

NOTES FROM THE COURT HOUSE

Chris Paeyovich of DeKalb Convicted of Bootlegging

SENTENCED TO PEN FOR 2 YEARS

Henry Lee Who was Arrested with Paeyovich was Fined \$200 and Costs and Committed to Jail

Judge Adam C. Cliffe presided in the Circuit court on Wednesday, July fifth and a number of orders were entered by him and other business was transacted.

Christ Paeyovich of DeKalb, who was recently convicted by State's Attorney Poust, before a jury in the court of a second violation of the Prohibition act, was denied a new trial and was sentenced to pay a fine of \$500 and to be imprisoned in the penitentiary at Joliet for a period of not more than two years.

Henry Lee of DeKalb, who was arrested March eighth at the time Paeyovich was arrested and indicted by the June grand jury for a violation of the Prohibition act, was brought up by State's Attorney Poust before Judge Cliffe and upon his plea of guilty was fined \$200 and costs and ordered to be committed to the county jail until the fine and costs are paid.

Lee assisted Paeyovich in making the sale and transfer at Annie's Woods and confessed immediately upon arrest. He resides in DeKalb and has a large family.

Julius E. Matteson, Attorney of DeKalb was appointed probation officer for DeKalb Co. under Bond of \$500 Mr. Matteson took his oath filed his bond and qualified. A probation officer had been appointed some time ago but did not qualify.

Bessie Nelson of Sycamore filed her petition against Mongie Carl Nelson for alimony and solicitor's fees, costs and expenses and was awarded \$5.00 per week as alimony and \$50.00 solicitor's fees. She states in the petition that she filed her bill for divorce against the defendant charging him with desertion which charges the defendant has denied and charged her with being unfaithful toward him.

A decree of sale was entered in the partition proceedings brought by O. Vanstone against Rhoda Vanstone of etal DeKalb. J. M. Blair, R. T. Smith and B. C. Knodle of DeKalb having been appointed commissioners to make the partition reported the property could not be divided and appraised it at \$800. The property consists of vacant lots in the city of DeKalb.

Testimony was taken in the divorce proceedings brought by Jack Makela of DeKalb against Hulda Makela. The complainant testified he was married to the defendant in Finland and lived with her until about October 1912. That on last mentioned date the defendant deserted the complainant and for the past ten years has not lived with him.

A. F. Johnson of DeKalb brought attachment proceedings in the circuit court against J. M. Parkhill, whose residence is in St. Johns county, Florida, and who is the owner of the Hinckley Hotel at Hinckley, Illinois. It appears from the papers filed that the controversy is about a written contract providing for the payment of commission to be paid the plaintiff by the defendant in the sale of real estate to purchasers thereof who were made by the defendant.

NOTICE The dumping of rubbish on the Cora M. Robinson farm must be stopped under penalty of prosecution.

G. E. Scott, Agent

SEEKS HOMES IN THIS CITY

Rev. J. F. Sternberg of Freeport in Genoa This Week for Work

Rev. J. F. Sternberg, in charge of the Freeport district of the Illinois Children's Home and Aid Society, is in Genoa this week in behalf of the society, and is also endeavoring to find homes for some of the children now cared for by the society.

Commencing on his work he says: If every childless home would open its doors to some motherless or fatherless child, determined to love and train that child into a good citizen, it would greatly lighten the burdens of the organizations that are thronged with the work of finding family homes for the homeless children, whom there are said to be more than nine thousand in this state.

The very young babe is still more in demand by adopting parents than the older boys and girls but we have lately talked with several who are willing to take older children.

As it is the homeless child, rather than the childless home, which demands our first consideration, we must be continually on the lookout for the home that will take care of those already on our hands, many of whom are boys and girls of six to twelve years.

This state-wide non-sectarian Welfare Organization is making a special appeal to those who appreciate the privilege of helping because the cause is worthy and the need is great.

It is a rare opportunity for those who find it a matter of conscience to administer wisely the abundance with which they are blessed, and for others who are glad to make sacrifices in behalf of a cause dear to their hearts, foster parents who have found their life happiness in this way, former wards, now prosperous and other public spirited men and women.

For further information see Rev. J. F. Sternberg or write to Illinois Children's Home and Aid Society, 440 South Dearborn Street, Chicago, Ill.

MIDGETS BEAT HAMPSHIRE

Genoa's Young Stars Walloped The Dusky Tribe from Yon City 23 to 7

Genoa's young baseball stars traveled to Hampshire Saturday, and administered a terrific beating to the young lads of that village. In fact basehits were as plentiful as ants on a honeycomb. After the smoke of the battlefield had cleared the boys had chalked up 23 runs against Hampshire's 7.

Table with 2 columns: Name and Score. Includes Keith Saul, Donald Field, Duane K., Albert Rudolph, Montford Bennett, John Zeller, Kenneth Cooper, Donald K., Roy E.

Table with 2 columns: Name and Score. Includes Hampshire, Share, Andon, Bresse, Awe, Patterson, Hawesch, Brasie, Busch, Smith.

FORD TURNS OUT 6,000,000TH CAR

Next One Comes Through 5 1/2 Seconds Later

Ford motor number 6,000,000 was lifted from the assembly line in the Highland Park Ford Plant at 9:14 a. m. May 18. Just 5 1/2 seconds later No. 6,000,001 was finished.

The unusually heavy demand for Ford cars and trucks at the present time has necessitated the building of 5400 motors daily. These are shipped in carload lots to the various Ford assembling plants throughout the United States.

The first model "T" Ford motor was completed on October 1, 1908; number 1,000,000 left the assembly line December 10, 1915; and number 5,000 came through May 28, 1921.

Although the Ford Motor Company turned out a number of different models prior to 1908, the present numbering system began with the first model "T".—Advertisement.

ADDITION TO SCHOOL

Work is progressing nicely on the front wing of the grade school building and the contractor hopes to have it ready for opening in the fall. The digging of a cellar was eliminated in this wing as well as the constructing of a north wall hence the rapidity of construction.

CITY COUNCIL HOLDS MEETING

Minutes of Last Meeting Were Read and Approved - Bills Ordered Paid

RIFLE RANGE PERMISSION GIVEN

Council Grants Request of Supt. H. Mackenzie For Permission to Have High School Shooting Range

Genoa, July 7, 1922

Regular meeting of the city council called to order by Mayor Jas. Hutchison. Members present, Cruikshank, Zeller, Canavan and Perkins. Absent: Patterson and Van Dresser.

Minutes of the last regular meeting were read and approved. The following bills were read and approved by the finance committee:

Table with 2 columns: Name and Amount. Includes E. E. Crawford, E. H. Browne, Standard Oil Co., C. M. & St. P. R. Co., W. M. Hay, DeKalb Co. Telephone Co., Ill. N. Util. Co., F. A. Tischler, H. A. Perkins & Son, E. W. Lindgren, R. J. Cruikshank & Son, M. F. O'Brien, Tibbits Cameron Lbr. Co., W. H. Heed, Chas. Holroyd, Clinton Powers, Mrs. Candace Johnson, Oley Seburg, Henry Downing, Frank Haskins, Ralph Blundy, John Benson, L. Morehart, R. E. Field, C. M. & St. P. R.

Motion made by Perkins, seconded by Canavan that bills be allowed and an order drawn on the treasurer for the amounts. Motion carried.

Matter of laying of water main on Second Street between Washington and Monroe Street was referred by the mayor to the fire and water committee with power to act.

Motion made by Zeller, seconded by Canavan that the city construct a cement walk on the east side of Brown street from Main street to Central avenue. The Supt. of streets to first collect from the lot owners \$40 per running foot. Motion carried.

Motion made by Cruikshank, seconded by Perkins that the alley north of lot 7, block 2, morningside addition be repaired so as to take care of the water. The work to be under the supervision of the street and walk committee. Motion carried.

Motion made by Cruikshank, seconded by Zeller that the request of H. Mackenzie for permission for a rifle range be granted with the understanding that at all times when rifle practice is to be had, same is to be under the supervision of some member of the high school faculty. Motion carried.

Motion made by Perkins, seconded by Canavan that the petition of property owners for city water on Sycamore street from first to second St. be granted. The water mains, hydrant and valves be placed under the supervision of Supt. of water.

The property owners to pay for the cost of said improvement with the exception of the cost of the hydrant, valves and cross and the cost of the construction across the street and alley. Size of main to be 4 inches. Motion carried.

Motion made by Canavan, seconded by Zeller that council adjourn.

R. B. Field, City Clerk

CORSON-LONG

Announcement is made of the marriage of Vern Corson to Miss Vera Long of Elgin on Tuesday afternoon, July 11, at Elgin, Illinois. After the ceremony the couple left for a few weeks' trip to the lakes in Wisconsin. The happy couple will eventually make their home in Genoa where the groom is associated in business with the Crescent Remedy Co.

Mrs. Corson is well known in Genoa having been a guest at the Corson home on numerous occasions and is a sister of her husband's first wife who died about four years ago.

Mr. Corson has always lived in Genoa and is a respected business man of this community with a host of friends who wish both he and his wife many years of happiness.

W. C. T. U. WILL MEET

The W. C. T. U. will meet with Mrs. Estella Howlett on Sycamore Street on Thursday, July 20, at 2:30 p. m. All those interested or wishing to join are cordially invited to attend.

FIRE DESTROYS FARM BUILDINGS

On the Ives & Meyers' Farm 7 1/2 Miles North of City—Occupied by J. Preston

Fire of unknown origin destroyed the lhbuse, barn and several smaller buildings last Thursday night on the Ives & Meyers' farm occupied by Jim Preston 7 1/2 miles north of Genoa near Shattuck's Grove.

Several head of live stock were lost in the blaze including a blooded stallion valued at \$2,000 and owned in partnership by Merriman & Preston.

No insurance was carried on the contents of the buildings with the exception of \$100 on the clover hay in the mow of the big barn.

The origin of the fire is still a mystery although it is thought to have started by spontaneous combustion in the hay mow containing the clover. Painters, who were working on the milk house said that it started about three-thirty or four o'clock but as it started on the opposite side of the building from them they did not notice it until too late to save anything of importance.

CORTLAND HOUSE DESTROYED

Caught Fire from Chicken Brooder—Burned to Ground

The dwelling house occupied by Magnus Nelson and his chickenhouse located in Cortland Township, DeKalb County, and estate were burned to the ground on Wednesday night.

A brooder stove had been kept going in the chicken house and as the fire originated there it was probably started by it. The fire was discovered shooting from the chicken house and spread with such rapidity to the dwelling that the fire department of Sycamore, which responded with a chemical cart, was powerless to do anything.

Mr. Nelson was with his family in DeKalb and when returning noticed a red glare in the sky but assumed it was the Ohio Grove church as it was in that direction. When he came closer he discovered it was his residence and found all his furniture had been saved by his neighbors who had carried it out in his absence.

All of Mr. Nelson's furniture was saved except a trunk and small articles on the second floor which were consumed by the fire. Three hundred chickens in the hen house also perished.

The loss of the building is estimated to be about \$1500. The family of Mr. Nelson was taken care of by the neighbors for the night.

The wind fanned the flames to such an extent that the fire could be seen for miles around attracting a large number of people from the neighboring towns.

AUTO OFF THE PIKE AND UPSET

James D. Beckler and Family Went Down High Pike—None Badly Hurt

James D. Beckler, cashier of the Pierce Trust & Savings Bank, his wife and two of their four children, Virginia, aged 18, and James, aged 7, had a narrow escape at about 6:30 o'clock Thursday evening, when their car, Mr. Beckler driving, plunged off the east side of the high pike about fifty feet north of the North bridge down about ten feet into the ditch and turned upside down.

Help was at hand almost immediately and Mr. Beckler and his family was extricated. The highway was soon filled with autos and frightened people who had good reason to believe that a tragedy had occurred.

They were greatly relieved as the several persons were found to be alive and conscious.

All were more or less painfully cut and bruised. The most seriously injured was Virginia, who received quite a severe gash in her leg. But all are recovering and suffer little.

The top of the car was destroyed and the windshield and other portions damaged.

Our former mayor was at the window in the bank this morning and while he made light of his injuries he was evidently pretty sore. He said that he could not explain the accident unless it was caused by the car skidding on the dust and loose gravel which was quite thick at that point.

They had just started out and were on their way to the John Hallert farm, a few miles north of town.—Sycamore Tribune.

ESSEX CUTS PRICES

The Essex Motor Car Co. has reduced the price on Coaches \$50 and on the touring car type \$100.—Advertisement.

