mr. Buck thought the Ford driver was heading straight east on Main street. Then the smash.

GENOA LEGION LEADS

Has a Membership of 77 and Still Growing

In point of membership, considering the number of men who enlisted from Genoa, Bayard Brown Post of the American Legion is about the healthiest post in the country. Twenty-two new names were added during the recent drive, bringing the total membership up to seventy-seven.

The boys are now making plans to start something that will keep the members interested in the post and also keep their organization before the people as an important factor in the social activities of the city.

It is now proposed to organize a base ball team, and this is entirely possible for there are many good players among the Hun chasers. The first preliminary practice will be held in the east end of town, in the field south of Frank Scott's residence Thursday evening. Every fellow who can toss the pill or wield the stick is requested to be present and take a chance.

CARD OF THANKS

We wish in this way to thank the Modern Woodmen, Royal Neighbors, relatives, friends and neighbors for the beautiful floral offerings, auto donations, and sympathy shown us in our late bereavement.

Mrs. Mary Pierce and family

Forceful Warning.

A road sign in New York says, "Go Slow and Save Ten Dollars."

JUDGE CLIFFE TO SPEAK HERE

Memorial Address on Sunday, May 30, at Genoa Cemetery

THE SYCAMORE BAND ENGAGED

Bayard Brown Post American Legion Will Have Charge of All Ceremonies

The committee of Bayard Brown post American Legion have practically completed their work in connection with Memorial Day observance and announce a program that will be equal to anything ever attempted in Genoa, and it will be a credit to the post.

Judge Adam C. Cliffe has been engaged to deliver the address and a more interesting speaker could not

have been selected. It had also been planned to have Rev. C. A. Briggs of Freeport as a speaker, but owing to the train service he could not make satisfactory arrangements and will not be here.

The Sycamore band, which is rapidly forging to the front under the leadership of Prof. Toenniges of DeKalb, has been engaged for the afternoon.

Boy Scouts and children under leadership of the Community club will gather flowers on Saturday.

Following is the plan of the day as arranged by the American Legion committee:

Headed by the band the procession will leave main street at two o'clock in the afternoon. Members of the G. A. R. in autos will follow, then in order, the Boy Scouts, children with flowers, American Legion and citizens.

On arriving at the cemetery the graves will be decorated after which all will gather at the monument for the unknown dead where the following program will be rendered:

- Music by band, Invocation by Rev. Lott, Music by mixed quartet, Music by band, Remarks by Rev. Lott, Music by band, Address by Judge A. C. Cliffe, Decorating monument for the unknown dead, Benediction, Concert by band, Members of the American Legion will not appear in uniform.

TO OPEN HOTEL

Mrs. Reed Will Soon Open the Building on Main Street

The Commercial Hotel at the corner of Main and Emmett street, which has been vacant for many months, will be re-opened soon by Mrs. Reed, wife of the harness maker employed by M. F. O'Brien.

At present Mrs. Reed will not operate the dining room, but will wait until conditions are near normal in prices and in them after getting help.

The building is now being thoroly renovated.

JUNIOR RECEPTION

The Seniors, Misses Cook, Schessel, Schmidt, Mrs. Snyder, Mr. and Mrs. H. Mackenzie and Mr. and Mrs. J. J. Hammond were guests of the Juniors at a nine o'clock chicken dinner party Friday evening of last week at the home of Miss Gladys Montgomery. The dining room was cleverly decorated with the class colors and flowers. The place cards were novel, being slips of paper on which were printed the characteristics of the guests. In order to find one's places it was necessary to recognize one's own characteristics. During the dinner each one found his fortune concealed in a nut shell in the center of the table. Several splendid toasts were given by the pupils and the teachers.

# THE KITCHEN CABINET

All common things, each day's events,  
That with the hour begin and end,  
Our pleasures and our discontents,  
Are rounds by which we may ascend.  
—H. W. Longfellow.

## QUICK BREADS.

Hot muffins, gems, biscuits or griddle cakes are enjoyed at almost any meal.

**Corn and Rice Muffins.**—Take two cups of buttermilk, one cup of white cornmeal, one teaspoonful of soda, a half teaspoonful of salt, one egg, one-half cupful each of cream and cold boiled rice. Mash the rice, add salt, egg, cream, then the buttermilk mixed with the soda, then the meal. Bake in buttered muffin pans in a hot oven.

**Fruit Corn Muffins.**—Take two cups of yellow cornmeal, one cup of flour, two tablespoonfuls of sugar, a pinch of salt, two teaspoonfuls of baking powder, one tablespoonful of melted butter, two eggs well beaten, one and one-half cups of milk, and one cup of fruit. Dates, prunes, figs or other fruits may be used. The fruit should be cut fine. Bake in greased muffin pans twenty minutes.

**Batter Bread.**—Take two cups of each of sweet milk and buttermilk, one cup of white cornmeal, half a teaspoonful of soda, one teaspoonful of salt and one tablespoonful of melted butter and three beaten eggs. Boil the milk, add the meal very slowly, then the salt and butter and cool. Add the eggs and a tablespoonful of milk in which the soda is dissolved. Bake in buttered pan in a moderate oven.

**Popovers.**—Take one cup of flour, one egg unbeaten, one cup of milk and a pinch of salt. Butter the gem pans and place in a hot oven. Mix all the ingredients together, stirring hard with a wooden spoon. When the pans are hissing hot pour in the batter. Fill each half full. Bake in a hot oven until well puffed and golden brown. Cover with a paper and finish baking. This recipe makes a dozen popovers. These may be made for dessert by dropping a piece of banana, a few blue berries, fruit or jam into each cup of batter, which will rise and cover the fruit in baking. Serve with syrup or fruit sauce.

**Charleston Muffins.**—Beat together one cup of sugar and one tablespoonful of melted butter. Add two eggs beaten very light, a half teaspoonful of salt, a grating of nutmeg, and one cup of milk. Sift in two cups of flour and three teaspoonfuls of baking powder. Bake in hot buttered muffin tins in a hot oven.

**A Half-Pound Cake.**—As a pound cake is large for the small family here is one which cuts the quantity in half: Take one scant cupful of butter, one and three-fourths cups of sugar, two cups of flour sifted three times with one-half teaspoonful of baking powder. Cream the butter, add the sugar and a whole egg unbeaten, beating well; then add four more in the same manner. Beat well and bake in a slow oven. Use care in measuring the butter. It should not be packed in the cup.

**Peanut Butter Biscuit.**—Sift three cups of flour with six teaspoonfuls of baking powder and one teaspoonful of salt; add half a cupful of butter substitute, one cupful of peanut butter and one cupful of evaporated milk. Sift the flour with the dry ingredients and cut in the fat, then add the milk slowly until the dough is ready to handle. More milk may be needed, depending upon the flour. Roll and cut with a small biscuit cutter. Brush the top with milk and bake in a hot oven fifteen to eighteen minutes.

"Say did you ever hear Nightingales sing,  
Hear them at twilight make wood and glades ring,  
Hear them as high in some treetop they swing;  
Say, did you ever hear Nightingales sing?"

## WHAT TO HAVE FOR BREAKFAST.

Medical authorities recommend a glass of water taken the first thing on rising and if the alimentary canal needs extra flushing a pint of hot water with half a teaspoonful of salt will be found especially beneficial.

A normal salt solution is not absorbed and passes through the body in an hour or less, removing impurities in its wake.

A cheap, wholesome and especially nutritious dish for growing children is whole wheat. Take it fresh from the granary, wash and soak over night then cook until it is reduced to a gelatinous mass. Serve with top milk and sugar. Enough of the wheat may be cooked for several days if kept in a cool place. There is something very appetizing about this dish; young and old ask for it again and again.

Griddle cakes, muffins, gems and hot breads of various kinds are all popular breakfast breads.

"Little by little the time goes by—  
Short if you sing through it, long if you sigh.  
Little by little—an hour, a day,  
Gone with the years that have vanished away;  
Little by little the race is run,  
Trouble and waiting and toll are done."

## TWENTIETH CENTURY HASH.

Have six medium-sized potatoes baked. With a spoon carefully remove the potato, leaving the rest of the skin unbroken. Season the potato with one tablespoonful of butter, one tablespoonful of cream; salt, pepper to taste, stirring lightly with a fork; do not mash the potato. Add one cupful of any kind of chopped beef that has been moistened with gravy, stock and Worcestershire sauce. Fill the skins with this mixture, letting it rise a little above the top. Put a piece of butter on each and heat in the oven. Grated cheese may be used instead of the meat.

**Surprise Biscuits.**—Make a biscuit dough as soft as can be handled, pat it lightly, roll into a thin sheet, and cut with a biscuit cutter. Have ready one cupful of well-seasoned meat that has been moistened with gravy, stock or milk. Form into sandwiches by spreading the meat lightly on half of the biscuits and cover with the other half, pressing them together at the edges. Bake twenty minutes in a hot oven. This recipe will make nine sandwiches. Pour over a brown gravy and serve hot.

**Minced Beef With Potato Border.**—To two cups of well seasoned mashed potato add the yolks of two eggs. Beat until light and creamy. Form this mixture into a border on a chop plate or flat baking dish. Score the top. Season two cups of any kind of cold chopped beef with a teaspoonful of onion juice, one teaspoonful of minced parsley and salt and pepper to taste. Add enough stock to moisten well, place the meat inside the border and brown lightly in a hot oven.

**Roast Beef, Mexican Sauce.**—Roast slices of cold roast beef, cut very thin, in the following: Cook one onion finely chopped in two tablespoonfuls of butter five minutes. Add one red pepper, one green pepper and one clove of garlic, each finely chopped; add two tomatoes or the same bulk canned. Cook fifteen minutes, add one teaspoonful of Worcestershire sauce, celery salt and salt to taste.

**Ways with Cheese.**  
Cheese is such a concentrated food, with little or no waste, that it is, even at a high price, cheaper than less expensive protein foods.

**Hot Cheese Sandwiches.**—With a biscuit cutter cut circles from very thin slices of close-textured bread. Lay very thin slices of cheese between the bread to form sandwiches. Brown lightly in hot butter in a frying-pan. Serve hot.

**Luncheon Biscuits.**—Have ready some very thin slices of cheese. Bake a pan of baking powder biscuits and, immediately on taking them from the oven, break open and spread lightly with butter and lay a slice of cheese between each. Cover with a warm napkin and serve promptly. It is necessary to have everything ready and work quickly so that the heat in the biscuit will melt the cheese.

**Cottage Cheese Salad.**—Take any quantity of cheese needed, season well with onion juice, salt, cayenne and paprika; add a finely shredded or minced green pepper and serve on lettuce with a thick boiled dressing.

**Cheese With Brussels Sprouts.**—Make a cupful of white sauce; add one cupful of cooked sprouts and, when well heated, add one-half cupful of grated cheese. Remove from the fire as soon as the cheese is melted. Serve on squares of buttered toast.

**Tomato Rarebit.**—Strain the seeds from a cupful of stewed tomatoes, pressing through all the pulp, and simmer until reduced to half a cupful. Melt a tablespoonful of butter; add one-half cupful of grated cheese and stir until the cheese is melted. Add salt and cayenne to the tomato and blend this mixture with the egg before adding the hot cheese. Remove from the heat as soon as the egg is stirred in and serve on slices of toasted rye bread.

**Cheese and Celery Salad.**—Cut crisp white bits of celery into small pieces, sprinkle with Parmesan cheese and serve on lettuce with French dressing.