On the Road of Good Intentions

MEN AT WORK ON WELL

Genoa To Be Well Protected Against Failure of Water Supply

The work of digging a new well for the city waterworks began Monday under the supervision of the contractor from Milwaukee, Wis. When completed the citizen's well will have little or no fear about the water supply giving out for there will be two distinct wells and pumping units either one of which will be able to furnish enough water to supply the needs of the city.

The contractor has a large force of men at work and the digging should be completed in about two months. It is being dug just south of the present well and when completed the machinery to pump the water as well as the pump itself will be housed in the present pumping station building. The total cost to the city will be about \$12,000 completed but the sense of security every citizen will feel in having two distinct wells and pumping units will add a much greater value.

FRIEDEN'S CHURCH PICNIC

To Be Held on Sunday, July 16, in the Woods East of Mocadore School

The annual German Frieden's church picnic will be held on Sunday, July 16, in the woods east of the Mocadore school house.

The people will gather at the Frieden's church at 9:30 in the morning and a means of conveyance will be ready to transport those who wish to go and have not an auto or rig of their own.

Everybody should bring their own lunch. Refreshments will be served at the grounds. Everybody welcome.

HEMENWAY TO MICHIGAN CAMP

Lieutenant Colonel William P. Hemenway, following word from Springfield to the effect that he had been appointed camp quartermaster for the artillery encampment of the guard at Camp Custer, Mich., left this morning for Chicago on his way to camp.

Lieut. Col. Hemenway has been with the 129th Infantry, Illinois National Guard, for many years, and his new position is one of great honor and responsibility. Mr. Hemenway will meet Col. Shannon in Chicago today, and proceed to the camp.

His appointment is from July 8 to August 11, and was made by Adjutant General Black.—Sycamore Tribune.

COLT SOLD FOR \$1000 DOLLARS

Don Earl, a promising colt owned by William Anderson of Kirkland was sold Tuesday at the Boone county fairground to Thomas Goodall, Beloit racing man at the conclusion of the race. It was understood race matinee, that the purchase price was \$1,000.

The colt gave a poor account of himself in the first race, however, the 2:15 pace, finishing in the sixth place in the first heat, fifth in the second, and failing to finish at all in the third.

DANCE AT PERRY WRIGHT'S

Dance at Perry Wright's Saturday evening, July 15. Music will be given by Fox River Four, Will Kutner, carbaret singer. 3 miles north-east of Marengo.

TEACHERS' EXAMINATION

The next teachers' examination will be held at the Sycamore High School July 20 and 21, 1922.

WARREN HUBBARD County Supt. Read and Use the Want Ad Column

NEAR EAST RELIEF

DeKalb County People Have Given \$2451.97 Cash—Subscribe \$600 More

Up to July 1, there has been paid in to the Chicago office from DeKalb county \$2,451.97 cash and pledges for monthly payments amounting to over \$600.

This amount will be considerably increased during the next six months as Sycamore, Genoa and several other towns have not yet been canvassed. In addition to this \$400 has been collected for the Jewish relief and \$400 for the Russian relief in the city of DeKalb.

Executive Secretary F. J. Michel of the Near East Relief writes: "We are grateful to you DeKalb county for your help during the past year, and you may know that some little children are alive over there because you cared." It is hard for us to realize that people can actually die for want of food and clothing, but that is what is going on all the time over there.

DeKalb county is now supporting over fifty orphans and there are thousands more needing relief.

If their needs appeal to you, send your subscriptions to Franz Parks, treasurer, First National Bank, DeKalb, Ill.

COUNTY TUBERCULOSIS CLINIC

To Be Held at the A. S. & W. Welfare Building in DeKalb Friday, July 14

The DeKalb county physicians in conference with Dr. J. A. Pettit of Ottawa, Ill., who is state tuberculosis clinician and has devoted a lifetime to diagnosis and treatment of this disease, will hold an all day clinic Friday, July 14, at the American Steel & Wire Welfare Building, beginning at 10 a. m.

All residents of DeKalb county are admitted and examined without charge. Any individual interested in having such an examination is urged to see his family physician at once, or communicate with Mrs. Gruetzman the county nurse at 247 West Locust St., DeKalb, Ill., who has the arrangement of the clinic hours.

COUNTY WELL REPRESENTED

Dolly De Kol Aaltje Hengerveld 463344, owned by George A. Fox of Sycamore, is making a good showing at the Holstein Cow Testing plant operated by the Illinois Holstein Association.

Only the best cows in the state are admitted to the plant and by sixty of them can be taken at a time. They are under the care of an expert feeder to test them out for their production ability so as to determine whether or to keep their offspring for foundation stock.

This cow has produced in ninety-six days 7731.9 pounds of milk and 320.24 pounds of butter. When we recall that the average cow of DeKalb county produces only about 35-40 pounds of milk and 150 pounds of butter in a year, you can readily see that this cow has produced more than two ordinary cows with only ninety-six days' production to her credit.

Her production for the month of May was 2477.7 pounds of milk and 83.63 pounds of butter. She will be bred to King Colantha Aaggie Clothilde 240457, the fine bull at the plant.

A FEW DON'TS FOR BATHERS

Don't swim on a full stomach. Wait at least two hours after eating. Don't swim if overheated. Don't swim until exhausted. Don't swim if you have heart trouble. Don't dive without accurate knowledge of the depth of the water.

MAPLE PARK SUB-DUED BY LOCALS

Shattuck's Two-bagger in Ninth Scores Winning Run

GENOA NATL'S 6—MAPLE PARK 5

Union Will Invade the Local Camp This Sunday—Genoa Goes To Hampshire Wednesday

After running neck and neck with a tie score for eight innings, Genoa scored a run in the last half of the ninth inning last Sunday and defeated Maple Park in an excellent game of ball 6 to 5.

Schaffer did not come onto the diamond until the 3rd inning and his place was taken by Gustafson the 3rd sacker who held the invaders to 1 run in two innings and struck out 4 men. Genoa evened the count in the second inning and grabbed one more in the third only to be tied by Maple Park in the fourth. This served to anger the home boys for they hopped onto Inman for three runs. Maple Park immediately got another corner on the run market and slammed the ball all over the lot for three runs again knotting the score. Things breezed along nicely for a couple of innings with the enemy threatening just once to get a score. The last half of the ninth opened with Genoa at bat and the score tied at 5 all. It really began to look like a duplicate of the game held here the previous Sunday that required eleven innings to settle.

However Inman was a trifle nervous and hit Geithman, the first man up, enabling him to take the base. Shattuck, the next man up worked the count to 2 and 3 and then lined a pretty hit along the foul line into the trees for two bases scoring the winning run and ending the game.

Union Here Sunday

Genoa's diamond will be the scene of another combat Sunday when the dusky warriors of Union come to do battle. Both Genoa and Union have defeated Hampshire twice this year and if hope amounts to anything the outlook is for a real battle. Manager Baker promises that a real lineup will be on the field with Powers back at third.

Genoa Goes to Hampshire Wednesday

In view of the fact that Hampshire has a large celebration in their town next Wednesday, Genoa has been called upon to furnish amusement by playing the Hampshire team in the afternoon. That Hampshire will be out for blood goes without saying for two defeats this year administered by the local boys have not left the citizens in the best of humor. Baker promises that he will have a scrappy team on the field who will fight to the last man is out for another victory.

Genoa

Table with 2 columns: Name and Score. Includes Peterson, Crawford, Gustafson, Shaffer, Geithman, Shattuck, Sell, Overley, Clausen, Maple Park, Fitzgerald, Keefe, Regan, Mathison, Stowe, Butler, Johnson, Lawson, Inman.

Peterson, 2nd, 4 1 3 1 1 0
Crawford, c, 4 1 1 1 2 1
Gustafson, 3rd, 4 0 0 2 1 0
Shaffer, p, 4 0 0 4 0 0
Geithman, c. f., 3 2 1 0 2 0
Shattuck, 1b, 3 0 1 1 9 0
Sell, ss, 3 0 0 1 0 1
Overley, lf, 3 1 0 0 1 0
Clausen, rf, 3 1 0 0 2 0
Maple Park
Fitzgerald, 2nd, 5 1 1 1 3 0
Keefe, 1st, 5 0 1 2 5 1
Regan, cf, 4 1 2 0 1 0
Mathison, 3rd, 4 0 1 0 0 0
Stowe, rf, 4 0 1 1 1 0
Butler, ss, 4 1 1 0 0 2
Johnson, lf, 4 1 0 0 1 0
Lawson, c, 4 1 2 2 1 3
Inman, p, 4 0 0 3 1 0

Three base hits, Lawson; base on balls, of Schaffer, 2; off Inman 0; left on bases, Genoa 2; Maple Park 6; 2 base hits, Butler, Peterson, Geithman, Shattuck; struck out by Shaffer, 8 in 7 innings; Gustafson 4 in 2 innings; Inman 11. Double plays: Shaffer, Peterson to Shattuck. Hit by pitcher, Clausen and Geithman. No outs when winning run scored.

SYCAMORE ROAD BEING FIXED

County Road Commissioner Russell Removing the Humps

After several months of doing the watchful waiting act the patrons of the Sycamore-Genoa road are having one of their heart's desires fulfilled in the scarifying and grading of the much traveled road. The large caterpillar tractor pulls the scarifier over the road at a great pace, removing all pumps and ruts and leaving the road in a smooth but rather soft condition. This will readily pack down however, and then there will be left a real boulevard-like road. It is needless to say that the work is much appreciated by people of this vicinity as by those of other communities.

WAS A BROKEN-DOWN WOMAN

Then I Began Taking Lydia E. Pinkham's Medicines

Donaldsonville, La.—"I write with pleasure to praise your medicine—Lydia E. Pinkham's Vegetable Compound—which has done so much to restore my health. I was a broken-down woman until my husband brought me a bottle of your Vegetable Compound and one of Lydia E. Pinkham's Blood Medicine. I had been having pains every month and at intervals between, was weak and seemed to be smothering at times, but in a week I felt like another woman. I also used Lydia E. Pinkham's Sanative Wash. It did me a lot of good too. I cannot praise your medicines too much and will be more than glad to recommend them to any woman who is suffering from female troubles. You may print my testimonial, as it is true."

Mrs. T. A. LANDRY, 612 Miss. St., Donaldsonville, La.

Note Mrs. Landry's words—"as it is true." Every letter recommending Lydia E. Pinkham's Vegetable Compound is genuine. It is a statement telling the merits of these medicines just as the women in your own neighborhood tell each other about them. For fifty years Lydia E. Pinkham's Vegetable Compound has sold on merit.

Skin Tortured Babies Sleep Mothers Rest After Cuticura

Soap 25c, Ointment 25 and 50c, Talcum 25c.

Part of a Collection. "Just a moment," interrupted the defendant's lawyer. "You say you despise this man you are suing for \$50,000, yet you bring his alleged love letters into court carefully tied up with a pink ribbon."

"There is no sentiment in that," replied the fair plaintiff, haughtily. "I merely used a pink ribbon to distinguish his from the others."

Have You a Bad Back?

Are you lame every morning? Do you drag through the day with a steady nagging backache—even find you "all played out"? Probably your kidneys are to blame. Hurry, worry, lack of rest and a heavy diet, all tend to weaken the kidneys. Your back gives out; you feel depressed and suffer headaches, dizziness and kidney irregularities. Don't go from bad to worse. Use Doan's Kidney Pills. Thousands recommend them. Ask your neighbor!

A Michigan Case

Henry M. Norman, carpenter, 1009 Washington Ave., Ludington, Mich., says: "I had such a lame back I could hardly straighten. I had to get up at night, my kidneys were so weak. The secretions burned in passage and I was highly colored. Doan's Kidney Pills fixed me up and I have felt fine since they cured me."

Western Canada Land of Prosperity

offers to home seekers opportunities that cannot be secured elsewhere. The thousands of farmers from the United States who have accepted Canada's generous offer to settle on FREE homesteads or buy farm land in her provinces have been well repaid by bountiful crops. There is still available on easy terms Fertile Land at \$15 to \$30 an Acre—land similar to that which through many years has yielded from 20 to 45 bushels of wheat to the acre—oats, barley and flax also in great abundance, while raising horses, cattle, sheep and hogs is usually profitable. Hundreds of farmers in Western Canada have raised crops in a single season worth more than the entire cost of their land. With such success comes prosperity, independence, good homes and all the comforts and conveniences which make life worth living.

Farm Gardens, Poultry, Dairying are sources of income second only to grain growing and stock raising. Attractive climate, good neighbors, churches and schools, good markets, railroad facilities, rural telephone, etc.

For certificate entitling you to reduced railway rates, illustrated literature, maps, description of farm opportunities in Manitoba, Saskatchewan, Alberta and British Columbia, etc., write

Happenings of the World Tersely Told

Sporting

Mlle. Suzanne Lenglen defeated Molla Mallory of America at tennis and retains her title as champion woman tennis player of the world. Mlle. Lenglen defeated Mrs. Mallory in London, two sets to nothing, the games being 6-2, 6-0.

Personal

Col. A. B. Enloe, eighty-six, chairman of the Tennessee railroad and public utilities commission and prominent throughout this section of the country, died at Nashville, Tenn.

Ernest Leidiger, pioneer brewer and president of the Leidiger Brewing company, died at Merrill, Wis.

John Dupes, for many years a resident of Chicago and one of the founders of Schwartz, Dupes & Co., which until its dissolution was one of the largest grain commission firms in the country, died at the Plaza hotel, New York.

"Bobby" Connelly, one of the most famous and most highly paid child model picture stars in the world, died at his home in Lynbrook, N. Y., from acute bronchitis. "Bobby" made his first big hit in "Humoresque."

Representative M. P. Kincaid (Neb.) died at Washington after a short illness of heart disease.

Washington

President Harding returned to the White House at Washington from his week's automobile trip to Ohio.

Senator Sterling (Rep., S. D.), a prohibition leader, offered an amendment to the tariff bill in the senate at Washington to extend the present "three-mile zone" off American shores to eighteen nautical miles.

Domestic

J. O. Colvin is dead and Tom R. Shook and Charles Bebout, policeman, are under bond at Wichita Falls, Tex., as the result of an attempt to search Colvin's home for liquor.

Forty-five days' drought throughout the section around Sterling, Ill., was broken by a good rain, saving the corn crop.

Coincidentally with rioting and disorders throughout the country and the derailing of the Golden State Limited at Topeka, guerilla warfare against the National Guard troops in the strike zone at Clinton, Ill., broke out when snipers fired from ambush on soldier sentinels. Two men were shot at Monroe, La., and a guard was slugged at Chicago.

John D. Rockefeller is eighty-three years old. A birthday cake, a round of golf in the morning and an automobile ride on Saturday composed his simple anniversary celebration this year.

Rail strikers' threats of lynching drove off 65 men at the St. Louis & San Francisco railroad's shops at Springfield, Mo., according to a statement from the railroad's offices at St. Louis.

Any doubt that the United States rail labor board is determined to stick by the wage and other decisions, against which 300,000 railway shopmen are striking, was dispelled by a statement issued at Chicago by Ben W. Hooper, chairman of the board. The strikers were notified that they can hope for further consideration only after they have returned to their jobs throughout the country.

Seventy-five persons were hurt, one so seriously that he may die, in a freak wreck on the Pere Marquette near Porter, Ind. The cause of the wreck is a mystery.

Racing is safe in Louisiana for a while, at least. The Butler bill, which asked for the killing of horse racing in that state, was defeated by a vote of 51 to 49.

Trapped in a dark subway tunnel 75 feet below the street and reeking with gas fumes and smoke, nearly 500 men, women and children passengers on an East side train of the Interborough Rapid Transit company in New York were converted into a frenzied, shrieking mob, almost a third of whose numbers were overcome before they could fight their way to safety. Three probably will die.

Shopmen on Canadian railways will strike if the roads attempt to force them to accept straight time for Sundays and holidays, James Somerville, international vice president of the machinists' union, announced at Moose Jaw, Sask., after a tour of the roads from Vancouver to Montreal.

West-bound Southern railway passenger train No. 25, known as the Memphis special, was derailed near Hillsboro, Ala., engine, baggage and mail cars going into the ditch. No one was injured.

St. Charles, S. D., was practically wiped off the map by a tornado which swept the southern half of Gregory, according to reports received at Sioux City, Ia. One man was killed and many persons were injured. The damage at St. Charles will reach over a million. Many farm buildings were destroyed. All of the buildings in St. Charles were wrecked.

National Guardsmen have been mobilized in three states, Missouri, Mississippi and California, while three companies of the Illinois National Guard already are on duty in Clinton as a result of disorders due to the shopmen's strike.

Federal injunctions have been obtained by many roads to restrain strikers from picketing the railroad shops. Reserve forces of United States deputy marshals have been sworn in.

Gov. Edwin Morrow of Kentucky ordered troops to move to Hopkinsville, when county authorities at that place advised him the situation at a strip mine there proved threatening and that local authorities might be unable to handle the situation.

Harvey F. Miller of New York, vice president of the Fairbanks company, died in a hospital at Hutchinson, Kan., of injuries he received in the Santa Fe collision at Burton, Kan. Nine other persons were injured, three seriously.

James W. Gerard, former American ambassador to Germany, who arrived at New York after a two-months' tour of England and France, explained that he did not visit Germany because of unsettled conditions there. "No doubt they would have taken a shot at me in Germany," he declared.

General improvement in crop conditions along the Atlantic and Gulf coasts and in the Northwest, east of the Rocky mountains, was noted by the Agriculture department at Washington in its crop summary for the last half of June. "Throughout the corn belt," the department's observers found, "small grains were more or less injured by the unusual hot and dry weather."

"It is America's duty to help the world on its feet," declared President Harding at New Concord, O., in accepting at Muskingum college the degree of doctor of laws. The President's address to the small student body of his old college extolled the principle of service.

Insurance Commissioner Henry of Mississippi was ordered suspended by Governor Russel of Mississippi following a prolonged fight over alleged discrepancies in the office of the insurance commissioner.

Jack Lewis D'Arcy, said to be the husband of Louise D'Arcy, screen actress, and son of a well-known financier connected with the J. P. Morgan interests, committed suicide at a hotel in Birmingham, Ala., by taking poison.

Capture of five alleged bootleggers at Trenton, N. J., caught in the act of robbing a government warehouse of \$200,000 worth of liquors, coupled with the presence of William J. Burns, chief of the United States secret service, was taken to indicate that the plot was of more than local significance.

Food prices in the United States are going up again, the Department of Labor announced at Washington.

Forest fires are raging in virtually every timbered area of the Pacific Northwest and thousands of men were being rushed to augment the crews which have been working to control blazes constantly growing in numbers and size for the last week or ten days.

Mutinous gendarmes at the Vatican in Rome agreed to return to duty pending promised reforms in service conditions.

An entire block in the center of Nanty-Glo, a mining town near Johnstown, Pa., was destroyed by fire with \$25,000 loss.

An attempt to cross the continent from Jacksonville, Fla., to San Diego, Cal., in one day in airplane will be made within the next few days by Lieuts. James H. Doolittle and L. S. Andrews of Kelly field, if Washington gives permission.

Foreign

The dollar made a tremendous jump in value over night on the Paris exchange market, opening at 12.75 francs as compared with Thursday's closing price of 12.23.

Twenty persons were injured, one seriously, when a section, 100 feet by 20 feet and weighing several tons, fell from the plaster ceiling of the Star motion picture theater in Honolulu.

Shell fire from a fort controlled by Chen Chung Ming, the United China leader, destroyed the munitions base of Sun Yat Sen, the deposed president of the Canton government, according to a dispatch from Canton. A number of casualties accompanied the destruction of Sun's munitions factory.

President Millerand of France decreed Miss Frances Elizabeth Crowell, director of the visiting nurses of the Rockefeller institute in France, with the cross of the Legion of Honor, says a Paris dispatch.

1—U. S. S. North Carolina being scrapped at Norfolk navy yard in accordance with the Washington naval treaty. 2—Striking railway shopmen at Chicago on way to mass meeting. 3—Kathryn Agar of Chicago, javelin thrower, selected to go to Olympic games in Paris.

NEWS REVIEW OF CURRENT EVENTS

Maintenance of Way Men Postpone Strike and Shopmen May Return to Work.

CHANGE FOR A COMPROMISE

President Harding's utterances on the industrial situation—Irish Republicans, routed in Dublin, still fighting—Russia's amazing budget submitted to the Hague conference.

By EDWARD W. PICKARD.

LABOR troubles, present and prospective, continue to absorb much of the interest of the American public. The railway shopmen are out—practically all of them, according to B. M. Jewell, head of the six federated shop crafts; not nearly all of them, according to the railway executives. The maintenance of way workers, who were expected to strike last week, are still at work. E. F. Grable, president of their brotherhood, and six members of his executive council, held an all-day conference with the members of the railway labor board and then issued a statement saying they had concluded "it is not wise for our membership to leave the service of the carriers until every resource has been exhausted that affords hope of a peaceful adjustment." The chairman on each carrier is to take up at once with the management all grievances and controversies and such as cannot be adjusted are to be taken before the labor board. Pending these efforts at peaceful settlement the men are to continue work under the present wage decision of the labor board under protest.

Mr. Jewell celebrated his Fourth of July by putting forth a long statement in which he bitterly arraigned the labor board because it had "outlawed" the striking shopmen. He declared the board had outlawed itself as the friend of the unions and had "adopted a tragic attitude in attempting to compel American workers to accept a wage scale below decent living." True, the board had in effect declared the strikers outlawed and had invited recruits to fill their places, promising them protection and urging them to form a new shopmen's union within the American Federation of Labor. But in a day or two both Mr. Jewell and Chairman Hooper of the board became milder and the peace prospects brightened somewhat. The former said he was not averse to dealing "with any authorized person on any reasonable basis," and the latter issued a statement in which he undertook to show that the board was protecting the interests of the striking shopmen by advising carriers against contracting out shop work, and also wrote a letter to Mr. Jewell repudiating the charge of injustice on the part of the board and concluding:

"I am yet quite hopeful that your organization will recover their equilibrium and discern that it is vastly better for them to go along with the railroad labor board, patiently when it makes mistakes, but confidently at all times that it profoundly desires to do justice to the men, the carriers, and the public, without fear, favor or affection."

Toward the end of the week W. L. McMenamin, one of the labor members of the board, held conferences with the heads of the railway clerks and freight handlers, and it was predicted that those unions would follow the example set by the maintenance of way men.

Though most disorders last week due to the shopmen's strike were of minor importance, reports reached Washington in increasing numbers that strikers were interfering with the dispatch of the United States mails in various parts of the country. The administration is disposed and prepared to deal vigorously with any persons who hamper the movement of the mails. Postoffice inspectors were sent

to all points where trouble was likely to arise, and doubtless every federal agency necessary will be used to protect the mail trains and facilitate their regular movement.

PRESIDENT HARDING'S conference of representatives of the coal mine operators and striking miners in the White House brought no immediate results, but hope of peaceful adjustment was not abandoned and the conferees agreed to get together again July 10. They know that Mr. Harding has in reserve some drastic government action if they fail to agree, though he has not revealed its exact nature.

In Kansas the coal miners who supported the program of Alexander Howatt and who, with their officials, were expelled from the United Mine Workers of America, have decided to return to work, that being the only way they could recover their autonomy and be restored to membership in the union.

IN HIS Fourth of July speech at the celebration in Marion, O., President Harding had some significant things to say of the industrial situation. For instance:

"A free American has the right to labor without any other's leave. It would be no less an abridgement to deny men the right to bargain collectively. Governments can not tolerate any class or group domination through force. It will be a sorry day when group domination is reflected in our laws. Government, and the laws which government is charged with enforcing, must be for all the people, ever aiming at the common good."

Disclaiming any note of pessimism, he asserted that the republic is secure. "Menaces do arise," he added, "but public opinion will efface them. Meanwhile government must press them."

These of course are truisms, but it is well that they should be repeated from time to time by the voice of highest authority.

General Pershing, who also spoke at the Marion celebration, was loudly applauded when he advocated fearless use of "the strong arm of the law" in communities which "openly sympathize with ruthless murder of inoffensive people in the exercise of the right to earn a livelihood."

CAPTURE of the Four Courts building in Dublin by the troops of the Irish Free State by no means ended the bloody conflict with the republican irregulars. The latter took refuge in hotels and other buildings in O'Connell street and there continued the battle until the shells of the regulars set fire to almost every structure in that part of the street. The conflagration could not be stopped and most of the rebels surrendered. De Valera, who was with them, was said to have escaped in disguise and fled to County Wicklow. Cathal Brugha, minister of defense in the De Valera cabinet, refused to surrender and was seriously wounded. Among the prisoners was Mrs. Terence McSwiney, widow of the late lord mayor of Cork, and Rory O'Conner, commander of the irregulars. The provisional government is now putting its entire military establishment on an active service basis and has issued a proclamation calling for recruits.