*Nellie Maxwell*

# SUITABLE TAFFETAS FOR SUMMER WEAR

There are so many pretty taffeta dresses this season, made up in so many ways, that it seems almost an entire wardrobe might be assembled from among them, if all other fabrics were barred. Then, to add to their diversity, designers have hit upon combinations of taffeta and organdie, taffeta, and net, and taffeta and lace.

An example of original and beautiful designing, the dress at the left of the two shown above will interest every lover of taffeta. Its bodice is cut on kimono lines but departs from them with a wide flare in elbow sleeves and its fastening at the back. It has a round neck and extends six or eight inches below the waistline. The skirt at the front forms a waist extending a little way above the waist and merging into the bodice in a "Y"-shaped opening outlined with embroidery in silk. In the back it terminates at the waist line.

The bodice forms a narrow yoke at each side over the hips and the skirt is fastened to the yoke in a series of pencil folds, bordered with a narrow band of silk in a lighter shade than the frock. This light silk faces the sleeves that are turned back to reveal it and gathered under a small disk of embroidery above the facing. An unexpected detail in the management of this frock is the harem skirt gathering at the bottom.

Another pretty taffeta, shown at the right, is made on more familiar lines but contrives to be just as pleasing as its rival. Its bodice with turned-back elbow sleeves has a group of small tucks at each side and a soft grille that fastens under one large ornament at the right side. Narrow frills of the taffeta, set on in bands at the front and back and across the hips at the side, make a charming trimming. A frill of lace about the round neck provides a youthful neck dress. Necks in this style invite the use of beautiful old lace collars shaped to fit them and already they have made their appearance.

# For Matrons--Brilliant Hats

MODISTES and costumers may make clothes in greater variety and quantity for young women than for matrons, but it is the matron's outfitting that gives them most concern. In the province of millinery the designing of matrons' hats is of such importance that gifted men and women give all their time to it. In the group shown here four semi-dress hats are pictured.

The hat at the top of the group is a spirited shape of brilliant black straw that recalls the Napoleon. The high luster of the braid and the lines in the shape, are both contributors to the smart style of this model, which is less trimmed than any of its companions. It has an ornament made of long glycerined ostrich feathers and cellophane foliage.

The handsome turban of black mofre ribbon and a jet ornament at the left of the group is a Russian inspiration in which very rich ribbon is very cleverly draped over a frame. This is a handsome hat, with plenty of character that might be made in any rich color or in black. Facing it a fam-

# SISTERS ARE FREE AFTER TEN YEARS

Were Kidnaped From Home and Penned in Madhouse—Fortune Lost.

Central Islip, N. Y.—Miss Phoebe Brush, sixty-eight years old, and her sister, Ada, fifty-six, heirs to property valued at \$1,000,000, who have spent the last ten years in the State Hospital for the Insane here, when they should have remained there only ten days, have been set free by the supreme court. During the period of their imprisonment their estate dwindled until it is now worth only \$30,000.

Justice Tompkins ruled that the women were sent to the asylum illegal-

Whizzed Us Away to the Madhouse.

ly in June, 1910, as the original papers were faulty, calling for temporary commitment, and since then no further action had been taken to make the commitment final and binding.

The sisters said that they were kidnaped and taken to the asylum.

"We were nursing our invalid mother," said Miss Phoebe, "when four men and several women rushed into our home, picked us up bodily and hustled us into an automobile and then whizzed us away to the madhouse."

At the time of the commitment, it was reported they had been sent to the asylum after Ada had announced she was to wed a clergyman, declaring he had "made eyes" at her during the sermons. The church was guarded when the clergyman later married another woman, "for fear the sisters would appear and create a disturbance."

# KIDS LIVE AS MAN AND WIFE

Boy, 16, and Girl, 12, Quit School and Take Up Housekeeping in Abandoned Shack.

Pueblo, Colo.—After a period of some length, during which they played truant from school near here, Joseph Martinez, sixteen years old, and Margaret Rinz, twelve, were found in an abandoned shanty apparently living as man and wife.

An investigation was begun after the parents of the young people had been notified they were not attending school, and a policeman located the youngsters when he saw the girl scrubbing the floor of the old shanty. Martinez and the girl declare they attempted to get a marriage license, but were refused because of their ages. The parents, after finding the couple, agreed to their marriage.

# ELK LOSES HIS LAST FIGHT

Big Buck in South Dakota Charges Barb Wire Fence and Dies of Wounds.

Pierre, S. D.—The big buck elk, king of Scotty Phillips' herd for more than a decade, has fought its last battle. A barb-wire fence was the victor in the struggle to the death.

The buck was absolute in its domination of the buffalo and elk herds. Several bull buffaloes of the largest herd in America attempted to match their strength against the king, but they were ignominiously routed. Finally the elk took a violent dislike to the heavy wire fence surrounding the ranch. It attempted to clear it, but the fence was too high, and the elk landed squarely on the top bars. After a terrific struggle the elk tore itself from the tangle of wire and died of its wounds.

# Home Afire, Woman Climbs Down Tree

Pueblo, Colo.—Mrs. Grace Meadows always did think the Father of His Country committed a grave wrong when he cut down the cherry tree with his little ax.

"So I let the one in my yard grow," she said, after the cherry tree served as a fire escape when a blaze in her home cut off her escape by the stairway.

Mrs. Meadows' cherry tree was tall enough to reach a second story window.

# WRIGLEYS

Bright eyes,  
rosy cheeks  
and red lips  
come from good  
digestion.

Wrigley's is a delicious  
aid to the teeth, breath,  
appetite and digestion.

**PARKER'S HAIR BALSAM**  
Removes Dandruff, Itchiness, Redness, Restores Color and Beauty to Gray and Faded Hair.  
50c and \$1.00 at drug stores.  
Hiscox Chem. Works, Paterson, N. J.

**HINDERCORNS** Removes Corns, Callouses, etc. stops all pain, ensures comfort to the foot, makes walking easy. Use by mail or at drug stores. Hilscox Chemical Works, Paterson, N. J.

# COULDN'T FORGET THE GREEN

Mrs. Flannigan's Neat Expression of Loyalty to Her Native and Her Adopted Land.

Mrs. Flannigan for years has proudly exhibited from her front window a row of geraniums, in pots wrapped in bright, Irish green crepe paper, says the Indianapolis News. But the other day when her neighbor, whose son was in France for several months, pulled back her window curtain and revealed her flower pots, decorated in red, white and blue paper, Mrs. Flannigan was visibly troubled. She worried and worried. It is quite hard to be loyal to two countries at the same time, yet Mrs. Flannigan desired to be so.

Then one morning her wide Irish smile came back to her face. And passers-by saw in the Flannigan front window a row of flower pots brave in red, white and blue coverings and every covering was tied to the pot with a wide band of green ribbon.

**A War Lesson.**  
"Sponleigh borrowed \$20 from me this morning, but I didn't mind letting him have the money."  
"Why not?"  
"I noticed that he jotted down the amount on a scrap of paper."  
"I thought it generally understood that a scrap of paper signifies an obligation that won't be met."

**No Poetry Then.**  
"Stone walls do not a prison make, nor iron bars a cage," said the sympathetic visitor to the convict.  
"That's fine poetry, ma'am," replied the prisoner, "but just let 'em lock you up inside stone walls and behind iron bars and see if you can get out."

**A Clean Sweeper.**  
Frank A. Munsey, who has now added the Gordon Bennett newspapers to his long string, is a very critical employer, and many a clean sweep occurs in his various offices.  
It is said that a visitor called at one of Munsey's offices and asked the office boy if Scribbs, the reporter, was in.  
"I dunno," said the boy. "I ain't seen today's reporters yet."

**GRACE HOTEL**  
—CHICAGO  
Jackson Boulevard and Clark Street  
Rooms with detached bath \$1.00 and \$1.50 per day. Rooms with private bath \$1.50 and \$2.00.  
Opposite Post Office—Near All Theaters and Stores  
Stock yards cars run direct to the door. A clean, comfortable, newly decorated hotel. A safe place for your wife, mother or sister.

Allot Land to Eskimos.  
It is announced from Ottawa that the Canadian government has decided to reserve for the remnant of the Eskimos a small part of the territory over which they formerly ranged at will in the varying pursuits of fishing and hunting. The reservation is to consist of Banks and Victoria Islands, north of the vast region, wide as the continent, known as the Northwest territory, and far north of the arctic circle.  
From this reservation, and apparently the waters immediately adjacent to it, the white hunters are to be excluded; and those who have begun operations on Banks Island will be ousted. Thus the resources needed to sustain Eskimo life will be reserved for the Eskimo.

Embarrassing.  
I was giving a lecture to my juniors on the life of Shakespeare. I was sitting on one of those folding chairs which are only too willing to live up to the name applied to them, and you can imagine my feelings when I suddenly found myself seated on the other side of the desk, while I was looking over the top of it.  
The pupils politely wanted to see if I were injured before they laughed.—Exchange.

**A Food That Builds!**  
**Grape-Nuts**  
A staunch food made of wheat and malted barley, ready to eat, easily digested, and full of sound nourishment.  
For those who work with brain or brawn there is no better breakfast or lunch than Grape-Nuts. There's a Reason Sold by Grocers  
Made by Postum Cereal Co., Inc., Battle Creek, Michigan.

**LIFT CORNS OFF  
IT DOESN'T HURT**

With fingers! Corns lift out and costs only a few cents

Pain? No, not one bit! Just drop a little Freezone on that touchy corn, instantly it stops aching, then you lift that bothersome corn right off. Yes, magic! Costs only a few cents.

Try Freezone! Your druggist sells a tiny bottle, sufficient to rid your feet of every hard corn, soft corn, or corn between the toes, and calluses, without one particle of pain, soreness or irritation. Freezone is the mysterious ether discovery of a Cincinnati genius.—Adv.

**The Cheerful Optometrist.**

Patient—My headache is not any better, doctor.

Doctor—Did you report to the eye clinic, as I told you?

Patient—Yes, doctor, I went to the eye clinic and the optometrist said I was all right, although he did not examine my eyes.—Journal of the American Medical Association.

**Catarrhal Deafness Cannot Be Cured** by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure Catarrhal Deafness, and that is by a constitutional remedy. HALL'S CATARRH MEDICINE acts through the Blood on the Mucous Surfaces of the System. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced and this tube restored to its normal condition, hearing may be destroyed forever. Many cases of Deafness are caused by Catarrh, which is an inflamed condition of the Mucous Surfaces. ONE HUNDRED DOLLARS for any case of Catarrhal Deafness that cannot be cured by HALL'S CATARRH MEDICINE.

All Druggists 75c. Circulars free. F. J. Cheney & Co., Toledo, Ohio.

**An Unaccommodating Parent.**

Mrs. Billups—Why is Willie crying so?

Billups—He lost part of his engine and now he's yelling because I won't let him have my false teeth for a cowatcher.—Boston Transcript.

**FROM FORTY-FIVE  
TO SIXTY**

**A Word of Help to Women  
of Middle Age From  
Mrs. Raney.**

Morse, Okla.—“When I was 45 years old Lydia E. Pinkham's Vegetable Compound carried me through the critical period of the Change of Life in safety. I am over 60 and have raised a family of eight children and am in fine health. My daughter and daughters-in-law recommend your Vegetable Compound and I still take it occasionally myself. You are at liberty to use my name if you wish.”—Mrs. ALICE RANEY, Morse, Oklahoma.

Change of Life is one of the most critical periods of a woman's existence. This good old-fashioned root and herb remedy may be relied upon to overcome the distressing symptoms which accompany it and women everywhere should remember that there is no other remedy known to carry women so successfully through this trying period as Lydia E. Pinkham's Vegetable Compound.