The republicans are preparing for a final struggle in the vicinity of Cork. That city is in their hands and, having Skibbereen, they claim control of the entire county, as well as of Counties Kerry and West Limerick, Waterford, East Limerick and parts of Tipperary and Kilkenny.

DESPITE the vigorous action of the government in Berlin, the monarchists have been stirring up trouble in many places in Germany. These were aggravated by the anti-monarchist demonstrations that were staged on July 4 by the Democrats and Socialists. One of the incidents of the week was the attempt to assassinate Maximilian Harden, the famous editor who is so thoroughly hated by the reactionaries.

There is a movement on foot in Germany that is likely to upset the cabinet of Chancellor Wirth and result in the formation of a purely socialist government in place of the present one, which is a coalition of minorities. To forestall this, an offer has been made to the Independent

Socialists of a share in the government. The bourgeois parties fear that this would interfere with Germany's obtaining financial relief abroad.

IT LOOKS as though the conference at The Hague would come no nearer to settling the Russian problem than did that at Genoa. The soviet delegates in response to the demands of the allies submitted what they called the Russian budget, but Chairman Alphand of the commission characterized it as a "project" and the British called it "an amazing document." This budget admitted that one-fifth of the entire revenues consisted of new issues of paper rubles and undertook to show that the more rubles were printed the more valuable they became—amazing indeed. The budget figures, which were in gold rubles, were calculated on an arbitrary rate in paper rubles every three months. The allied experts were chafed by all this.

The Russians caused further disension by putting out two questionnaires demanding to know the social positions, the professions, the revenues and the family positions of all previous holders of property, bonds and securities who have claims against Russia. Though told this was practically impossible and unnecessary, Litvinoff insisted his government must have this and other information as a basis for concrete proposals for the settlement of each case. Finally a list of the private agricultural claims of French, British and Belgian nationals was presented to him, and the matter was taken under further consideration.

Representatives of large financial groups have arrived at The Hague, and it may be that Litvinoff will be able to trade a lot of concessions for private credits and so carry back certain valuable results to Moscow even if the formal negotiations fall through.

WHEN the League of Nations assembly meets in September it will have a definite program for reduction of land and sea armaments. The league's commission on disarmament has been in session in Paris and has approved Lord Robert Cecil's plan providing for a general reduction of air and land forces under the supervision of the league, and for continental alliances against aggression. The commission also adopted the British scheme for extending the Washington naval accord to all nations. Objection to limiting the alliances to continents was met by the statement that no nation would be barred from aiding a country that was attacked, no matter on what continent.

SETTLEMENT of the Taena-Arica dispute in the conference at Washington is delayed by the action of the Peruvian delegates. Chile had accepted the plan offered by Secretary Hughes, but the Peruvians have qualified their acceptance in such a way that further negotiations are necessary. Chile's attitude is explained by her spokesmen as a thoroughly conciliatory one, embracing a willingness to accept Peru's suggestion for any minor changes in the American formula so long as the major principles laid down by Secretary Hughes accepted by Chile are not disturbed.

DEBATE tariff debates in the senate grow acrimonious occasionally, and now and then even interesting. Last Wednesday, for instance, Senator Shorridge of California found occasion to predict that a son of Ohio would sit in the President's chair for a good many years to come. Before he had a chance to explain that he was alluding to Mr. Harding he was interrupted by Senator King of Utah with the admission that the Californian was correct and the assertion that the son of Ohio who would occupy the White House next would be Senator Pomerene. King's fellow Democrats seemed to approve the suggestion, so the Pomerene boom may be considered as launched.

THE sporting event of the week was the prize fight between Benny Leonard, lightweight champion, and Rocky Kansas in Michigan City, Ind. It was Leonard's fight all the way and in the eighth round Kansas was technically knocked out, his seconds throwing up the sponge.

JAMES P. HUMPHREYS, well-known automobile man of Hebron, Md., who declares he believes Tanlac is the best thing to overcome stomach trouble and run-down condition. States it completely restored his health.

"I believe in giving everything its due and I want to say right now I just can't praise Tanlac too highly for what it has done in my case," declared James P. Humphreys, proprietor of the Hebron Motor Co., Hebron, Md. "For three years or more I suffered from indigestion. After eating I would bloat terribly with gas and my heart would palpitate until it interfered with my breathing. I was habitually constipated and my nerves were all upset. My sleep was unsteady, I got up mornings all tired out, and I was only a shadow of my former self."

"Well, Tanlac has given me a keen appetite, stomach trouble has disappeared, my nerves have steadied down, and I have gained several pounds. Tanlac, to my mind, is the best thing ever sold for stomach trouble and run-down condition."

Tanlac is sold by all good druggists.

Really Not Her Fault. A darky and his sweetheart, followed by three pickaninnies, applied to the clerk of a southern courthouse for a license to wed.

The clerk eyed the assemblage doubtfully. "Whose children are these?" he asked.

"They ourn," was the ready response from the man.

The clerk was scandalized, being new at his post. "You ought to be ashamed of yourself waiting to get married till you have a family half grown."

"Jedge, you'll have to excuse dat," interrupted the "bride," sweetly. "De roads out our way is so bad!"

YOU CAN WALK IN COMFORT. If you Shake Into Your Shoes some ALLEN'S FOOT-EASE, the marvelous healing powder for shoes that pinch or feet that ache. It takes the friction from the shoe and gives relief to corns and bunions, hot, tired, swollen feet. Ladies can wear shoes one size smaller by shaking Allen's Foot-Ease in each shoe.—Advertisement.

Story of the World War. We are a united nation now. Here is a story told Memorial day: "Are the Yanks coming?" asked a little girl in France.

"Yes, child," replied the colonel, "the Yanks are coming."

It was a Tennessee regiment.—Louisville Courier-Journal.

Sell Trees and Plants for World's Greatest Nurseries. Steady work, commission weekly. Brown Brothers' Nurseries, Rochester, N. Y.

Khaki.
To India, by way of England, we owe the word "khaki." There was a sect of Brahmins—and it is still in existence—who applied the ashes of cow-dung to their clothes and persons. They were called "khako" because of that coloration—or discoloration. The word was naturally applied to the earthy or clay color in the uniforms of soldiers or sepoys by the British government. Hence the protective light-chocolate dye employed in British military uniforms.

English "Boxing Day."
Boxing day is the 26th of December, and is one of the four legal bank holidays in England. It was on this day that in olden times the gentry made presents, especially of money, to their servants and dependents. These presents came to be known as Christmas boxes.

You Have Heard of It Now You Can Read It

Mary Marie

By ELEANOR H. PORTER
Author of "Pollyanna," "Oh, Money! Money!," "Just David," etc.

"Pollyanna," with its optimism and cheer was such a clever story that it resulted in the formation of a cult with thousands of members. "Mary Marie" is even better.

It could appropriately have been entitled, "Mary Marie and Marriage," for it gives an answer to the great family problem of what happens to the children when father and mother are divorced. The child's point of view is presented here for the first time in a work of fiction.

It Is Such a Superb Story, interesting to men, women and children, that it has been selected for serial reproduction in

Begins in this issue of THE REPUBLICAN

Confidence.
The following scrap of conversation was overheard in a London motor bus, and deeply impressed those fortunate enough to catch the words. Said one fair passenger to another: "Between you and me, I don't seem to like your husband so much as I did." "And between you and me," said the other, "neither do I."—London Morning Post.

Diamonds Territory's Only Asset.
The territory known before the war as German Southwest Africa is of little value to the British, who have acquired it, inasmuch as it is mostly desert. It does, however, produce many diamonds, which are picked up in the sands along the coast. The desert diamonds have evidently been disturbed by water and wind, and doubtless were brought from a not-distant source by ancient and vanished rivers. Presumably they were originally derived from volcanic "pipes," like those which produce diamonds in the Kimberly field of South Africa. Experts are inclined to think that all of them came from a single pipe, because they are so much alike in quality, appearance and crystallization. In the Kimberly field the diamonds from no two pipes are alike. Accordingly, an anxious search is being made for the source of the stones. Pipes, a number of them, have been found, but, alas! none of them contains any diamonds.

Atmospheric Phenomenon.
A singular atmospheric phenomenon recently noted along the western coast of South America, is a bank or band of cloud extending for 2,000 miles, from Ecuador to the center of Chile, and following the trend of the coast range of hills. The cloud bank is between 10 and 20 miles broad, floats at an elevation between 2,000 and 3,000 feet, and has a vertical thickness of not less than 1,000 feet. This curious phenomenon is ascribed to the prevalence of cool southerly and southwesterly winds blowing obliquely along shore, and having their moisture condensed by the coast hill range just sufficiently to produce clouds without rain.

Buildings of Old Rome.
Lanciani, the archeologist, has shown that in the Rome of the Caesars trouble was experienced with high buildings. A law was passed restricting the height of fronts to sixty feet. In order to evade it, builders adopted the practice of carrying up the rear portions several stories more. Other laws bearing on the height of the buildings were passed in early times. There was a tendency to diminish the height of stories as the buildings increased in size, and a height of 130 feet was probably attained. It is believed that the ceilings were so low a man could not stand upright in the rooms.

NO SIGNIFICANCE IN COLOR

idea Long Held by Horse Breeders Has Been Proved to Be Without Foundation.

For more years than a man can count men have felt suspicious of, if not unkindly toward, a horse with three white feet. There is an ancient rhyme which runs something like this:

One white foot, buy him;
Two white feet, try him;
Three white feet, deny him;
Four white feet, skin him and give him to the crows.

Not true; nothing in it; facts disprove it. A fair proportion of the fastest, strongest, toughest and most faithful horses have had and still have two, three and four white feet. Durbar II, a Derby winner a few years back, had three white feet. Another deep-rooted prejudice concerns the color of horses. A gray has been generally esteemed as a tough and "staying" horse, and a black horse has been suspected of lack of stamina. A roan horse, either steel roan or strawberry roan, has always been sized up as a hardy horse. A dun horse was thought to be the last word in feebleness. A cream-colored horse was suspected of inability to go the pace, and a white horse, besides being hard to keep clean, was believed to be of delicate constitution. Buys, browns and sorrels have generally been judged on "points" and conformation, independent of the color question.

All this is wrong, according to experiments at a government station. A government bulletin has said that "The color of a horse is no indication of the real value of the animal and the statement cannot be made too emphatically that speed, intelligence, vigor and other good traits are inherited independently of color."

Your Duty Is Done.
What I must do, is all that concerns me, not what the people think. This rule, equally arduous in actual and in intellectual life, may serve for the whole distinction between greatness and meanness. It is the harder because you will always find those who think they know what is your duty better than you know it. It is easy in the world to live after the world's opinion; it is easy in solitude to live after your own; but the great man is he who in the midst of the crowd keeps with perfect sweetness the independence of solitude.—Emerson.

Ended Embryonic Love Affair.
The first girl I ever called to see was entertaining me in the presence of another couple of young folks, when she reached over and pulled what she supposed to be a thread off my vest. She pulled about two yards out before she grasped the fact that she was unraveling my underwear. It was the last of that love affair.—Chicago Journal.

MOUTH HOLDS FEW BACTERIA

Saliva and Muscular Action, It Is Announced, Work Quickly to Clear the Oral Cavity.

It has hitherto been assumed by pathologists that the bacteria which are known to lodge in the cavity of the mouth in seething masses are disease producing, and that they are always present to take advantage of any unfortunate lowering of the powers of resistance in the human body. It has now been demonstrated by a professor at Johns Hopkins university that although the oral cavity has no elaborate system of hairy membranes like the nose and air passages, to rid it of bacteria and foreign particles, nevertheless it does the same thing by a mechanical action of the muscular structures around the mouth that set up suction currents which remove any bacteria or foreign particles from the mouth in from fifteen to thirty minutes. These suction currents carry the bacteria uniformly toward the rear of the mouth, without any lateral or forward dissemination, and pass them on without lodging on the tonsils or the walls of the pharynx.—Popular Mechanics Magazine.

So It Does.
The teacher had been giving a lesson on the reindeer—its haunts, habits and usages. One boy was not paying a bit of attention and the teacher pounced on him. "Now what is the use of the reindeer?" she asked him. The startledurchin looked up, paused a minute and then said, "It makes things grow, teacher."

Elastic Gate Hits Back.
A new safety gate for railroad crossings is designed which stretches across the road like the old style gate, but is flexible and elastic, so that it gives instead of breaking when run into. The gates will force the vehicle backwards, away from danger.

New York's Fire Chief.
Anthony Lamb, a mathematical instrument maker, was New York's first fire chief. He received \$60 a year for his services. Fire engines worked by hand came into use in 1731 and were kept in the City hall.

WILL DEVELOP JET INDUSTRY

Company Formed to Work Large Deposits Recently Found in Wayne County, Utah.
What is believed to be the first jet deposit to be developed in the United States is now being successfully mined in Wayne county, Utah, where recently mineralogists discovered the largest commercial body of the mineral known to exist in the world. Singularly, discovery of the jet was accidentally made by a party of miners engaged in assessment work for a copper company. The work of mining the jet began late in the summer of last year and, with financial backing assured, is expected to develop into great proportions. At the present time the work of mining the mineral is more or less crudely done, but it is the intention of the owners of the decidedly valuable deposits soon to install modern machinery and develop the industry into the largest of its kind in the world.—Baltimore American.

Another View of Selfishness.
Selfishness does not always apply to the man who is unwilling to share his belongings with others, but it also applies to the man who may have some practical ideas and will not pass them on to his neighbor.

Getting License in Spain.
Each applicant for an automobile driver's license in Spain must get a certificate of good conduct from his mayor. He must be able to read and write. His hearing, eyesight and general health must be good, and he must show the government inspector that he can drive.

The Eggplant.
The eggplant, so called because it is egg shaped, belongs to the same vegetable family as the potato. It is a tropical vegetable and can be grown successfully in the United States as far north as latitude 42 degrees. The eggplant is as nutritious as cabbage or cauliflower.

A Feminine Contributor Says—
In matters of generosity a woman acts first and reasons afterward; a man reasons first—and generally forgets to act.—Boston Transcript.

The New & Better USCO Tire

with many improvements

The price remains the same

\$10.90

for the

30 x 3 1/2

WHEN "USCO" announced its new low price of \$10.90 last Fall, the makers were already busy developing a still greater "USCO" value.

The new and better "USCO" as you see it today—with no change in price—and tax absorbed by the manufacturer.

You'll note in the new and better "USCO" these features—

Thicker tread, giving greater non-skid protection. Stouter sidewalls.

Altogether a handsomer tire that will take longer wear both inside and out.

The greatest money's worth of fabric tire in the history of pneumatics.

Foreign Advertising Representative
THE AMERICAN PRESS ASSOCIATION

SHOWS POWER OF ADVERTISING

One of the greatest retail merchants in North Dakota, who started with a capital of \$75.00 and now does almost a million-dollar business in the retail trade addressed the Retail Merchants' Association of Montana at Helena this week, telling the merchants that his success came after he had started to advertise in the newspaper of his town.

Mr. Mann, well known in our neighbor state, devoted considerable time to features of the retail business, in which he made a great success and brought out many good suggestions which were readily absorbed by his hearers.

However, most of his suggestions and his talk of success in retailing centered about judicious advertising and he made it apparent that it was his belief that his success in this line could not be attained without the unlimited use of printer's ink. He told of his venture in the retail business as a merchant when a wholesale house extended him sufficient credit to permit him to secure a \$1,600 stock of groceries, and when all his friends predicted failure as he had no cash resources, a newspaper man came along, he said, and induced him to use the little utilized columns to tell the people he had goods to sell.

He took advantage of the suggestion and proceeded to advertise in a manner considered reckless by other merchants who were clinging to the

Hart, Schaffner & Marx Clothes
Made to Measure
HUGHES CLOTHING COMPANY

old system of running a card in the paper.

"Business began to come in," he said, "and it was not long before I had to employ help." And during the first year, which he had started with a capital of \$75, his sales reached \$23,000 and his profits were between \$4,000 and \$5,000.

He continued to advertise truthfully and sell honest goods later adding national lines, then a fine store building, established innovations in the way of demonstrating goods, coffee and lunch on Saturdays in winter time. All of this brot clearly before the attention of the people by advertising until he found it necessary to enlarge his store, which now occupies a building 100 feet by 150 feet and in which he has an investment of fixtures alone of \$40,000 to \$50,000.

Mr. Mann told of creating a demand for goods of which the people knew nothing, by advertising and of the immense increases of his sales of certain lines by his methods.

"I always use the newspaper first," said Mr. Mann, and we use a lot of space. Next to the newspapers comes our mailing list. We send out grocery specials, personal letters and depend a great deal upon solicitation. I have been told that mail order houses never give up a prospective customer until after twenty-five attempts, and their idea of success is persons whom they have solicited by mail 16 or 17 times. You have to educate the people to look for your advertisements and our customers have learned to look for our ad every week." Mr. man said that after taking the presidency of the North Dakota association he sent out questionnaires from which he learned that 75 per cent advertised only to help their local papers. At the time, he said, 15 per cent of the merchants of the state did not advertise and that ten mail order houses last year shipped 72 carloads of catalogs into the state and it was reported by wholesale houses, that 72 per cent of the merchants were insolvent. He said he took up a campaign to induce the country merchant to go on a cash basis and advertise and he has since succeeded in bringing 200 of them around to his system.

Self-Satisfaction.
The fool who thinks he has brains has it all over the wise man who lacks confidence in his wisdom.

Read and Use the Want Ad Column

Queer Plant Grows in Africa.

The welswitschia, which grows in southwest Africa, is one of the queerest plants in the world. The body of the plant resembles an enormous radish, and is sometimes 12 to 15 feet in circumference. From this grows two long leaves, which trail on the ground and are usually split into numerous ribbons. These are the only leaves produced, and they last through the lifetime of the plant, which is said to reach more than one hundred years. The colonial authorities maintain a small park for the preservation of this rare and remarkable plant.

CREAM SHIPPERS

"Ship your cream to us at Elgin and always get highest prices. Elgin is the butter center of the country. We manufacture both ice-cream and butter. Write for tags, information and our quotations. Always ask your dealer for Your FAVORITE Ice Cream and HILLSIDE Creamery Butter when you go to town. These products are both Made in Elgin.
B. S. PEARSALL BUTTER COMPANY
Elgin, Illinois.

Magnetizing Steel.

Magnetism is put into steel or iron by induction from some other magnet or by electric action. If a piece of steel is brought into the field of a magnet it becomes magnetized, and if it is touched or stroked with one end of the magnet it retains this magnetism. Another method of magnetizing is to wrap the steel in a coil of wire, through which is passed an electric current. The steel gradually and slowly loses its magnetism, particularly if it is heated to a high temperature or is subjected to mechanical treatment such as hammering, twisting, etc.

"Alloy."

The word "alloy" is derived from a literal Anglicization of the French phrase "a la loi"—"according to law." The phrase was transported across the channel in connection with gold or silver reduced in value by admixture with inferior metals in accordance with regulations established according to the law, but the English insisted on pronouncing the French "loi" as if it were spelled "loy" and finally dropped the second syllable entirely, thus coin-ing the word "alloy."

Nature's Police Force.

The following excerpt from Fabre's "The Story Book of the Field," gives a little insight into the many beneficent uses of the commoner field animals; "The bats deliver us from a host of enemies, and they are outlawed. The mole purges the ground of vermin; the hedgehog makes war on vipers; the owl and all night birds are clever rat hunters; the adder, the toad and the lizard feed on the plunderers of our crops." Thus nature supplies the husbandman with an efficient police force.—Brooklyn Eagle.

EXECUTOR'S NOTICE

Estate of Elizabeth Beers, deceased.

The undersigned, having been appointed Executor of the last Will and Testament of Elizabeth Beers late of the County of DeKalb and State of Illinois, deceased, hereby gives notice that he will appear before the County Court of DeKalb County, at the Court House in Sycamore, at the September Term, on the first Monday in September next, at which time all persons having claims against said Estate are notified and requested to attend for the purpose of having same adjusted. All persons indebted to said Estate are requested to make immediate payment to the undersigned.

Dated this 3rd day of July A. D. 1922.
G. E. Stott, Executor

Lessons From Enemies.

Have you learned lessons only of those who admired you, and were tender with you, and stood aside for you? Have you not learned great lessons from those who reject you, and brace themselves against you? Or who treat you with contempt, or dispute the passage with you?—Walt Whitman.

One Mosquito's Work.

A single malaria patient, driving along a ditch-bordered, mosquito-infested road, may provide hundreds of the insects with germs which they may pass on to every traveler along that road, says the New York Medical Journal.

Mrs. Dorothy Nelson is ill with quinsy.

Mrs. Albert Morehouse is among the sick.

Mr. and Mrs. A. F. Wallace were at Elgin Saturday.

Charles Couch is quite sick at the present writing.

J. R. Kiernan and James Dunn were in Chicago Thursday.

Kiernan & Gahl had cattle on the Chicago market Thursday.

A. J. Kohn was at Brodhead, Wis. the latter part of the week.

Rev. Thomas O'Brien spent several days of this week at Peru, Ill.

Miss Emily Lembke is home from Elgin for the summer months.

Mr. and Mrs. George Brungart of Rockford spent the week end here.

Frank Case of DeKalb was a caller at the Clayton Faber home Saturday.

Mr. and Mrs. Lee Storm announce the birth of a daughter Sunday, July 9th.

Mr. and Mrs. Koch of Kingston spent Sunday here at the Hutchinson home.

Mrs. Grace Eigenbraugh of Rockford is visiting relatives here this week.

Miss Esther Tyler had her tonsils removed at the Sycamore hospital Tuesday.

The Misses Zella and Lucille Fisher of DeKalb visited friends here over the week end.

Dan Hall of S. D. motored thru to Genoa last week and is visiting here with old friends.

James Dunn of Kenosha, Wisconsin is spending the week with his grandfather, J. R. Kiernan.

Mrs. Hiram Edsall is spending the week with her daughter, Mrs. O. Shneider, at Mawwood.

The Concordia club is having a moonlight picnic at Kingston Park this (Thursday) evening.

Mr. and Mrs. H. H. Perkins and the former's sister, Miss Irma, were Rockford visitors Saturday.

Miss Madeline Larson is enjoying a two weeks' vacation from her duties at the Leich Electric Co.

The M. E. Ladies' Aid society will meet at the home of Mrs. Henry Merritt Friday afternoon, July 14.

Rev. and Mrs. C. Briggs and two daughters of Freeport were guests at the R. B. Field home Monday.

Miss Cordia Gnakow of Detroit, Michigan, is visiting at the home of her aunt, Mrs. Elizabeth Schmidt.

The Foreign Missionary Society of the M. E. church met at the home of Mrs. Harvey King Tuesday afternoon.

The Catholic Order of Foresters will hold their regular meeting at the church hall Thursday evening, July 13.

Charles Patterson underwent an operation for the removal of tonsils at the Sycamore hospital Saturday morning.

Mrs. Ina Green of Rockford was a guest of Mrs. William Sowers and Mrs. Jas. Hutchison over the week end.

Royal Neighbors attention! After this date all dues and assessments shall be paid to Minnie E. Wallace, Rec.

Mr. and Mrs. Ward Olmstead and friends of Davis Junction spent the week end here with Mrs. Fannie King.

Mr. and Mrs. A. A. Stiles and daughter, Margaret, spent the week end at the Perry Harlowe home at Aurora.

Mr. and Mrs. Will Jackman are entertaining the former's parents

Mr. and Mrs. Frank Jackman of Michigan.

Walter Rosenfeld is spending a two weeks' vacation away from his duties as purchasing agent for the Leich Electric Company.

Dr. A. M. Hill and C. H. Maderer left Tuesday morning for several days' fishing trip in northern Illinois and southern Wisconsin.

Mr. and Mrs. Chas. Lembke and daughter, Anna, of Elgin spent the week end at the home of the former's brother, John Lembke.

Mrs. E. E. Sandall has been spending several days at Rockford where her mother, Mrs. Ford, recently underwent a serious operation.

Mr. and Mrs. John Patterson of Rockford and Mr. and Mrs. Jos. Patterson of Genoa were guests of Mr. and Mrs. Fred Patterson Sunday.

Mr. and Mrs. John Hutchinson and daughter of Elkhart, Indiana, were guests of the former's sister, Mrs. R. B. Field, the latter part of the week.

Mrs. Joe Goodrich of Milton, Wis., and Miss Lois Goodrich of the Chicago University were guests at the Jas. Hutchison home from Friday until Monday.