If you want special advice write to Lydia E. Pinkham Medicine Co., (confidential), Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

**Acid Stomach  
Makes the Body Sour  
Nine Out of Ten People  
Suffer From It**

It sends its harmful acids and gases all over the body, instead of health and strength. Day and night this ceaseless damage goes on. No matter how strong, its victim cannot long withstand the health-destroying effects of an acid stomach.

Good news for millions of sufferers. Chemists have found a sure remedy—one that takes the acid up and carries it out of the body; of course, when the cause is removed, the sufferer gets well.

Bloating, indigestion, sour, acid, gassy stomach miseries all removed. This is proven by over half a million ailing folks who have taken EATONIC with wonderful benefits. It can be obtained from any druggist, who will cheerfully refund its trifling cost if not entirely satisfactory. Everyone should enjoy its benefits. Frequently the first tablet gives relief.

**Super Terrestrial—  
“Aerial Submarine”**

UPER TERRESTRIAL is the suggested name of the latest thing in flying machines. It will be an “aerial submarine” kind of a thing. This sounds like an Irish bull, but it readily suggests the thing itself—an enclosed machine which will protect both the machine and the flyer from the air.

High-flying has lately proved so interesting that it fascinates both the aviator and the scientist. “The Roof of the World” is evidently a most astounding place. And as it is a dangerous thing to try to reach it, it is just the place that the daring want to try to reach. A scientist worth his salt is a man with an imagination—and that imagination is busy these days with conditions super terrestrial.

“What little we know of these upper heights makes us keen to know more. For example, we know of heavy trade winds blowing many miles above the earth at such a terrific speed that could they be utilized in accelerating machines, men might circle the globe at several hundred miles an hour. Also there are indications of a rise in temperature after a certain altitude is passed, of belts of mysterious gases and vapors, and of other strange phenomena, all of which combine to make a trip to the outer edge of the atmospheric ocean surrounding this planet the most romantic and alluring of all voyages ever attempted by man. So it is small wonder that planes are made for specially constructed airplanes, designed to meet the conditions existing at great altitudes and to minimize the dangers that have hitherto rendered high flying such a hazardous undertaking. The Super Terrestrial is not yet an accomplished fact, but it seems to be well on the way. Major Schroeder, having recovered from the effects of his recent 36,000-foot flight, is said to be interested in the construction of such a machine, in which he hopes to reach the altitude of 50,000 feet. It is further reported that Louis Breguet, a French aeronautical engineer, has announced that an engine has been perfected capable of ascending 100,000 feet, or nearly nineteen miles, and that flight to that altitude is immediately in prospect. The main feature of the new type of aircraft will be an enclosed fuselage or cabin to protect the aviator and the machinery itself.

“The ‘Super Terrestrial’ would seem to me to be the answer,” said August Post, secretary of the Aero Club of America, giving the proposed carrier the name he himself had coined, as quoted in the New York Tribune by Arnold D. Prince.

“From what man already has experienced in his attempts to pierce the heights he has learned that some form of protection not yet devised is necessary. Something designed along the lines of the submarine would seem to be what is needed.

“The enclosed cabin for the aviator suggests itself as the most sensible scheme. Sitting in this air-tight compartment, he would be within easy reach of the levers controlling the mechanism and regulating the supply of oxygen needed by himself as well as by the super chargers by which air at sea level pressure is now fed to the carburetors in altitude flights.

“He would not only be safeguarded against the physical hardships which have beaten him back heretofore, but, with adjustable propellers capable of increasing their purchase on the rarefied atmospheres, he could push his way into levels now beyond his reach.”

“What is it like up there among the stars, or even a little lower down?”

Some things we know already.

We know, for example, that some distance above the earth's “atmospheric envelope,” but below that stratum of “inflammable air” which science has discovered, are trade winds which blow from west to east with unfailing regularity; and we know, too, and this is even more reassuring, that at that level it is far less cold than had long been supposed.

For some of this knowledge we are indebted to scientists like M. de Bort, discoverer of what is called “inversion of temperature,” and for the rest to our own courageous aviators, and to bal-

loonists like Henry Glisher and his assistant, James Coxwell, both Britons, who in September, 1922, rose to an altitude calculated by them as about seven miles, which was higher than that attained by Major Schroeder, the American flyer, in his recent sensational “jump” at Dayton, O.

Glisher's experience was especially valuable from the standpoint of the person who wants to know “what it is like up there” because the aspirator quit working at an altitude of five miles.

Writing for the British Association for Balloon Experiments as to what happened after reaching the five-mile level, he said:

“Up to this time I had taken observations with comfort, and experienced no difficulty whatever in breathing.

“Then, having discharged sand, we rose still higher. The aspirator became troublesome to work and I began to find difficulty in seeing. . . . I could not see the column of mercury in the wet bulb thermometer, nor the hands of the watch, nor the fine division of any instrument.

“Shortly after I laid my arm on the table, possessed of its full vigor, but on being desirous of using it a little later I found it powerless. I tried to move the other arm; I found it powerless also. I tried to shake myself and succeeded, but I seemed to have no limbs.

“I dimly saw Mr. Coxwell and endeavored to speak to him but could not. Then, in an instant, intense darkness overcame me, so that the optic nerve lost power suddenly, but I was still conscious with as active a brain as at the present moment, while writing this. I thought I had been seized with asphyxia and believed I should experience nothing more, as death would come unless we speedily descended; other thoughts were entering my mind when I suddenly became unconscious.

“I cannot tell anything of the sense of hearing, as no sound reaches the air to break the perfect silence of the regions between six and seven miles above the earth.”

The balloon finally began to descend after Coxwell, who retained consciousness even longer than his chief, had managed to pull the valve rope with his teeth.

Both men regained consciousness after the balloon had descended several thousand feet, and they managed to make a safe landing.

Two facts having a direct bearing on the question as to atmospheric conditions above the earth were established by them. One is that sounds like that made by passing railroad trains can still be heard at a height of about four miles, but that at six miles there is perfect silence.

The other is that up to a certain point, scientifically referred to as the level where “inversion of atmosphere” occurs, the fall of the mercury averages about one degree Fahrenheit to every 300 feet.

In April, 1875, M. Gaston Tissandier and two companions confirmed these findings when they rose from Paris in a balloon to a height of nearly six miles, but in this case the expedition was marred by the fact that both companions of M. Tissandier, having less stamina than he or the British aeronauts, died before the gas bag returned to the ground.

If further corroboration is desired as to conditions as they exist on the “first lap” of the aerial journey into the void they can be had from the experiences of the aviators who, since the advent of airplanes, have tried to reach the “lid of the world's atmosphere.”

Two of the most prominent of these, at least among the American aviators, have been Major Schroeder and Roland Rohlfs, who have engaged in a unique contest for highest records above the clouds.

Major Schroeder in his flight a few weeks ago attained an altitude of 36,020 feet, at which height his thermometer registered 55 degrees below zero centigrade, or 67 degrees below zero Fahrenheit. So, in his case, as well as in that of Rohlfs when he reached 30,300 feet in July last, and that of Adjutant Casale, of the French army, who rose 33-

137 feet several months ago, the average of a fall of one degree in temperature to every 300 feet of altitude was fairly well maintained.

Moreover, in all these flights, when the men had passed above the four-mile level and had risen beyond the screen of atmospheric particles which make our “sky,” they entered the stratum in which absolute silence reigned and in which vision was remarkably clarified.

The firmament above became almost black, due to the absence of light refraction; the stars were easily visible, even in brightest day, and the cold was terrible and intense.

But in each instance certain phenomena were observed, which brings up the next question of importance to the inquirer as to conditions “up there,” and this is the subject of “inversion of temperature.”

For a great many years man believed that temperature invariably changed with altitude, and that as height increased there was always a corresponding drop in the mercury.

M. de Bort proved that not only does the principle of increasing cold cease to function at an altitude of from six to eight miles above the earth, but that exactly the opposite occurs, and from there up it constantly grows warmer.

Sounding balloons with self-recording instruments have been sent up to a distance of seven miles and have invariably confirmed this discovery.

So, then, the situation presented to those who are planning the Super Terrestrial and arranging to launch man on his greatest adventure in the air is this:

They know—as, of course, do we who are fairly consistent readers of newspapers—the conditions as they exist up to six or seven miles. It is there that nature plays the parts with which we are most familiar. There thunders roll, lightning flashes, clouds gather and elements clash in never ending strife. It is from there that we get such wintry storms as recently experienced, and where the humble drama of rain, snow, sleet and weather unfolds itself.

They know, too, that “atmosphere,” as we know it, although in constantly thinning quality, extends above the “weather strip” to a height of about twenty to thirty miles, but beyond that, what?

It is here that real difficulties will begin, and the Super Terrestrial will encounter its greatest obstacles—provided, of course, that long before that bourne is reached the presumptuous craft has not been destroyed.

Here new dangers will appear in the shape of drifting “ice clouds,” which for imaginative purposes may be likened to icebergs; the void will assume a totally alien aspect; meteors and shooting stars will occasionally flash across the path, and the traveler will enter the boundary of “inflammable air,” or pure hydrogen.

Passing through this—always supposing, of course, that it is not snuffed out long before like a peanut shell under the foot of an elephant—the Super Terrestrial will emerge into the stratum of helium which on earth is created from radium and encountered in practical quantities only in test tubes.

Then—but perhaps this is enough for the moment. Even the most voracious seeker of knowledge as to “what things are like up there” will have been satisfied long ere this, and the first voyage of the Super Terrestrial need not be charted further.

“Provision would, of course, have to be made for changed conditions,” Mr. Post concluded, in touching on the mechanical necessities of the undertaking. “Of course, with the thinning of the atmosphere the Super Terrestrial would encounter less air resistance, and provided the propellers were adjusted to increase purchase, tremendous speed would be attained.

“The propellers would revolve much faster and the craft would shoot ahead like a meteor.

“And it—that is, the Super Terrestrial, if you desire to call it that—is the next thing on the cards.”

**ASPIRIN**

Introduced by “Bayer” to Physicians in 1900

You want genuine Aspirin—the Aspirin prescribed by physicians for nineteen years. The name “Bayer” means the true, world-famous Aspirin, proved safe by millions of people.

Each unbroken package of “Bayer Tablets of Aspirin” contains proper directions for Colds, Headache, Toothache, Earache, Neuralgia, Lumbago, Rheumatism, Neuritis and for Pain generally. Always say “Bayer” when buying Aspirin. Then look for the safety “Bayer Cross” on the package and on the tablets.

Handy tin boxes of twelve tablets cost but a few cents. Druggists also sell larger packages.

Aspirin is trade mark of Bayer Manufacture Monocetacidester of Salicylicacid

Unqualified Indorsement.

“Are you in favor of votes for women?”

“Why ask such a question at this late day?” inquired Senator Sorghum in return. “How can a statesman hope to get ‘em if he isn't in favor of ‘em?”

Of Course Not.

Diners at a certain city restaurant are getting much enjoyment out of a warning sign recently placed in a conspicuous place behind the counter and reading, “Not responsible for Wearing Apearl or pacages.”

No woman would ever quarrel with a man if it were not for the pleasure of making it up again.

An occasional domestic storm is necessary to clarify the matrimonial atmosphere.

HERE is an offer backed by one of your personal friends—a man whom you have known for a long time, and in whose honesty you have implicit confidence. This man is your local druggist. He will tell you that he has been selling Hunt's Salve, formerly called Hunt's Cure ever since he has been in business, under the strict guarantee to promptly refund the purchase price to any dissatisfied user.

He will say to you “Take home a box of Hunt's Salve and if it is not successful in the treatment of itching skin diseases, I will promptly refund to you your 75 cents.”