Mrs. Bertha Brendemuhl left Tuesday for an extended visit in northern Minnesota and Dakota. Mr. and Mrs. Henry Loptain of Sycamore accompanied her to Minnesota.

Mr. and Mrs. Maynard Corson and children went to Mt. Morris, Ill., Tuesday where they will be the guests of the former's brother, Dr. John Corson, for several days.

Dr. Alva Sowers and daughter, Jane, of Chicago motored here Saturday. Miss Jane remained for a week's visit at the home of her grandfather, William Sowers.

Mr. and Mrs. Will Lembke entertained the following guests on Sunday: Mr. and Mrs. Wm. Cook of Chicago, Mr. and Mrs. Tazewell, Mrs. Wm. Beth and son, Erwin, Mr. and Mrs. Frank Lang and daughter, Ruby, and son, Wm., of Elgin.

Mrs. Ed. Rudolph was hostess to the Country Club and mesdames Will Jeffery, Harry Whipple and Roe Bennett last Friday afternoon. Favors for high score at 500 were awarded Mrs. Alvi Peterson and Mrs. Roe Bennett. A dainty luncheon was served by the hostess.

Mr. and Mrs. Frank Hasler, Mr. and Mrs. Frank Eicklor, Mr. and Mrs. Raymond Eicklor, Mr. and Mrs. Frank Floto, Jr., and Mr. and Mrs. Chas. Lane motored to Crystal Lake Sunday and enjoyed a picnic dinner on the shores of the lake.

Mr. and Mrs. Heb Kitchen of Clarksville, Ia., and Mr. and Mrs. Ed. Shipman of Shellrock, Ia., motored to Genoa last Saturday to spend a week with Mr. Kitchen's and Mrs. Shipman's mother, Mrs. Lucretia Kitchen. The fore part of the week was spent on the farm of their brother, G. C. Kitchen and the remainder of the time will be spent in seeing friends of long ago.

Privilege of Nobility.

Lord Denbigh, whose coat-of-arms displays, appropriately enough, three curving knives, is nominally head-carver to the king of England. Similarly, Lord Mount Edgemoor is head butler; Lord Abergavenny, grand steward of the pantry; Lord Rothes, stirrup holder; Lord Winchester, cup bearer; while the duke of Newcastle is privileged to give support to the sovereign's arm when fatigued by the burden of the scepter.

To the bishop of Durham and Bath belongs the right of the bestowal of the royal person if the king succumb to faintness. Custom, too, requires that the archbishop of Canterbury shall prepare a bowl of soup should his Britannic majesty require it.

What is the Next Stop?

In New Zealand there is in use an automatic device for telling railway passengers the name of the next station. The names of the various stations are printed on a roll, which is rotated by toothed wheels. A "tripper" is placed about on the track or by its side, between each station, and this is so adjusted as to strike a lever on the passing car. The motion is communicated to the toothed wheels governing the roll bearing the station names, and the ringing of an automatic bell announces to the passengers the fact that the name of the next station is on view.

Wonderful Imagination.

A bright boy was asked by his governess to write a description of his (imaginary) travels in Italy. She was rather staggered, however, when she read: "After sailing about Venice on a gorgonzola and being disappointed in the smallness of the boasted 'Bridge of Size,' I went on to Rome. Again I was disappointed. The Coliseum there compared unfavorably with the one in London. The macaroni fields were white for harvest, but the spaghetti was only just in bloom. There was nothing on at the Vatican, as the pope no longer lives underground."

Easy Housekeeping.

Some women think that as soon as they have acquired a husband and a can opener they are equipped for life. —Seattle Post-Intelligencer.

Little Banking Stories

An Important Fact

Several men were talking one evening about some advertising the bank had sent them.

"I don't see why the banker wants us to go to him for advice," said one of them. "He has never been a farmer and he can't tell me how to farm."

"You don't get the right view point Tom," another man replied. "That banker is not asking you to come to him for advice. He asks you to come and talk with him about your problems so that he can understand you better and help you win."

"I've talked with that banker a good many times and I am very glad I have for it has been a mighty good investment."

What do you think about it?

Babylon Had Woman's College.

In an ancient Babylon province there have been discovered records on clay tablets belonging to the period of about 2400 B. C., showing that a woman's "college" or "university" had been established in a suburb of the city called Burna, and that women had equal rights with men in commercial, property and political affairs.

Trial by Jury.

Trial by jury antedates Alfred the Great. That monarch organized juries of 12 men, but even earlier six Welsh and six Anglo-Saxons acted as a jury in disputes between the Welsh and Saxons.

FUNERAL BEARERS ON STRIKE

Incident That Enlightened British Public Concerning Profession About Which Little is Known.

The strike of funeral bearers in Hull calls attention to a profession of which comparatively little is known.

People are apt to look upon the somber figures who walk beside the hearse and carry the coffin to the graveside as simply a part of the undertaker's outfit, but in reality these men are a profession to themselves.

Usually they are small tradesmen, writes a correspondent, or out of work, ready to earn a few shillings in this way. Every undertaker has his own little band who can be relied upon to come whenever a funeral is on.

Generally the undertaker provides the tall hats, a fact which accounts for the grotesque fitting of some of the hats, but the black suit must be provided or borrowed by the man himself.

The fee varies from 75 cents to \$1.25, according to the district, and there are men who can make \$5 a week and upwards out of this line. At Hull the fee has been \$1.25. Now the undertakers wish to drop it to \$1 a funeral, and hence the strike of the bearers.—Manchester Guardian.

The Reason.

Henry is a thrifty suitor, and the whole family of his "girl" know so, too. Occasionally the brothers wish to twit him about his thriftiness, but their sister has forbidden them doing so, and they have to keep still.

But the other night too good a chance came for Knight to miss it. It was raining, and Henry drove his car into the garage, and entering the house, said: "I don't know of a sound that is more musical to me than the rain pattering on the roof."

"It surely is some contrast to the noise of the gasoline sizzling over your motor," one of the brothers flashed back, "and a more comforting one, too."

The Golden State.

California has 99,617,280 acres of land, of which 18,417,643 are national forest, 20,239,977 are unappropriated public lands, 463,041 are Indian reservation, 745,798 are school lands, 4,555,641 are private timber holdings, and 27,931,444 are farms, with an approximately equal area classified as miscellaneous. Of the farm lands only 11,889,894 acres are improved, and of this but 3,893,000 are irrigated.

SLOW DEATH

Aches, pains, nervousness, difficulty in urinating, often mean serious disorders. The world's standard remedy for kidney, liver, bladder and uric acid troubles—

GOLD MEDAL PARLEIN OIL CAPSULES

bring quick relief and often ward off deadly diseases. Known as the national remedy of Holland for more than 200 years. All druggists, in three sizes. Look for the name Gold Medal on every box and accept no imitation.

Your Hair

need not be thin or attracted with gray—O-B-A-N HAIR COLOR RESTORES WHISKERS quickly revive it and bring back all its original color and luxuriance. At all good druggists, 50c, or direct from HESSIG-ELLIS, Chemist, MEMPHIS, TENN.

Nurses Needed Everywhere

American Hospital School of Nursing gives a complete course in nursing. Accredited School. Full maintenance and ample allowance to cover expenses. The Hospital is ideally located on the North side of the city, close to Lake Michigan within a few minutes' walk of Lincoln Park. For information, address Superintendent of Nurses, American Hospital, Chicago, Ill., Irving Park Boulevard near Sheridan Road.

Mary Marie

By
ELEANOR H. PORTER

Copyright by Eleanor H. Porter

SOME GIRL!

"Father calls me Mary. Mother calls me Marie. Everybody else calls me Mary Marie. The rest of my name is Anderson. I'm thirteen years old, and I'm a cross-current and a contradiction."

Mary Marie is telling the truth, but not all the truth—she isn't doing herself justice. For she's also adorable; that's just what she is.

And the story she tells proves it. You see, her austere father and her sunny mother are divorced and Mary lives fifty-fifty with them. So with her father she's Mary and with her mother she's Marie. And altogether she's a delicious blend of demureness and liveliness, of sense of duty and love of mischief.

While you're reading Mary Marie's story you're absorbed in its romance and love. After you get through you realize that you've read a powerful preachment on marriage and divorce—and real love.

The author? Oh, yes—Eleanor H. Porter, the most popular American woman writer, author of Pollyanna, "Dawn" and a dozen other novels that have sold by the million.

PREFACE

Which Explains Things.

Father calls me Mary. Mother calls me Marie. Everybody else calls me Mary Marie. The rest of my name is Anderson.

I'm thirteen years old, and I'm a cross-current and a contradiction. That is, Sarah says I'm that. (Sarah is my old nurse.) She says she read it once—that the children of unlikes were always a cross-current and a contradiction. And my father and mother are unlikes, and I'm the children. That is, I'm the child. I'm all there is. And now I'm going to be a bigger cross-current and contradiction than ever, for I'm going to live half the time with Mother and the other half with Father. Mother will go to Boston to live, and Father will stay here—a divorce, you know.

I'm terribly excited over it. None of the other girls have got a divorce in their families, and I always did like to be different. Besides, it ought to be awfully interesting, more so than just living along, common, with your father and mother in the same house all the time—especially if it's been anything like my house with my father and mother in it!

That's why I've decided to make a book of it—that is, it really will be a book, only I shall have to call it a diary, on account of Father, you know. Won't it be funny when I don't have to do things on account of Father? And I won't, of course, the six months I'm living with Mother in Boston. But, oh, my!—the six months I'm living here with him—whe! But, then, I can stand it. I may even like it some. Anyhow, it'll be different. And that's something.

Well, about making this into a book. As I started to say, he wouldn't let me. I know he wouldn't. He says novels are a silly waste of time, if not absolutely wicked. But, a diary—oh, he loves diaries. He keeps one himself, and he told me it would be an excellent and instructive discipline for me to do it, too—set down the weather and what I did every day.

The weather and what I did every day, indeed! Lovely reading that would make, wouldn't it? Like this:

"The sun shines this morning. I got up, ate my breakfast, went to school, came home, ate my dinner, played one hour over to Carrie Heywood's, practiced on the piano one hour, studied another hour. Talked with Mother upstairs in her room about the sunset and the snow on the trees. Ate my supper. Was talked to by Father down in the library about improving myself and taking care not to be light-minded and frivolous. (He meant like Mother, only he didn't say it right out loud. You don't have to say some things right out in plain words, you know.) Then I went to bed."

Just as if I was going to write my novel like that! Not much I am. But I shall call it a diary. Oh, yes, I shall call it a diary—till I take it to be printed. Then I shall give it its true name—a novel. And I'm going to tell the printer that I've left it to him to make the spelling right, and put in all those tiresome little commas and periods and question marks that everybody seems to make such a fuss about. If I write the story part, I can't be expected to be bothered with looking up how words are spelt, every five minutes, nor fussing over putting in a whole lot of foolish little dots and dashes.

As if anybody who was reading the story cared for that part! The story's the thing.

I love stories. I've written lots of them for the girls, too—little short ones, I mean; not a long one like this is going to be, of course. And it'll be so exciting to be living a story instead of reading it—only when you're living a story you can't peek over to the back to see how it's all coming out. I shan't like that part. Still, it may be all the more exciting, after all, not to know what's coming.

I like love stories the best. Father's got—oh, lots of books in the library, and I've read stacks of them, even some of the stupid old histories and

biographies. I had to read them when there wasn't anything else to read. But there weren't many love stories. Mother's got a few, though—lovely ones—and some books of poetry, on the little shelf in her room. But I read all those ages ago.

That's why I'm so thrilled over this new one—the one I'm living, I mean. For of course this will be a love story. There'll be my love story in two or three years, when I grow up, and while I'm waiting there's Father's and Mother's.

Nurse Sarah says that when you're divorced you're free just like you were before you were married, and that sometimes they marry again. That made me think right away: what if Father or Mother, or both of them, married again? And I should be there to see it, and the courting, and all! Wouldn't that be some love story? Well, I just guess!

And only think how all the girls would envy me—and they just living along their humdrum, everyday existence with fathers and mothers already married and living together, and nothing exciting to look forward to. For really, you know, when you come right down to it, there aren't many girls that have got the chance I've got.

And so that's why I've decided to write it into a book. Oh, yes, I know I'm young—only thirteen. But I feel really awfully old; and you know a woman is as old as she feels. Besides, Nurse Sarah says I am old for my age, and that it's no wonder, the kind of a life I've lived.