Hunt's Salve is especially compounded for the treatment of Itch, Eczema, Ringworm, Tetter, and other itching skin diseases.

The General Manager of the Lida Valley Railway Co., Goldfield, Nevada, A. D. Goodenough, writes: “At one time I had a very bad case of Eczema, which troubled me for seven or eight years, and although I tried all kinds of medicine and several doctors, I got no relief until I used Hunt's Salve. It finally cured me.

Thousands of such letters have been received, testifying as to the curative merits of this wonderful remedy.

Don't fail to ask your druggist about Hunt's Salve, formerly called Hunt's Cure. Show him this ad, and ask him if the statements herein made are not correct.

Sold by all reputable druggists everywhere at 75 cents per box, or sent direct on receipt of stamps or money order.

**A. B. RICHARDS MEDICINE CO., Sherman, Texas**

**PERU'S DRIFTING SAND DUNES DEW HAS VITALIZING EFFECT**

Plateau Shelf Has Strange Crescent-Shaped Formations That Are Packed Hard.

Abundant Proof That It Possesses Invigorating Action That Affects Growth of Plants.

As one makes the ascent of the Andes from the Pacific port of Mollendo, Peru, following the line of the Southern of Peru railway, the climb to the divide is broken by two great steps or widespread shelves of desert or pampa.

On the first of these steps, about two hours' steep climb from the sea, and at an altitude of from four thousand to five thousand feet, are located the famous drifting sand hills of Peru. The plateau is here about twenty miles wide, the air thin and dry and no trace of vegetation to be seen, only these gigantic crescent-shaped sand dunes dotting the pampa as far as the eye can see.

Composed of fine gray crystal sand, they gleam white against the brown of the desert, and their horns point toward the prevailing south wind of this region. They are from fifteen to twenty feet in breadth across the thick part of the crescent and sometimes one hundred feet from horn to horn. So tightly is the sand packed that the feet of the horses or mules make little impression on it.

An Inducement.

“The prices in this fashionable restaurant are very steep.”

“Maybe that is why so many climbers are to be seen here.”

Her Idea.

Edith—I like an engagement with some snap about it.

Maud—One that breaks easily, eh?

One resents being bossed by his neighbor, and just as much by a thousand of his neighbors.

Battle Creek, Michigan

Miss Cora Christian will spend the weekend in Chicago.

Mr. and Mrs. R. H. Browne visited Elgin friends Sunday.

Elm Hall of Chicago is calling on Genoa friends this week.

Mr. and Mrs. A. J. Kohn were Rockford visitors Saturday.

Miss Marie Schmidt spent the week on with her parents at Freeport.

Mrs. Frank Rudolph and Miss Grace Arnold were Elgin visitors Tuesday.

Mr. and Mrs. J. Rendell of DeKalb were Sunday guests at the home of the latter's cousin, L. M. Doty.

Mr. and Mrs. L. J. Kiernan visited Mr. and Mrs. Jas. Prutman of Elgin Sunday.

Mr. and Mrs. E. E. Keating of Huntley called at the C. M. Corson home Monday.

Henry McCabin, manager for the Squire Dingee Pickle Co., was in Genoa Thursday.

G. W. Sowers of Elgin was in Genoa Tuesday, getting his hotel ready for occupancy.

Mrs. S. W. Todd, who has been spending the past several weeks with her parents, Mr. and Mrs. M. L. Corson, left for her home in Indianapolis Thursday of this week.

New Sterling silver bar pins set with brilliant, priced from \$2.00 to \$3.50 at Martins.

We invite you to come and inspect our complete line of hand painted china. G. H. Martin.

Martin has a selection of beautiful Rosary beads. Prices \$3.00 to \$5.00. Stop in and see them.

Mr. and Mrs. W. I. Jeffery are entertaining the former's sister, Mrs. Fuller of Oregon, Minn.

Mr. and Mrs. L. C. Schaffer of Sycamore were guests Wednesday at the home of Mrs. E. A. Stiles.

Miss Pearl Smith of Elgin has been a guest at the home of her cousin, Mrs. L. J. Kiernan.

Miss Maude Sager of Elgin was a week-end visitor at the home of her mother, Mrs. Caroline Sager.

Several candidates will be initiated at the regular meeting of the Eastern Star next Tuesday evening.

Mrs. Will Hayes of Powell, Wyo., is visiting at the home of her parents, Mr. and Mrs. Elmer Harshman.

Mr. and Mrs. Glenn Craddock of Sterling visited the latter's mother, Mrs. Caroline Williams over Sunday.

The Masons conferred the third degree Tuesday evening, two candidates taking the impressive goat ride.

Miss Olive Ferden, Exchange Bank bookkeeper, is enjoying a week's vacation at her home in Scandinavia, Iowa.

Mr. and Mrs. Ray Dunn and children of Kenosha are visiting at the home of Mrs. Dunn's father, J. R. Kiernan.

G. A. Dorrance, until last week manager of the Genoa laundry, moved his household goods to Dixon Wednesday.

Jas. R. Kiernan spent a few days in Iowa this week, transacting business in Waterloo, Waverly, Shell Rock and other places.

Mrs. Sarah Hewitt and Mrs. S. T. Zeller will entertain the Thimble club at the home of the former this Thursday afternoon.

Edgar Baldwin was in Freeport Monday and Tuesday, being one of a clan of about 300 who received the consistory degree in Masonry.

Potato bugs are waiting to come up. There is an army of the hard shells ready to pounce upon the first leaf that shows itself above the ground.

Mr. and Mrs. A. J. Kohn and daughter, Barbara, will spend from Saturday until Monday at the home of the former's mother of Watertown, Wis.

Mrs. Peter Konkaski and daughter, Ellen of Chicago, are guests at the home of the former's mother, Mrs. Erdina Teyler.

Misses Pearl Russell, Nellie Geithman, Marjorie Holroyd and Mrs. Albert Morehouse will go to Freeport Friday as delegates to the District Epworth League convention.

There are many vacant barns about town which could be razed, part of the lumber used in building a garage, leaving a lumber balance which could be disposed of at a profit. Why not?

The streets have now all been graded or dragged in anticipation of the oil coating, said oil has been ordered and now await the will and pleasure of the transportation systems.

N. A. Carpenter celebrated his 79th birthday anniversary Monday. During the afternoon many acquaintances called at his home each succeeding call being in the nature of a pleasant surprise to him.

Mr. and Mrs. C. M. Corson had as their dinner guests Saturday, Mr. and Mrs. C. C. Corson of Bedford, Ia., Mr. and Mrs. S. A. Walte, Mrs. Priscilla Robinson, Mrs. Emma Corson and grandson, Richard of this city.

The front elevation of the Ford garage is now materializing. Finished in chocolate colored vitrified brick, marble and white terra cotta, it will be a beautiful front and a decided ornament to Main street.

Irvin Crawford, who has been spending the past couple of weeks with his parents, Mr. and Mrs. S. R. Crawford, returned to Minneapolis

Monday Mrs. Crawford and son will spend a few more weeks in Genoa.

The Women's Foreign Missionary society will meet at the home of Mrs. Elmer Harshman on Tuesday afternoon, June 1. Devotional Topic: The Stewardship of Life. Program. Leader, Mrs. Edith Reid. All members are requested to be present.

Mrs. Helen Russell, Sec'y.

The city water statements will be mailed out this week. Consumers should read instructions (printed in red ink) carefully. You must pay the bill at one of the banks and no other way, and don't forget that you save 50 cents by paying the bill on or before the 20th of June.

W. J. Prain now claims proprietorship of the only horse stable de luxe in Genoa. The place is really a well-appointed horse apartment, being painted throughout, with screens on the windows, electric lights, running water and all modern improvements, "except bath".

Mrs. O. M. Leich entertained in honor of Mrs. W. A. Lankton Monday afternoon. This was in the nature of a farewell party, for Mrs. Lankton left Monday evening for her home in Des Moines, Ia. After a ten days' visit with her parents, she will begin her chautauqua work for the summer.

Mrs. Lankton has her own company and is on the DeLuxe circuit of the Redpath Western Bureau.

Mrs. Chas. Adams was pleasantly surprised the fore part of last week, when about 30 of her friends and neighbors came in to help her celebrate her 69th birthday anniversary.

After several social hours were spent the hostess was presented with a half dozen of beautiful cups, saucers and plates. Mrs. L. B. Lott making the presentation speech to which Mrs. Adams responded in her sweet and pleasing manner. The guests were then ushered to the dining room where a bountiful supper waited them. All departed at a late hour wishing the hostess many more happy returns of the day.

INSURANCE—Call on C. A. Brown, Genoa, Ill., for insurance. Any kind, anywhere. If

City Could Use More Cats.  
It is estimated that there are in Paris 240,000 cats. The "official cats," which keep the museums and offices free of rats and mice, cost the state \$3 a head a year for upkeep, so that if the private cats cost an equal amount the total would be about \$750,000 a year, says the London Mail. But, judging by the number of rats one sees in the streets of Paris before dawn, feeding from the refuse boxes, several thousand more cats would be a good investment, for the amount of damage done by rats must be enormous.

**Our Annual Season's End Clearance of Coats and Suits Now in Progress.**

This Season's End Sale, which will be in force throughout the balance of this week, is unusual in more ways than one. Not only does this sale feature price reductions that mean savings of large sums from prices usually asked, but these reductions are on garments that are new and smart in style. Not garments carried over from previous seasons, but up-to-the-minute fashions purchased for this season's selling.

That's the big point with us: they were purchased for this season's selling, and that we are determined that they shall be disposed of this season in evidenced by the manner in which we have cut down the prices for this season's end sale.

Women's suits, usually \$49.50 to \$85.00, are arranged in three lots, priced at \$35.00, \$45.00 and \$55.00.

Women's full length coats that were \$39.50 to \$65.00, are on sale in two lots, at \$29.50 and \$39.50.

Women's and Misses' short coats, regularly \$29.50 to \$69.50 are on sale in three lots, priced at \$18.50, \$28.50 and \$38.50.

Children's Coats, sizes 6 to 14 years, usually \$16.50 to \$19.50, on sale into lots at \$11.95 and \$13.95.

Separate skirts of wool plaids, Polo checks, tricollette, Fan ta Sai and other leading materials, all desirable models, usually \$12.95 to \$25.00, on sale in two lots at \$9.95 and \$13.95 for choice.

Have you been inspected today?  
Back to the Republic.

President Carranza of Mexico has gone the way of the others. Its h— to be president of Mexico, or at least the man who attempts the job has taken a short cut to the above named winter resort.

Governor Lowden has "gone down" in his statement of expenditures as presidential candidate. And he now demands that others do the same. Fair enough, isn't it? Of course the governor has an "edge" on the others in that he is still his own man.

When Frank O. Lowden gets to Washington he will have one big job in calling in all the thousands of superfluous agents, clerks, detectives, collectors, inspectors and their deputies. You fellows who are now feeding on the crib had best be looking for a real job.

The Republican administration will release the throttle that is now strangling incentive to expand business operations, by modifying the

tax. Give us the one per cent tax on all sales, instead of taxing unfairly those who make the wheels of industry go around. The one per cent tax will reach everyone in proportion to his ability to pay. The man who earns a salary of \$25.00 a week could not possibly pay more than 25 cents tax a week, for he could spend no more. The man who spends more must pay more. We want to see Congressman Fuller's idea carried out and are waiting patiently to hear more from Washington.

Mr. Wilson himself has announced that the covenant of the League of Nations is the constitution of a new government—"the constitution of a world government," as he calls it, "the constitution of a new international system." That's just what we were afraid of all the time, and the president has only confirmed the belief of those who have opposed from the beginning of the controversy. If England, France, Italy, Greece, United States and others are to become as one government, then it stands to reason that all entering into the covenant must assist in maintaining the union. Yet, Mr. Wilson says that we will not be drawn into the quarrels of Europe. If we become a part of that new government we can in honor do nothing less than assume our share of the responsibility. When the people know the true meaning of the text of the League of Nations covenant, not one in ten would even consent to its adoption with Article X still a part thereof.

President Wilson insists that the United States assume the Armenian mandate. And he still assumes and insists that this is the will of the American people. He states that the American soldier is always willing to go wherever wrong assails the right. In one respect the president is right, the American soldier and American youth will always be ready to fight and die for the right, but we will qualify this remark some and not issue it in the broad sense as does Mr. Wilson. When questions of wrong and right directly or even indirectly involve the welfare of the United States and its citizens, the American youth is every ready to respond to the call. But when those questions involve the welfare of nations absolutely alien in language, thought, ideals and desires, and separated from us by thousands of miles of land and water, the American youth can not see where it is his duty to spend endless days away from home and shed his blood.

We view with horror the atrocities of the despicable Turk in Armenia and our hearts go out to the stricken people of that unfortunate land, but we must insist that it is the duty of

the neighboring Christian nations to advise Armenia back to health and prosperity.

If President Wilson must have our soldiers take up the task of maintaining a mandate, let him consider the Mexican situation, a situation and a question of right and wrong being so evident that all understand.

**Honored His Great foe.**

The Crystal palace, home of the British Imperial War museum, was the scene in its earliest infancy of a touching incident apparently unrecorded by any of Wellington's biographers. According to "Le Palais de Cristal," a French weekly published in London at the time of the great exhibition, "one day in April, when our workmen were busily engaged unpacking exhibits in the French section, the duke of Wellington appeared, in company with his daughter, the marchioness of Douro. He was expressing his interest in several products of French industry, when the workmen happened to open a case containing a statue of Napoleon. The duke stopped his conversation, removed his hat, and bowed his head. It was easy to see, both by the attitude of his body and the expression of his face, that the old soldier was deeply moved. There fell upon all present one of those deep spells of silence which imply more than an ocean of words."

**Maritime Omelettes.**

The "Pele Melo" (Paris) states in a recent issue that the eggs of the dog-fish possess all the nutritive qualities of ordinary farm eggs. Until lately, the dog-fish was quite neglected by fishermen and flung back into the sea as worthless, but today the fish is being actively sought by ships specially fitted for this class of fishing. The eggs of the dog-fish are frequently found as large as hen's eggs. Tortoise eggs are considered a great delicacy, and make excellent omelettes. They are, however, understood to be not adapted for boiling; the white of the egg does not harden as in the ordinary breakfast-table egg.

**Offended Dignity.**

Gertrude was on the lawn in front of the house, playing with the baby, aged two. Gertrude herself, not more than three times the other's age, was acting the part of mother. Presently along came a young man, who thought he understood children. "Good morning!" he said, taking off his hat. "How are you ladies today?" Gertrude looked at him with dignity. "Good morning," she replied, and went on attending to the baby. The young man stooped down, "Ah," he said, "and which is which?" "I'm Gertrude," replied the older girl, "and that's which!"

**The Source.**

"Experts tell us that, roughly speaking, one marriage in three results in divorce," began the chap with the fund of useless irritation. "Yes," the other chimed in, "and it's the roughly speaking part that causes most of the trouble."

**Were Built to Endure.**

The Egyptian engineer who built the famous water works at Aden constructed the masonry so well that the services of a plumber never have been required. These water works were built 3,000 years before the Christian era and are the most celebrated and antique in the world.

**The Art of Not Hearing.**

The art of not hearing should be learnt by all. It is fully as important to domestic happiness as a cultivated ear, for which both money and time are expended. There are so many things which it is painful to hear, so many which we ought not to hear, so very many which, if heard, will disturb the temper, corrupt simplicity and modesty, detract from contentment and happiness, that everyone should be educated to take in or shut out sounds according to his or her pleasure.—Exchange.

**EXECUTOR'S SALE OF REAL ESTATE**

By virtue of an order and decree of the County Court of DeKalb County, Illinois, made on the petition of the undersigned, Hattie O. Quanstron, executrix of the last will and testament of Peter A. Quanstron deceased, for leave to sell the real estate of said deceased, at the May Term, A. D. 1920 of said Court to-wit: On the 4th day of May 1920, I shall on Thursday, the 10th, day of June 1920, next, between the hours of ten o'clock in the forenoon and five o'clock in the afternoon of said day, sell at public sale, at the home property of said decedent, corner of First and State Streets, in the City of Genoa, DeKalb County, Illinois, the real estate described as follows to-wit:

Lot One (1) of Block One (1) Nichols Addition to Genoa, Illinois. The North Half (1) of Lots One (1) and Two (2) of Block Eight (8) of Stephen's Addition to Genoa Illinois. The East 70 feet of lot three (3) (also known as Tibbits Lot) of Block eight (8) of S. Stephen's Addition to Genoa, and the following described real estate; beginning at the Northwest corner of the Perkins Reserve in the Village (now City) of Genoa and running thence Easterly along and on the South line of the Lot heretofore owned by DeHah Tibbits (now owned by Peter A. Quanstron) 10 rods, thence South 8 rods, thence Westerly 10 rods, thence North 8 rods to the place of beginning, excepting and reserving a strip of land on the South side of the above described parcel of land now used, owned and occupied by the Chicago, Milwaukee & St. Paul Railway Company for right of way, said strip of land containing about .017 of an acre more or less.

A part of the Northeast 1/4 of the Southeast 1/4 of Section 24, in Township 42 North, Range 4 East of the 3rd P. M. beginning at a point on the North line thereof 207.4 feet West of the Northeast corner of the S. E. 1/4 of said Section 24, thence West on said North line 282.5 feet, thence South 26 degrees 10 minutes West 190 feet to the center of the State road; thence South 62 degrees 13 minutes East 416.1 feet along the center of said road, thence North and parallel to the East line of said Southeast quarter of said section 364.8 feet to the place of beginning, containing 2.092 acres.

The West One Half (1/2) of the following described real estate, commencing at the Northwest corner of land owned by Luke Nichols at a stake in the center of the road leading North from Genoa through Hickory Grove, running thence East on said Luke Nichols North line eleven rods, thence North six rods, thence West 13 rods, to the center of said Hickory Grove road, thence south along the center of said road to the place of beginning, containing seventy-two square rods; the said property last above described being situated at the Southeast corner of State and First Streets in the City of Genoa, DeKalb County, Illinois.

The said real estate above described to be sold free and clear and discharged of the trust deeds of George W. Buck, Earle W. Brown and Gilbert E. Stott of the judgment liens of Sprout-Waldron Company and A. L. Abbott and the dower and homestead interests of Hattie O. Quanstron.

Terms of sale Cash. Ten per cent of the purchase price to be paid on the day of the sale, and the balance upon approval of sale by County Court of DeKalb County and delivery of deed, the purchaser to give approved security, to secure the payment of the balance of purchase money.

Hattie O. Quanstron  
Executrix of the last will & testament of Peter A. Quanstron deceased.

COUGHED FOR 2 YEARS ORDERED TO DENVER

Doctor said she couldn't get well in Illinois, but she did.

"I had a very bad cough for two years, all the time, day and night. Could sleep but little. I tried everything but got no relief. Finally my doctor said he could do no more for me, that I had better go to Denver, as I couldn't live in Illinois. Then I tried Milks Emulsion. From the very first it helped me. By the time I had taken 15 bottles my cough left me entirely. I have gained in strength and flesh and am now in perfect health."

Build up your system and give it a chance to fight off disease. Milks Emulsion costs nothing to try and it has done the work for thousands of others. Milks Emulsion is a pleasant, nutritive food and a corrective medicine. It restores healthy natural bowel action, doing away with all need of pills and physics. It promotes appetite and quickly puts the digestive organs in shape to assimilate food. As a builder of flesh and strength, Milks Emulsion is strongly recommended to those whose sickness has weakened, and is a powerful aid in resisting and repairing the effects of wasting diseases. Chronic stomach trouble and constipation are promptly relieved—usually in one day.

This is the only solid emulsion made, and so palatable that it is eaten with a spoon like ice cream. Truly wonderful for weak, sickly children. No matter how severe your case, you are urged to try Milks Emulsion under this guarantee—Take six bottles home with you, use it according to directions, and if not satisfied with the results your money will be promptly refunded. Price 60c and \$1.20 per bottle. The Milks Emulsion Co., Terre Haute, Ind. Sold by druggists everywhere.—Adv.

What's in a Name?

"A printer informed me recently what the 'Evansville Bar Association' really is," said Joseph H. Igleheart, secretary of the Evansville association.

Mr. Igleheart recently ordered printed a number of licenses to be granted to members of the association. When a copy of the proof was shown him, he discovered that the words "Evansville Bar Association" were in unusually large type.

"What do you think these licenses are for—saloonkeepers?" inquired Igleheart of the printer.

"Why, certainly; what else does the word 'bar' mean?" was the printer's response.—Indianapolis News.

"Diamond Dyes" Tell You How

A Child can Follow Directions and get Perfect Results

Each package of "Diamond Dyes" contains directions so simple that any woman can diamond-dye a new, rich, fadeless color into worn, shabby garments, draperies, coverings, whether wool, silk, linen, cotton or mixed goods. Buy "Diamond Dyes"—no other kind—then perfect results are guaranteed even if you have never dyed before. Druggist has color card.—Adv.

Honey Yield Higher.

The average yield of surplus honey in 1919 was 50 pounds to a colony of honey bees, as estimated by the bureau of crop estimates, United States department of agriculture. This is considerably above average of 45 pounds in 1918, and of 41 6-10 pounds for the five years 1913-1917. The relative proportions in which the honey of the last two years was marketed are indicated by 59 for extracted honey, 31 for comb honey and 10 for bulk honey. About one-third of the product goes to "outside" markets.

If You Need a Medicine You Should Have the Best

Have you ever stopped to reason why it is that so many products that are extensively advertised, all at once drop out of sight and are soon forgotten? The reason is plain—the article did not fulfill the promise of the manufacturer. This applies more particularly to a medicine. A medicinal preparation that has real curative value almost sells itself, as like an endless chain system the remedy is recommended by those who have been benefited, to those who are in need of it. A prominent druggist says: "Take for example Dr. Kilmer's Swamp-Root, a preparation I have sold for many years and never hesitate to recommend, for in almost every case it shows excellent results, as many of my customers testify. No other kidney remedy has so large a sale."

According to sworn statements and verified testimony of thousands who have used the preparation, the success of Dr. Kilmer's Swamp-Root is due to the fact, so many people claim, that it fulfills almost every wish in overcoming kidney, liver and bladder ailments; corrects urinary troubles and neutralizes the uric acid which causes rheumatism. You may receive a sample bottle of Swamp-Root by Parcel Post. Address Dr. Kilmer & Co., Binghamton, N. Y., and enclose ten cents; also mention this paper. Large and medium size bottles for sale at all drug stores.—Adv.

Sample Submitted.

Visitor—Are you good at your work? I am very particular about the way my hair is cut.

Village Barber—Well, I'm reckoned fairly decent; but, if you like, I'll do one side of your head first so that you can see for yourself.—Der Brummer (Berlin).

No Prohibitionist.

"Don't you think James has a great deal of dry wit?" "Yes, but I would like more spirit in it."