And maybe that is so. For of course it has been different, living with a father and mother that are getting

ready to be divorced, from what it would have been living with the loving, happy-ever-after kind. Nurse Sarah says it's a shame and a pity, and that it's the children that always suffer! But I'm not suffering—not a mite. I'm just enjoying it. It's so exciting.

Of course if I was going to lose either one, it would be different. But I'm not, for I am to live with Mother six months, then with Father.

So I still have them both. And, really, when you come right down to it, I'd rather take them separate that way. Why, separate they're just perfectly all right, like that—that—what-do-you-call-it powder?—sedlizer, or something like that. Anyhow, it's that white powder that you mix in two glasses, and that looks just like water till you put them together. And then, oh, my! such a fuss and fizz and splutter! Well, it's that way with Father and Mother. It'll be lots easier to take them separate, I know. For now I can be Mary six months, then Marie six months, and not try to be them both all at once, with maybe only five minutes between them.

And I think I shall love both Father and Mother better separate, too. Of course I love Mother, and I know I'd just adore Father if he'd let me—he's so tall and fine and splendid, when he's out among folks. All the girls are simply crazy over him. And I am, too. Only, at home—well, it's hard to be Mary always. And you see, he named me Mary—

But I mustn't tell that here. That's part of the story, and this is only the Preface. I'm going to begin it tomorrow—the real story—Chapter One.

But, there—I mustn't call it a "chapter" out loud. Diaries don't have chapters, and this is a diary. I mustn't forget that it's a diary. But I can write it down as a chapter, for it's going to be a novel, after it's got done being a diary.

CHAPTER I

I Am Born

The sun was slowly setting in the west, casting golden beams of light into the somber old room.

That's the way it ought to begin, I

know, and I'd like to do it, but I can't. I'm beginning with my being born, of course, and Nurse Sarah says the sun wasn't shining at all. It was night and the stars were out. She remembers particularly about the stars, for Father was in the observatory, and couldn't be disturbed. (We never disturb Father when he's there, you know.) And so he didn't even know he had a daughter until the next morning when he came out to breakfast. And he was late to that, for he stopped to write down something he had found out about one of the consternations in the night.

He's always finding out something about those old stars just when we want him to pay attention to something else. And, oh, I forgot to say that I know it is "constellation," and not "consternation." But I used to call them that when I was a little girl, and Mother said it was a good name for them, anyway, for they were a constellation to her all right. Oh, she said right off afterward that she didn't mean that, and that I must forget she said it. Mother's always saying that about things she says.

Well, as I was saying, Father didn't know until after breakfast that he had a little daughter. (We never tell him disturbing, exciting things just before meals.) And then Nurse told him.

I asked what he said, and Nurse laughed and gave her funny little shrug to her shoulders.

"Yes, what did he say, indeed?" she retorted. "He frowned, looked kind of dazed, then muttered: 'Well, well, up on my soul! Yes, to be sure!'"

Then he came in to see me.

I don't know, of course, what he thought of me, but I guess he didn't think much of me, from what Nurse said. Of course I was very, very small, and I never yet saw a little bit of a baby that was pretty, or looked as if it was much account. So maybe you couldn't really blame him.

Nurse said he looked at me, muttered, "Well, well, upon my soul!" again, and seemed really quite interested till they started to put me in his arms. Then he threw up both hands, backed off, and cried, "Oh, no, no, no!" He turned to Mother and hoped she was feeling pretty well, then he got out of the room just as quick as he could. And Nurse said that was the end of it, so far as paying any more attention to me was concerned for quite a while.

He was much more interested in his new star than he was in his new daughter. We were both born the same night, you see, and that star was lots more consequence than I was. But, then, that's Father all over. And that's one of the things, I think, that bothers Mother. I heard her say once to Father that she didn't see why, when there were so many, many stars, a paltry one or two more need to be made such a fuss about. And I don't, either.

But Father just groaned, and shook his head, and threw up his hands, and looked so tired. And that's all he said that's all he says lots of times. But it's enough. It's enough to make you feel so small and mean and insignificant as if you were just a little green worm crawling on the ground. Did you ever feel like a green worm crawling on the ground? It's not a pleasant feeling at all.

Well, now, about the name. Of course they had to begin to talk about naming me pretty soon; and Nurse said he did talk a lot. But they couldn't settle it. Nurse said that that was about the first thing that showed how teetotally utterly they were going to disagree about things.

Mother wanted to call me Viola, after her mother, and Father wanted to call me Abigail Jane after his mother; and they wouldn't either one give in to the other. Mother was sick and nervous, and cried a lot those days, and she used to sob out that if they thought they were going to name her darling little baby that awful Abigail Jane, they were very much mistaken; that she would never give her consent to it—never. Then Father would say in his cold, stern way: "Very well, then, you needn't. But neither shall I give my consent to my daughter's being named that absurd Viola. The child is a human being—not a fiddle in an orchestra!"

And that's the way it went, Nurse said, until everybody was just about crazy. Then somebody suggested "Mary." And Father said, very well, they might call me Mary; and Mother said certainly, she would consent to Mary, only she should pronounce it Marie. And so it was settled. Father called me Mary, and Mother called me Marie. And right away everybody else began to call me Mary Marie. And that's the way it's been ever since.

"First I found out how they happened to marry—Father and Mother."

(TO BE CONTINUED.)

The Cause.

Judge—Why does this prisoner's face look so pasty, officer?

Policeman—I pated him there, you honor.

HARDING ORDERS MINING RESUMED

President Tells Miners and Operators to Submit to Arbitration.

U. S. TO NAME COMMISSION

Executive Notifies Both Miners and Operators Mining Must Be Resumed at Once—Must Agree to Arbitration.

Washington, July 12.—President Harding on Monday delivered the government's final ultimatum to the warring coal miners and operators.

At a brief, tense session at the White House, the President flatly informed them that coal mining activities must be resumed at once and that they must submit the disputes which they apparently are unable to iron out to the arbitration of a commission appointed by the government.

In his talk to the coal operators and miners the President said:

"The information has come to me that your conference is deadlocked and at the best attempting to agree upon plans which will require extended time to work out. I have said heretofore that the government prefers you, who are parties to the dispute, should settle it between yourselves because you best understand all the problems involved.

"The government cannot settle it for you. It will force no man to work against his free will; it will force no man to employ men against the free exercise of an employer's right. The government will not be partisan, but the government is concerned with coal production sufficient to meet the industrial and transportation requirements of the country and to safeguard against fuel famine when winter comes again, and it is desired to have production resumed at once.

"Your government does desire to be helpful. With such a thought, therefore, I submit to you the following proposal:

"Mine workers are to return to work on the scale of wages which expired last March 31 and mines now idle because of strike or suspended operations to resume activities without interference with activities of mines now working.

"The 1922 scale to be effective until August 10.

"A coal commission to be created at once, consisting of three members selected by the mine workers, three members selected by the mine operators and five members to be named by the President. All decisions by this commission shall be accepted as final.

"This commission to determine, if possible, within 30 days from today, for the miners on a strike, a temporary basic wage scale which scale shall be effective until March 1, 1923.

"In event that the commission is unable to report its scale by August 10, it shall have power to direct continued work on the 1922 scale until a superseding scale is ready.

"The commission shall investigate exhaustively every phase of the coal industry. It shall reveal every cost of production and transportation. The President will ask congress to confer authority for the most thorough investigation and make appropriations necessary to do such work.

"The commission shall make recommendations looking to the establishment or maintenance of industrial peace in the coal industry, the elimination of waste due to intermittency and instability and suggest plans for dependable fuel supply.

"I have taken this short cut to a resumption of operations because I believe it to be in the interests of public welfare.

"It is that simple form of adjusting disputes which answers the call of good conscience and a just civilization. When two great forces do not agree, there must be a peaceful way to adjustment and such an arbitration opens the way.

"I do not expect a reply without due consideration. Please take the proposal to separate conferences. I wish you to appraise the situation, weigh your responsibilities and then answer this proposal as you wish to be appraised by American public opinion.

"I am speaking first of all for the public interests, but I am likewise mindful of the rights of both workers and operators. You are also an inseparable part of that public interest. With due regard to all concerned, it ought to be easy to find a way to resume activities and command the approval of the American public."

Bandit Gets \$25,000 Gems.

Los Angeles, Cal., July 12.—A daring daylight bandit, who gained entrance to the house by posing as a telephone repairman, locked Miss Susanna Fair and her maid in a closet, escaping with jewels valued at \$25,000.

Rain Makes Farmers Happy.

Chicago, July 12.—Farmers throughout Illinois, Wisconsin and Iowa and states to the west are jubilant over rain that drenched this district between midnight and morning. Chicago's rainfall measured .86 inch.

Dye's Peculiar Property.
It seems probable that the discovery of a new dye by a British concern will have an important influence on the dyeing industry, for this dye has the peculiar property of coloring artificial silk fabric without affecting cotton. Should a mixed fabric of cotton and silk be dipped in this dye, the silk will take the color. The cotton in the fabric may then be colored by washing in a dye that affects only cotton. This combined dyeing makes it possible to produce a part-colored effect in mixed fabrics after they are woven.—Popular Mechanics Magazine.

Uncle Eben.
"Of course, you want to look at de bright side," said Uncle Eben, "but ain' much comfort in standin' outside lookin' at de 'lectric lights, when you wants to go inside an' look at de pictures."

The Joke Market.
"You think culture is on the decline?" "Yes, we get very few jokes out of relativity."

Ah, Yes!
"When a man hates work," said Uncle Eben, "he has done gone back on his best friend."

What Is It Worth to Change a Tire?

On the road changing a tire is not an especially pleasant task.

The dust or mud, the grease and grime, the tedious delay—all are things we like to avoid.

But the time to think about these things is when you buy the tire—not after the blow-out occurs.

Forsome tires blow out much more easily than others. Outward appearance counts for little.

It is the material in the tire and the construction of it that determines its strength.

Goodyear recognizes these facts and all Goodyear Tires are made of long staple cotton.

Take the 30 x 3 1/2 Cross Rib Clincher Tire here illustrated, for example.

It is made of Arizona cotton, the fibres of which average 1 1/2 inches long.

Many 30 x 3 1/2 clincher tires are made of short staple cotton from 1/2 inch to 1 1/4 inches long.

This means less strength and greater danger of blow-outs—more tire troubles.

Yet this high grade guaranteed Goodyear Tire costs only \$10.95.

You can buy some tires for even less than this but none with the fine materials and construction of this one. Can you afford to take a chance on more frequent tire troubles for the sake of the slightly lower price of cheaper tires?

GOODYEAR

USE TRACTOR ON TRIP TO CANADA

Party of Settlers From United States on Way to the Land of Big Crops.

Settlers on their way to and through Canada do not always rely on the railroads for transportation. Here, for instance, is a photograph of a

party from one of the northern states on the way to their new home near Lake Winnipegosis, Manitoba. They were a sturdy, self-reliant lot and carried with them a full complement of farm machinery. With the tractor outfit they intended to commence rather extensive operations this spring on the land which their scouts had already inspected and reported on favorably as to its productiveness.

At almost every point on the Canadian border where there are located means for admitting settlers, the reports are that it is almost a daily occurrence to admit settlers from states as far off as Texas who have adopted the automobile as a means to

carry themselves and their families to the country of their choice. Such settlers are bound to succeed. Some of them go two or three hundred miles inland, and select their homes in the park districts of Manitoba, Saskatchewan and Alberta. Others purchase improved and unimproved farms in the more thickly settled districts in the southerly and central parts of these provinces. Wherever they may go, they are certain to secure land of certain possibilities. They will see grain crops of high value, wheat that will produce from 20 to 40 bushels per acre, oats giving high yields, barley a certain producer, and grass and fodder in quantity and quality that

will satisfy them that the cattle and stock raising possibilities are fully as good as they have been told.

The reports from all parts of Western Canada at the present time fully bear out the most optimistic expectations and hopes of the early days of seeding. Evidence of the splendid growth of this year is the fact that alfalfa was cut on the 15th of June and yielded nearly two tons to the acre.

Corn planted on the 23rd of May, on the 5th of June was showing several inches about the ground, and making glad the heart of the farmer who had built his silo, which he hoped to fill in the latter days of August.—Advertisement.

Brief and Effective.
In early days of Vermont, when marriages were solemnized without getting a license, one bitter midnight, 29 degrees below zero, a couple called the squire to the window. Shivering, in his nightshirt, he asked: "What in h—l do you want?" "We want to be married." "Be married and be d—d," and he slammed the window down.