CHAPTER XI.—Continued.

She had rushed to the adjacent room. The door slammed. The key turned in the lock. He stared at the barrier. When he spoke to Otis, who had renewed his attack with redoubled frenzy and threats of legal punishment, he was markedly calm.

"I will go quietly now"—putting his antagonist aside. "I apologize for what I've done."

As he descended the staircase, leaving Otis with his daughter, the bey of servants in the hall ceased their excited whispering, and rendered him silent awe.

Fitzhugh did not go to his office the following day, but motored far out along the north shore. His mind was a blank until his car was turning in and out through the mesh of traffic in State street. The newsboys, ever vociferous at the day's end, seemed to have an uninvited note of excitement in their hoarse cries of "Extra!" Delayed at Monroe street by a policeman at the crossing, he tossed the newspaper on the corner a quarter-dollar and ordered all the papers. The first one he opened was a pink-and-black sheet, damp from the press, and blazing on its first page this:

WOMAN WOULD KILL RUSSIAN ENVOY. DIES BY OWN HAND.

This much he read in one hurried glance. What followed he devoured in snatches, getting the gist of the matter in a minute's perusal:

"Esther Strom . . . Anarchist plot . . . Assassinate ambassador . . . B. & O. station . . . Secret Service . . . Swallowed prussic acid . . . Found dead in cell."

CHAPTER XII.

Fitzhugh awakened next morning to the ringing of his telephone. It was Hunt. He cut short the flood of questions, and, still in his pajamas, got a small valise from a closet and began filling it with shirts, collars, and such other articles as a man needs for a short journey.

When he reached his office, for twenty galvanic minutes, without a wasted word, he outlined concisely what he wanted done during his absence, considering and settling various problems that in the interim might arise. Perceiving the flight of time, he snatched his hat from the floor, and, with Hunt trotting along beside, hurried to the elevator, still giving directions and advice. Down the elevator shaft, through the rotunda of the first floor, to the automobile in Adams street, and thence to the railway station, he continued the terse counseling.

As he dashed into the Grand Central station, ran down the midway toward his gate, the conductor called "Board!" and his train pulled out. He caught the last Pullman as it moved from the shed.

Fitzhugh returned from Washington in four days, a changed man. There had been little he could do; so little, indeed, that he felt his trip had been wasted. He had located some members of Esther's family and had given them, quite anonymously, a sum of money larger than any they had ever known. Then he took a train for Chicago. There was nothing else to do. But he could not forget. Vividly against the background of his mind were marshaled all Esther had done for him, all her little acts of kindness, her unselfishness, but doglike devotion. And then he would think of the requital he had made. His memory flogged him pitilessly. He thought of how he had left her alone with Nikolay that morning, of his incompassionateness the last time he saw her alive, of the death-dealing message he had sent, the needless cruelty. "Brute!—I was always a brute to her."

It was nearly eleven when he reached his office. He had come directly from his apartment in his automobile, and wore a motoring cap and coat, unessentials both, the last of which effectually concealed all apparel beneath it from the collar down. Hunt, coatless and with his shirt sleeves rolled to his elbows, sat at the great flat-topped desk in the inner sanctum, head over heels in the day's work.

With a brief excuse for his tardiness, Fitzhugh took the chair at the opposite side of the desk and scanned some important papers requiring his signature, conversing busily with Hunt as he read. He had signed but one of them, when, with an ejaculation upon the warmth of the weather, he flung off his cap, and loosening the clasps of his coat collar, walked into the adjacent room.

In a few minutes he reappeared; and, having discarded the motoring duster, he was outwardly transformed. Snow-white ducks, white outing slippers, with stitken hosiery shimmering where it showed, a soft white shirt,

through the attached collar of which was looped a voluminous tie of blood-red hue, a crush hat, white as an Easter lily, turned up in front and down behind and encircled by a crimson ribbon—these made up his attire.

"You look like the epitome of a comic opera," Hunt laughed, aside from the phone. "Whither away? Yachting?"

"No," replied Fitzhugh, appending his signature to the rest of the papers. "No, I'm not going yachting." He put down his pen, picked up his cane, stood up. "I'm going into the pit."

"But what the—" Hunt, who had half-risen from his chair, sank back, bewildered. "What the dickens do you want to expose your hand for, Dan?" Danfel showed his teeth in an odd grin. For an instant it somehow suggested to the other something sinister—like a wolf baring its fangs.

"Better come along and watch me, Hunt,"—starting toward the door. "I'm going to give 'em something to talk about. Coming?" He waited at the door, flapping his cane against his immaculate trousers.

And this day began a spectacular flourish of showy histrionics unrivaled before or since on the Chicago Board of Trade. During the rest of the day's session in the wheat pit, Fitzhugh, the actor, was the center of all attraction. The visitors in the gallery remarked him and pointed him out to one another; the speculators, dealers, brokers' clerks, officers of the board, all those whose duties brought them on the "floor," soon or late found their attention directed toward him. His extreme height, emphasizing his unusual garb, rendered him strikingly conspicuous among his fellows. Of them all he was the only one who stood out distinctly. He was the only one of his sort. The dramatic scene comported with him. He was in his native element. This was the moment he had dreamed of long ago when he had stood yonder in the visitors' gallery, his whole being keyed to the martial pitch of gold that screamed to him from the battlefield.

But how different the realization! None of those who clamored about him, chafing him, seeking to take advantage of what seemed to them a mental aberration, knew he was being tortured by a ghost. The ghost of a woman of raven hair and olive skin and sad, accusing eyes that ever reproached him, that ever seemed to say: "You were cruel, Daniel—always cruel." They did not know that when often he gesticulated to no end, or that when he thundered his loudest and appeared most abandoned to the feverish excitement of the pit, the upbraiding of the ghost were cutting him to the quick, were lashing him the hardest.

"What the Dickens Do You Want to Expose Your Hand For, Dan?"

As the days passed Fitzhugh's passion for "showing off" increased amazingly. Ever prolific with freaks of acting, he kept his associates on tenterhooks of curiosity. None could imagine what he would do next. He always did the unexpected. Nothing was too fantastical. Once during a Saturday noonhour he started a furore in the rotunda of the board of trade by striding through the crowd playing boisterously on a mouth-organ, while round him capered several monkeys, borrowed from some Forquer street Italians; anon at a dinner in his apartment one evening he received his guests in fur paint and feathers and the full regalia of an Indian chieftain.

Yet those who knew him intimately—as Hunt and two or three others—were not long in noticing a change had come over him. When he thought he was unobserved he was given to long periods of brooding, and, as they rightly supposed, all his bizzarerie was not the real Fitzhugh, but only a mask, all his theatrical excitement not genuine, but only a cloak for an inner happiness.

It was during one of these dark periods that he stole secretly away—not even Hunt knew of his whereabouts—and for nearly a week was unseen in Chicago. The day he returned he went to his safety deposit vault and locked therein a packet of papers. These papers, obtained at great price and with commensurate difficulty, were the deeds to the Fitzrandolph homestead in Maryland. And still he was not happy. Still there remained the void, the dull gap he could not fill.

Time and again during his first year of grief Fitzhugh had endeavored, with characteristic audacity, to see Kathleen, but always substantially in vain. He had followed her to Newport, whence she flew with her mother after the rupture, found she had sailed the day before for Switzerland, had taken the next steamer, only to miss her again, and for three months had played battledore-and-shuttlecock with two defenseless women over the major part of the continent, often staying in the same hotel, yet never catching more than a fleeting glimpse of the one he loved.

All efforts at communication were likewise fruitless. His letters were returned unopened. His gifts, too, when they returned home in the autumn he had ordered a box of violets delivered to Kathleen every morning. The florist was an honest man, and at the month's end he had rendered a bill only for carriage.

But Fitzhugh died hard. For three years he never gave up trying. Then the last gleam of hope flickered out.

She was abroad most of the time now, returning to Chicago only at rare intervals, and then but for a brief stay. He heard that Artie Sparkle was often with her, and sometimes at the club there were rumors of—

But he laughed loudly at these. He refused to listen. The idea was preposterous—absurd. Yet it was nevertheless true that this gossip of Kathleen's engagement to Artie immediately preceded some extraordinary performance that kept the name of Fitzhugh on the lips of thousands for weeks afterward. As another man would have turned to drink, so he turned to stage extravagance. Unconventionality was his dissipation, and in his own way he became intoxicated.

Some four years after that day in June—four years in which he had seen Kathleen less than a score of times and had spoken to her less than thrice—Fitzhugh laid the foundation of the throne upon which he was to reign for a brief but blazing period as King of Wheat. These four years had bred an unwholesome change in the man. The amassing of gold had become his religion. Its virus had entered his soul. He allowed nothing to stand between, crushing all opposition with an iron hand. Everything was subservient to but one end, and that end was Money. All his faculties, all his tireless energy and zeal and ambition were concentrated upon it. Waking or asleep, he thought of it was always uppermost. Hunt, in the erratic meanwhile, had courageously piloted the deserted ship, knowing his rightful captain would again take the helm when "he came to himself." More than any other, Henry Hunt enjoyed the full confidence of his chief. He was one of the very few who knew Fitzhugh's real name and family history.

At irregularly recurring periods Fitzhugh entered the wheat pit, and while these instances were generally emblazoned with a burst of histrionics, he was never for a second blinded by the glare. When he seemed most ebullient he was really most cool-headed. He fooled the pit traders. They could never quite penetrate his "bluffing." They perceived his propensity for posing, and made the mistake of thinking him too self-centered to be alive to his surroundings. While they were pitying him for his rawness, his crudities, and confidently expecting his downfall, he would astonish them by executing some brilliant coup that suggested deep-laid plans as splendid as his daring.

When in the conflict of the pit every fiber of his being was quiveringly alert. Seemingly absorbed in thinking of himself and the effect of his postures, he was searching his opponents' faces for the slightest trace of meaning. Not a tremor of that higgledy-piggledy turmoil escaped him. Ear and eye were quick to grasp every variation. He was instantly alive to every trick, every subtlety. He was swift to seize upon the merest opening, swift to attack the first unprotected spot. He was the shrewdest of them all, and he played a game none could understand. Outwardly, the greenest of bunglers at it, secretly he maneuvered with a master hand.

It was in the winter of this year that Fitzhugh went deepest into the wheat pit. He plunged in farther and farther, and with such apparent recklessness that many times Hunt held back, counseling a slower and more cautious gait. But the leader was obdurate. He would listen to no advice. He rushed yet deeper into the pit, dragging his hesitating follower with him. Ensued long months of doubt and uncertainty—months that ground down the nerve of one and tried the mettle of the other. There were times when it seemed they would be wiped out utterly. Their combined fortunes were tied up in the deal to the last cent. All hung in the balance. It was the biggest thing Fitzhugh ever engineered. If it went the wrong way they would be crushed under it and obliterated.

(TO BE CONTINUED.)

Have You One?

A stone is considered precious if it is perfectly transparent, is bright and clear in color and possesses great brilliance.

BREAD BAKED IN DIFFERENT WAYS

Whatever Method Is Used Resulting Loaf Should Be Appetizing and Wholesome.

LARGEST SINGLE FOOD ITEM

Some of Points Which Cause Failure Are Wrong Selection of Materials and Utensils—Essentials Are Urged by Specialists.

(Prepared by the United States Department of Agriculture.)

Bread is the largest single item of food in the diet of the great majority of people, and of the staple foods probably no other can be so easily spoiled in the preparation. Some women, after a few failures in bread making, give up the attempt and buy their bread. Very many of us are partial to home-made loaf. In many localities it is necessary to bake bread at home, in others it is a convenience, and in very many it is done from choice. It is not difficult to make good bread, and it is worth while to learn to do so.

Some of the points which cause failure in bread making are the wrong choice of materials and utensils; lack of absolute cleanliness; carelessness in measuring the ingredients; poor methods of mixing and molding and improper care of the dough while it is rising; also wrong care of the bread while it is baking; or wrong care of the loaves after they are taken from the oven.

The necessary materials for bread making are flour, water, salt, and yeast. The materials occasionally used are milk, sugar, and fat. Good wheat bread can be made by a number of processes. Three recommended by the United States department of agriculture food specialists follow:

- Short or Straight-Dough Process. 2 cups lukewarm milk, 1/2 cup liquid yeast, 1/2 cup water or 2 teaspoons salt, mixture of the two, 2 tablespoons sugar, 1 cake compressed Fat, if used, 2 table-yeast, or spoons or less. 1 1/2 cups lukewarm milk, 6 cups or 3 pints milk, water or a sifted flour, mixture of the two.

Original bulk of dough, 1 quart; bulk when ready to be made into loaves, 2 1/2 to 3 quarts. This will make 2 loaves.

Boil the water or scald the milk. Put the sugar and salt (and fat, if used) into a mixing bowl. Pour the hot liquid over it and allow it to become lukewarm. Mix the yeast with a little of the lukewarm liquid and add it to the rest of the liquid. If convenient, set this aside in a warm place, not over 86 degrees Fahrenheit, for 1 hour; if not convenient to set it aside, add the flour at once, putting in a little at a time and kneading until the dough is of such consistency that it sticks neither to the bowl nor to the hands. This requires

After the Baking Place Bread on a Rack in a Clean Place Where the Wind Can Blow on It.

about 10 minutes. Cover, and allow to rise 1 1/2 hours at a temperature of 86 degrees; it may be better to set it at a lower temperature, but the lower the temperature the longer the time required for the rising.

Cut down the dough from the sides of the bowl; grease the hands slightly. Knead a little and set aside to rise again for 1 hour. With a good bread flour, the dough should treble its bulk in each rising. With a soft wheat flour, it should not rise much beyond twice its volume. Divide into portions, mold, and place in greased pans of standard size (1 1/2 quarts). Allow to rise until a light touch will make a slight dent. With good bread flour this happens when the dough reaches the top of the pans. Bake 50 minutes in a medium hot oven.

Overnight Sponge Method.

Use the same proportions as for the short process, except in the case of the yeast, which should be one-eighth cake of compressed yeast, or 2 tablespoons of liquid yeast for each loaf. Use water rather than milk. In the evening mix the yeast with water, salt, and half of the flour, and beat thoroughly. Cover and place at a temperature of 65 to 70 degrees Fahrenheit, or that of an ordinary room. In the morning add the sugar and the rest of the flour and proceed as in the case of the short process.

SUBSTITUTES DO NOT REPLACE FRESH EGGS

Dish May Be Acceptable, but Food Value Is Not Same.

Flour or Starch May Be Used to Give Same Appearance, but There Is a Great Difference in the Composition.

Many housekeepers know it is possible, when eggs are lacking, to use other foods which will give something the same appearance as eggs. Flour or starch may be used to thicken custards or gelatin used in making an icing or a pudding. The dish may be acceptable, but the food value is not the same as if eggs were used, say home economics specialists of the United States department of agriculture.

There are a number of commercial products designed as egg substitutes, some of which approach eggs in composition much more nearly than others. Of these products, some are fairly well known to housekeepers while others are used chiefly in commercial baking and for similar purposes. The various kinds differ much in composition, some being much more like eggs in protein content and energy value than others. In judging such products one should not rely upon appearance. Yellow color does not necessarily indicate other egg yolk characteristics. Some of these egg substitutes, at least, are manufactured from skim milk and are said to contain milk casein and albumin mixed with a little flour. Such a product is evidently rich in protein. Other egg substitutes have been devised which consist of mixtures of animal or vegetable fats, albumin, and starch or flour.

Goods have also been marketed for use as egg substitutes which contain little or no albumin, but which are apparently made up quite largely of starch, colored more or less with some yellow substance. They are commonly advertised for making custards and puddings similar in appearance to those in which fresh eggs are used. If the housekeeper wishes to use them she should not overlook the fact that in the diet they cannot replace fresh eggs, since they do not contain the same kind or quantity of nitrogenous matter, particularly if such an egg substitute is used in the diet of invalids or children in the belief that it contains the same nutrients as eggs.

MAKE YOUR BROOMS AT HOME

Machines by Which 25 to 30 Can Be Turned Out in Day Are Used in Some Communities.

Well-made brooms command good prices, and in the southern states where broom corn grows well the home demonstration agents, under the supervision of the United States department of agriculture and the state colleges, are encouraging the growing of brush and the making of brooms. Alabama produces excellent broom corn, and the number of club girls in that state who are interested in this work is increasing. Broom machines by which 25 or 30 brooms can be turned out in a day are being bought in some of the communities where the work is well started. These are rented to the club members, who usually pay in brooms for the use of the machine. It costs about 20 cents to make a broom. When a girl has learned to make a perfect product she is allowed to use the label, "Home Demonstration Club Broom," on any she wishes to sell. Many of the club girls plan to pay college or normal school expenses with the proceeds from their broom work.

GIVE FLIES FULL ATTENTION

Little Labor With "Swatter" Now Will Reduce Greatly Number to Be Fought Later On.

Give your full attention to the extermination of the flies that have liberated all winter and are now commencing to buzz around, urges the United States department of agriculture. A little labor with a "fly swatter" now will reduce by hundreds if not thousands the number which must be combated this summer.

Keep track of the condition of your gas stove.

Some form of salad should go with any kind of hot chicken.

The nearer to the surface the eyes of a coconut are the fresher it is.

In the household without a maid, a table wagon is a great convenience.

Baked bananas melted with cinnamon and powdered sugar are delicious.

Raisins are said to be richer in mineral matter than any other dried fruit.

Use a three-sided carpet needle—a straight one—for sewing on shoe buttons.

A handful of chopped ham added to the soft dough of drop biscuits is savory and appetizing.

Get Back Your Health

Are you dragging around day after day with a dull headache? Are you tired, and lame mornings—subject to headaches, dizzy spells, and sharp, stabbing pains. Then there's surely something wrong. Probably it's kidney weakness! Don't wait for more serious kidney trouble. Get back your health and keep it. For quick relief get plenty sleep and exercise and use Doan's Kidney Pills. They have helped thousands. Ask your neighbor!

An Illinois Case

Jack Kirby, Backsmith, 408 Avenue C, Sterling, Ill., says: "My kidneys were weak and my back was lame. When I tried to shoot a horse, sharp pains would shoot through me. The kidney sections passed too often and were scanty and highly colored. I also had headaches and dizzy spells. Doan's Kidney Pills knocked the pain out of my back and regulated my kidneys. The other trouble is gone."

## Taxes on Corporations Should Be Repealed and Entire Incomes Taxed.

By R. G. ELLIOTT, Nat'l Ass'n of Credit Men.

If the world war has not been fought in vain, then benefits will accrue to posterity by reason of the sacrifices of the present generation. Is it not reasonable then that posterity should bear some of the financial burden arising out of the war?

The country is being injured by the present unjust and confiscatory tax laws which should be revised at once.

The time for retiring the war debt should be extended. The government should be conducted on a sound economical business basis. The annual budget should be cut to the minimum that taxes might be reduced to a point where they would cease to curb productive energy.

As the income of the individual must, in the last analysis, bear all the taxes, the laws should be revised so as to tax directly that income at rates which will raise the necessities of a minimum federal budget.

This means that the taxes on corporations should be repealed, for a corporation is just a group of people, many of them of small means, who are being taxed unjustly through their share of their corporation's profits being taxed at high rates.

If the tax was placed on the entire income of every individual, then no income would escape taxation. None would be taxed more than once and it could all be taxed once and equitably.

This ideal situation is now reached with respect to individuals in business and private individuals, also individuals conducting business in partnership.

If corporations are permitted to retain a limited portion of their earnings for capital requirements, which seems necessary, practical difficulties make it seem unwise to tax the stockholders in general on these earnings which they do not actually receive.

A graduated tax on the undistributed earnings of corporations would be the practical solution of the question and should be at rates that would encourage distribution of dividends. Should the business need additional capital and the stockholders so desire, reinvestment could be made after meeting the tax obligations.

## We Must Begin by Making It Possible for the Farmer to Handle the Job.

By H. A. MOEHLENPAH, Federal Reserve Board.

Money and credits should be mobilized and swung to the weakest place in our whole economic program and put behind the farmer in sufficient amount as he goes to his summer's work, to make it possible for him to make good on the task we have laid upon him.

Our government, through the operation of the federal banks and the joint stock land banks, can do much by way of extending credit for long time at low rates. But it remains for the country banker to use these long time credit facilities of the government so that he may always have ready and ample funds with which to meet the short time credit demands of the farmer and other legitimate demands of his community.

Greater production in all lines is urged by statesmen and economists. Financiers are admonished that every available American dollar should be turned into productive channels. But if we are to increase the nation's output of essential products we must begin by making it possible for the farmer to handle the job we have cut out for him.

Otherwise, not only will there be a shortage of food and clothing, but there will be also stagnation in many related industries. So, let's get behind the farmer.

## "Millions of American Women Seem to Be Simply Fashion Mad Today."

By REV. DR. J. R. STRATTON, in "Menace of Immorality."

We cannot escape the unpleasant fact that millions of American women today seem to be simply fashion mad. They are nothing else but slaves to "style."

Women are complaining today of the "double standard of morals," and they do right to complain; but in heaven's name let them be consistent, and not by their mode of dressing, their dances, and other follies unconsciously foster the very double standard of morals which they so righteously denounce.

A fossilized octogenarian or a self-complacent mollycoddle with ice water in his veins may be able to look at the sights which any man can see in modern society today, and in the dance hold in his arms a throbbing, beautiful young woman with almost half her body exposed and the other half clothed largely with good intentions—such a man, I say, under these circumstances may maintain a philosophical calm, but any young fellow with red blood in his veins and the elemental forces of nature operating in him cannot easily do so.

## "We Have the Best Form of Government; We Need Not Be Afraid of It."

By W. L. HARDING, Governor of Iowa.

In my opinion the best government is the one that governs least. We must get back to government conditions as they existed before the war. We must localize government.

The federal government has its functions, and they are well defined. The same is true of our local governments. But during the war period there has been great encroachment on the part of the federal government on the prerogatives of our local institutions.

The best way to tackle our economic unrest and to meet the reds in their attempt to Russianize America is to carry on an aggressive campaign of education, telling the people of our institutions and the rights and privileges of the individual citizen under our form of government.

We have the best form of government that has ever been conceived by man—we need not be afraid of it.

## BANDIT FIGHTS 50 IN THEATER

Robs Bank of \$20,000 and Seeks Refuge in Deserted Movie.

### CRAZED FROM DRUGS

Makes Last Stand in Orchestra Pit and Shoots Police as Fast as They Appear—Bullet Finds Him.

St. Louis.—A bandit killed one police officer, seriously wounded three others and himself was killed when he held up and robbed the Easton-Taylor Trust company here of \$20,000.

The bandit, carrying a revolver in each hand, entered the bank shortly after three o'clock. There were 15 customers in the bank and he herded them and the employees in a private room and began firing the revolvers.

A riot call was sounded, and 50 policemen, heavily armed, responded. The bandit obtained the \$20,000 from Louis F. Schneider, the cashier, and sought refuge in an adjoining theater which was empty at the time.

Battle Lasts Twenty Minutes.

The police surrounded the theater. The bandit used the orchestra pit from which to shoot and would rise over the top of it and fire as the patrolmen entered.

The battle lasted nearly 20 minutes. Crouched in the pit, he was hidden in the darkness, while the policemen were silhouetted against the light as they entered.

Policeman Terrence McFarland was shot through the heart and died instantly. Patrolman Claude Adams was shot in the abdomen.

The wounded are Sergeants William McHenry and Michael Flavin and Patrolman Claude Adams. Patrolman Otto Glaser was wounded slightly by a bullet from a policeman's revolver.

Police said the man's conduct indicated he was crazed from drugs. The money was found concealed in his clothing.

Opened Fire at Once.

John R. Langan, president of the bank, told the police the man began firing as soon as he entered, and that one of the bullets passed through his hair. Several women fainted. The

Fire as the Patrolmen Entered.

robber was shot in the face so badly that police said it probably would be impossible to identify him.

The dead bandit was identified later as Frederick C. Smith, an electrician. According to Mrs. Minnie Smith, the widow, her husband suffered congestion of the brain in a railroad accident seven years ago. She believes he was mentally unbalanced and called him a "model husband."

### MAN CATAPULTS SIX STORIES

Just Grins and Rubs His Bruises When Spectators Rush to His Aid.

New York.—Charles Butter, a window cleaner, slipped off a seventh floor ledge of the office building at 85 William street. After leaving the ledge his body performed a somersault, so that his head was pointed downward during most of the journey. As he approached the end of the journey he managed to bring his body to a horizontal position, just as he crashed into a skylight, covered with wire screening. The glass broke, but the screen held. Employees hurried out to ascertain the worst, but Butter grinned and rubbed his bruises.

### MAN JUMPS INTO COKE OVEN

Body Is Entirely Consumed in Minute by Intense Heat of Great Furnace.

Colonial, Pa.—All traces of the body of Michael Goodish, eighteen years old, a charger in a mine of the H. C. Frick Coke company, here, were gone in less than a minute when he leaped into a live coke oven. Fellow workmen saw merely a puff of smoke as the young man entered the oven.

Goodish jumped from the path of a runaway lorry and landed in the oven.

### NATURE'S LOVELIEST MOOD

May is the sweetest month. Nature is in her loveliest mood, the lilacs and jasmynes fill the air with their fragrance, the birds sing rapturously, and everybody enjoys the balmy breezes.

Only those who suffer from stomach troubles do not feel that life is sweet. The delights of life are lost, if headaches, sleeplessness and poor appetite begin to torment you. But why do you suffer? Triner's American Elixir of Bitter Wine is sold at every drug store. It cleans the intestines, keeps the bowels open, helps digestion, and you need not stand in fear of indigestion, constipation and various troubles connected with stomach disorders. Keep also other Triner's remedies at home, because they always give quick relief. Triner's Liniment is excellent for neuralgia, sprains, swellings, tired muscles or feet. Triner's Cough Sedative is the best remedy for colds and coughs.

—Joseph Triner Company, 1333-43 S. Ashland Ave., Chicago, Ill.—Adv.

### Wild Beasts' Toll in India.

Not a day passes of your own life but somewhere in India some 50 people have died through the action of wild beasts. It is not to be supposed that efforts are not made to destroy these monsters. Standing rewards are offered by the government for the killing of all the more dangerous types. But so wild and impenetrable are their sanctuaries that it is impossible to do anything except to keep their number within bounds in the more populous territories.

### He Knows Best.

Postess—You can't dance? Non-sense! I saw you dancing with Miss Jones the other night.

The Guest—Yes, and she hasn't spoken to me since.—London Tit-Bits.

### MORALE AIDED BY MUSIC

Fact Brought Out by the War Bound to Have Great Effect on Future Generations.

"Music makes morale," and so promptly music was enlisted in the war. Song leaders were appointed at all the training camps and immediately the glory of real music was spread before the millions of men as a reinforcement and aid to the idealism which had brought them into the war.

From then on the soldiers had music individually, in masses, in groups. They made it themselves, it was made for them by our finest artists. They had phonographs. They had records by the millions. The process of musical education was swift, and the pupils were apt. Now they have returned to us men who know good music as a large part of their life and entertainment, have become reasonably apt performers themselves in a great many cases. What must this mean to the country? It must mean that the people as a whole are readier than ever before to listen to it as well as to be taught it.

### Shave With Cuticura Soap

And double your razor efficiency as well as promote skin purity, skin comfort and skin health. No mug, no slimy soap, no germs, no waste, no irritation even when shaved twice daily. One soap for all uses—shaving, bathing and shampooing.—Adv.

### Unique Specimens.

"The only thing," solemnly said Professor Pate, "that walks back from the tomb with the mourners and refuses to be buried is character."

"Just so!" replied Festus Pester. "And the only thing that comes back from the cemetery giggling and on the dead run is the rickety old widower who figures on—ee-hee! hee!—marrying again."—Kansas City Star.

## A BUSINESS TRIBUTE

By William I. Ferris, Vice-President and co-worker in the L. E. Waterman Company from its beginning

The world has always taken an unusual interest in inventors, probably because it recognizes that inventors, as a rule, are unselfish and that whatever reward they may gain through their invention has to be a by-product of a greater service or saving of time and labor to his millions of fellow men and women.

Howe invented the sewing machine, but the whole world enjoys the benefit of it. Likewise is the case with Morse and the telegraph; Bell and the telephone; Edison and the electric light; Fulton and the steamship.

There is no use trying to arrange them in the order of their importance in the world to-day because to de-

FRANK D. WATERMAN

prive us of any one of them, even for the briefest of periods, would amount to almost a calamity.

I do not hesitate to add the name of Lewis Edson Waterman and his invention, Waterman's Ideal Fountain Pen, to this list of world benefactors.

The history of Waterman's Ideal Fountain Pen has a peculiar personal interest for the people of Illinois because she can rightly claim Lewis Edson Waterman as one of her sons.

As a child, he came with his mother and younger brother and settled in Kankakee, and it was in the little old wagon shop, conducted by his brother, Elisha S. Waterman, that the first model of Waterman's Ideal Fountain Pen was turned out in wood.

Back in those old days, the gold pen and rubber-turning industries were located wholly in the East, requiring that the business of fountain-pen making be carried to the source of supply, and so in the smallest possible way the L. E. Waterman Company's business was established in New York.

Mr. L. E. Waterman made his principal headquarters in New York up to the time of his death, while his brother, Elisha S. Waterman, assumed the interest of the Company in the West for the short time he lived. The Chicago office was opened at the same time the business was started in New York, and for many years was conducted in the most modest circumstances.

It has been said by some writer, "the name Waterman started as a

WATERMAN BUILDING, 129 SOUTH STATE STREET, CHICAGO, ILL.

man—became a pen—and is now a world-wide institution." How true that is can be shown by the great growth of this truly wonderful business. From the early beginning in the little wagon-making shop in Kankakee, and the equally insignificant work-bench at the back of a cigar store on Fulton Street, New York, where pens were made by hand—and the total output then was 200 in a year—to 5,000,000 Waterman's Ideals sold during 1919, is an achievement that tells its own story. It would be interesting to show the buildings, step by step and year by year that have been erected to care for the physical growth of this splendid industry. The first factory was a little, two-story, frame building; to-day the business of the L. E. Waterman Company occupies five factories; two in New York,

two in Seymour, Connecticut, and one in Canada. Ground has been purchased in Newark, New Jersey, whereon the Company is about to build another great factory covering 500,000 square feet of operating space. In Chicago, the business was first established and carried on at a desk in the rear of the Congregational Book Store, on Wabash Avenue. After many years at that point, a new location was found over on State Street, at the present North American Building site. When the new North American Building was being erected, the Company moved to the Republic Building, going from there to 115 South Clark Street, where offices have been maintained for the past ten years. Then again it was found necessary to seek enlarged quarters in order to better serve a constantly

growing number of dealers and users in the middle west, and on Monday morning, May 10th, what will be known as the Waterman Building, at 127-129 South State Street, was opened for business. To meet the demand, the Company found it necessary to erect their own building, and on the property directly adjoining the old Palmer House, a modern, up-to-the-minute seven-story building will become the new Chicago home of the L. E. Waterman Company, and add glory to the best traditions of this splendid old organization. The New York service store of the L. E. Waterman Company, at 191 Broadway, known as the Pen Corner

FRED S. WATERMAN

throughout the world, has often been said to be one of the most artistically correct and magnificent display rooms to be found anywhere, but the architects promise to out-do even that last effort, and Chicago will have every reason to include this newest addition to its already long list of show places. With the upper floors devoted to stock and assembling rooms, the Company will be better able to handle the great volume of middle-west business, and the new Waterman Building is but another evidence of the keen judgment that anticipates conditions and makes good the statement—satisfied customers everywhere.

Mr. Frank D. Waterman, President, and Mr. Fred S. Waterman, Secretary, of the L. E. Waterman Company, through combining their unusual abilities and mastery of detail, have given evidence of what team-work can accomplish, for after all is said, a man's business is but the reflection of the man himself. The fidelity of hundreds and hundreds of employees testifies more eloquently than anything else how the personality of the Waterman boys has fixed itself upon their organization.

It is what might be termed the Waterman way of doing things—establishing the highest standards for themselves and then living up to them. You know it is because of these qualities that success has come to them, and their product, because a record of steadily increasing sales, year after year, and in one country after the other, carries its own answer.

confined to her home on account of ill health.

Mr. and Mrs. J. F. Aurner are the owners of a new five passenger Dodge.

John Helsdon of DeKalb spent Sunday with his parents, Mr. and Mrs. John Helsdon.

Mrs. Donnelly Gray and daughter, Mrs. F. R. Scott and son, Junior, Mrs. E. W. Brown, Mrs. Lewis Scott and Mrs. Baldwin of Genoa were the guests of Mrs. Ralph Ort last Thursday.

Miss Doris Lundstrum spent the week-end with her home folks in DeKalb.

Misses Mary and Francis Sullivan were shopping in Belvidere Saturday.

Wm. Aurner, who suffered a stroke of paralysis about two weeks ago, is in a critical condition at this writing.

Mrs. Ralph Ort visited Monday and Tuesday with relatives in Genoa.

Frank Wilson autoed to Sycamore Tuesday afternoon.

Floyd Knappenberger is home from Centralia.

Ora Koch and Miss Mae Bickler spent Sunday with the former's parents in Hampshire.

Mrs. Frank Stark entertained a number of children and their mothers Thursday afternoon in honor of her son, Donald, it being his sixth birthday. Refreshments were served after a few hours pleasantly spent at different amusements. Donald received some pretty gifts.

Dickens as Social Reformer.

To my mind the greatest social reformer that we ever had, and one of the greatest that the world has ever seen, was a man of letters, one of the two greatest names perhaps of modern literature—Charles Dickens. That great writer points out that all the inheritors of that time—and we are the inheritors of that time—had their origin in the appalling circumstances in which the working people lived—in London, of course, which he knew best, first of all, but in like degree all over the country.—Viscount Burnham.

Microbes With a Double Life.

The transformation of microbes from one form to another has been described by many investigators, and it has even been suggested that the same microbe in different forms may be responsible for different diseases.

State of Ohio, City of Toledo, Lucas County, ss.

Frank J. Cheney makes oath that he is senior partner of the firm of F. J. Cheney & Co., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of Catarrh that cannot be cured by the use of HALL'S CATARRH MEDICINE.