This is probably the shortest wedding ceremony that coupled legal accuracy with the religious prayer.—From Off the Record.

Cuticura Comforts Baby's Skin
When red, rough and itching, by hot baths of Cuticura Soap and touches of Cuticura Ointment. Also make use now and then of that exquisitely scented dusting powder, Cuticura Talcum, one of the indispensable Cuticura Toilet Trio.—Advertisement.

Boston and Montgomery.
The lady from Boston and the lady from Montgomery had taken a decided dislike to each other on the occasion of their first meeting, and it was at a fashionable reception, at which they chanced to meet, that the Bostonian seized an opportunity to publicly show her contempt for the Montgomeryerian. "You are from Alabama, where they still lynch people, aren't you, dear?" The Alabamian replied: "Yes, and you just must come down some time."—Boston Transcript.

Back to the Fold.
For ye were as sheep going astray; but are now returned unto the Shepherd and Bishop of your souls.—1 Peter, 2:25.

British Columbian Iron Resources.
A complete survey of the iron resources of British Columbia will be commenced this summer. The Dominion geological survey, in co-operation with the provincial department of mines, will conduct the work. R. G. A. Young, the geological survey department's specialist, will commence the work in a few weeks.

Important to Mothers
Examine carefully every bottle of CASTORIA, that famous old remedy for infants and children, and see that it bears the Signature of *Wm. D. Hooper*. Children Cry for Fletcher's Castoria.

The Star Act.
Lillian Litzel, acrobat and solo performer in the circus, was giving an exhibition of trapeze work, high above the floor of the darkened arena. Her acrobatics are of the most violent sort and in the stunt she had just finished she had thrown her body back and forth with jerks that looked as though they would tear her arm from its socket.

At the end she hung motionless by one arm, facing the glare of the spotlight. "Mamma," piped a small voice anxiously, "I should think she'd strain her eyes."—Pittsburgh Dispatch.

All resident students at the University of Arizona are obliged to sleep in the open air on porches. The fraternity houses have similar sleeping arrangements.

AGRICULTURE

Prepared and Edited by the College of Agriculture, University of Illinois

Attachment for Picking Up Lodged Soybeans

This homemade attachment was made by E. L. Gillham, of Edwardsville, and proved practically 100 per cent efficient. It has the advantage of having "fingers" much longer than those made for grain, extending out a sufficient distance in front of the sickle bar so that all the beans are straightened out and most of them standing practically erect as the sickle reaches them.

Eradicate Thistles

The Canada thistle is a perennial, which means that it lives from year to year without dying. New plants develop, both from seed and from underground roots. It can be controlled by preventing top growth.

The process of eradication should start after a small grain crop when the plant is in the flowering stage. This is a weak period in the life of the plant. The land should be plowed and double disked thoroughly in order to cut the roots into fine pieces, and at the same time prepare a good seed bed. Most folks make a mistake at this point since they recognize that each small root will produce a plant. This is just the result to be desired.

In order that each one of these roots live, it must send up a shoot and produce leaves. These shoots should be cut off by disking as often as they appear. A second plowing may be necessary if the weeds get beyond control. The plant food is made in the leaves, a part coming from the soil, through the roots, and a part having been taken in through the leaves from the air. Without leaves the plant is unable to make food and grow, except for the small amount of food which is stored up in the roots. By preventing leaf growth, and at the same time encouraging the plant to draw upon the store of food in the roots, the supply can be exhausted. This will cause the death of the plant. The advisability of cutting the roots into fine pieces can now be noted in view of the fact that it would require less time and labor to exhaust a small piece of the root of its plant food than it would a larger one.

Persistent work during the fall months followed by late deep plowing, should eradicate most of the plants. It is to be recommended that the field be well prepared the following spring and put to a cultivated crop like corn. Thorough cultivation should be given, and every effort made to cut or pull plants which have been able to survive the treatment. The last week is the most important since it would be the source of a new start of Canada thistles.

Growing Soybeans

The importance of the soybeans as a valuable, annual, leguminous crop, is rapidly gaining recognition in Illinois, and the acreage devoted to its culture has increased remarkably during the past decade. Because of this rapidly increasing acreage, seed has become high in price; which fact has led many farmers to the mistaken notion that the soybean is a crop to be grown chiefly for the production of its seed. As a matter of fact, however, seed production is to be considered of secondary importance when the many actual merits of this crop are taken into account.

There are a number of factors which have contributed to the great increases in the soybean acreage in Illinois. Among the more important are: (1) It is an annual legume; (2) it fits well into cornbelt rotations; (3) it makes excellent hay; (4) it is good for pasture; (5) it furnishes a good silage material (6) It is subject to few diseases and has few insect pests; (7) it produces seed abundantly; and (8) it is rich in oil, therefore valuable to commerce.

Then and Now

There is a vast difference in the quality of cows and their feed contrasted in conditions as they exist at the present time with those of 15 years ago. Then, no alfalfa and only a small acreage of clover was grown. Now, from 11 to 30 per cent, with an average of 18 per cent of the area of the 30 farms studied in Kane and Lake counties is in alfalfa or clover. Every farm has one or more silos, while formerly, there were practically none. The changing of the ration from dry

corn stover, and timothy hay to corn silage and alfalfa or clover hay, speaks wonders for increasing and cheapening the production of milk and the better physical condition of the cows during the winter and spring.

Under the old method many cows were turned to pasture in an encased condition, and it took a month on grass to get them in good flesh. Then the flies and hot weather tended to keep the production low the rest of the summer. When the level of production is once reduced it is difficult to get the milk flow up again during that lactation period.

Among the many good things seen, one that stood out strong, was the way in which Mr. Averill, Sr., raises dairy heifers on the Kane county farm near Batavia. A Holstein heifer, seven months of age, was exhibited that weighed 710 pounds. Mr. Averill showed a group of seven Holstein heifers which were a little over a year old and that received no feed but corn silage for the past seven months.

Of course these heifers should have had some legume hay in connection with the silage, but even without hay they were as well grown and in better condition than many heifers inspected that had received a considerable amount of grain during the winter.

Southern Fields

The Odin Experiment field has been operated by the University of Illinois for twenty years, and during that time it has shown that the worn soils of the southern part of the state can again be made highly productive by the use of crop rotation, legumes, limestone and phosphorus. As an average of the past 16 years, this treatment has produced 26 bushels of wheat per acre while the untreated land produced 10 bushels per acre. This treatment has produced as a sixteen-year average 35 bushels of corn per acre and untreated land has averaged but 10 bushels, and in the past sixteen years there has never been a failure of sweet clover on this field. This is a significant fact because growing of clovers has become a lost art on southern Illinois farms on account of almost constant failures of this crop. The results on this experiment field are indisputable facts which show that southern Illinois farming can be put on a much more profitable basis by the use of lime, legumes and phosphate.

Poorland farm, which was purchased and developed by the late Dr. Hopkins, is in the vicinity of the Odin Experiment field and bears out the experimental results obtained. As a four-year average on this farm on land treated with manure, lime, and rock phosphate, the wheat yield has been 30 bushels per acre, while on land receiving manure alone the yield has been 7 bushels per acre. Sweet clover has had a remarkable record on this farm and this year there is 123 acres of sweet clover now growing on the farm.

Use Milk

Use plenty of milk. Milk is one of the best of all foods to use during the hot summer weather. Its proteins build up and repair the muscles. Its fat and sugar furnish the energy for doing work. Its lime and phosphorus make strong bones and sound teeth. Its vitamins prevent certain diseases and promote the general health of the user. Milk does not overtax digestive systems which are easily upset during hot weather. Its food values are easily adapted to their purposes. Use milk—sweet or sour—as a drink. Use it in cooking. Give each child a quart of milk a day and each adult as much as he wants. If plenty of milk is used there will be fewer headaches, fever digestive disorders and in general more vigor and better health.

NEGRO'S MEMORY A PUZZLE

Of Limited Educational Attainment, Colored Man Has Wonderful Fund of Useful Information.

Jim Gilmore, a negro aged fifty-six, who lives in the town of Greenville, Tex., is said by scientists who have examined him, to possess one of the most remarkable memories known. With apparently a small amount of educational training Gilmore is able to quote any verse in the Bible suggested to him. He answers any questions pertaining to the Civil war, the Spanish-American war and the late World war, giving dates of all outstanding historical events. He can name every station and water tank from San Francisco to New York on the principal transcontinental railroads.

There seems to be no limit to the amount of poetry Gilmore can quote. "The Sinking of the Titanic," numbering 40 verses, and "The World War From Beginning to End," in 60 verses and three parts, is another literary achievement of which he can boast. He has traveled extensively and possesses an excellent vocabulary for one of limited education.—Exchange.

Her Achievement.

"My wife got after a blue racer with a hatchet out in the yard yesterday," related Gap Johnson of Rumpus Ridge. "After going twice around the track, as it were, she ketched her foot in a mess of baling wire and fell and sprained her arm, if she didn't break it outright. But, by cripes, she shore cut off that there snake's head as she went down!"—Kansas City Star.

WAS UNDER NO OBLIGATION

Transaction of Youthful Newspaper Proprietor Had Been on a Strictly Business Basis.

George developed a journalistic instinct at the early age of fifteen. With the consent of his father and some assistance from the same source he bought an "amateur printing outfit" and started the Klinkerville Monthly Journal, subscription price 50 cents a year, payable in advance. "I suppose you call yourself the editor and proprietor of this office," remarked an envious young associate who dropped in at his "sanctum" in the basement of the paternal dwelling one day.

"Of course I do," responded the youthful journalist. "I don't owe a cent on it."

"Proprietor! Umph. Everybody knows you got \$25 from your father to start it with."

"Yes, sir!" stoutly rejoined George. "And his subscription for the Journal is marked paid fifty years ahead on my books!"—Pittsburgh Dispatch.

Half a Dozen Fines Did It.

"Mr. Grumpson is a changed man since he bought a car." "For the better?" "Yes. There was a time when he wouldn't take anybody's advice, but now he lends an attentive ear to traffic policemen."—Birmingham Age-Herald.

We appreciate hard facts when they come in the shape of silver dollars.

British Columbia Goat Farms.

There are several farms in British Columbia where goats are raised exclusively and which have herds of several hundred each. These farms not only make excellent profits on milk which is shipped to Vancouver, Victoria and other cities for the use of children and invalids, but on young animals that are sold to supply the rapidly developing market.

Goat breeding is being taken up by suburban city dwellers, the people of small towns and farmers. Goats are hardy animals and if permitted a good range will rustle their own living the year around. If kept confined, their upkeep is inexpensive while their milk sells for a much higher price than cow's milk. Yields of six quarts a day are common.

Quiet.

"They're very modest, aren't they?" "Very. Even insisted on being divorced quietly."

If a man has never made an ass of himself, it is probably because Nature beat him to it.

There may be plenty of room at the top, but victims of that tired feeling never reach it.

Gentlemen are necessarily conceited because a gentleman never forgets himself.

Labor worketh a harshness on sorrow.—Montaigne.

Fat and fustiness can both be walked off.

KINGSTON DEPARTMENT

MRS. F. R. BRADFORD, Correspondent and Authorized Agent

RETURN FROM AUTO TRIP

Number of Kingston Folks Tour the East, Visiting Niagara Falls

On July 2, 1922 a party consisting of Esther Polly, Loyd, Laura, and Bertha Branch left Kingston, Illinois, at three p. m. for an automobile trip to Niagara Falls. Besides themselves they carried tents, mattresses, blankets, suit cases, tin boxes, rope, spare tires, axes and everything else they could think of. They expected to be gone a week and missed it only 1. hours. They were delayed by tire trouble, battery eccentricities and the necessity of eating and sleeping. They followed the Lincoln highway from DeKalb, Ill., to Ligonier, Indiana, and the Chicago, Toledo Pike from there to Bryan, Ohio and any old road from there to Cleveland, at which place they arrived at noon, July 4, one half hour behind schedule. From Cleveland the road was all paved with cement or brick and they made good time arriving at Niagara Falls at noon, July 5.

Indiana, Ohio, and Pennsylvania linger in the memory as a maze of wheat fields, towns, tire changing, cherry orchards, vineyards, raspberry patches and camping sites. Niagara Falls need not be described. Those who have not seen them have read better descriptions than the writer can give, any larger stories that may be told about them should be added to, rather than discounted; they are like a billion dollars—they cannot be

conceived of, even when seen. They are the greatest downfall of drink since the eighteenth amendment. The party drove over the big bridge into Canada arriving there at noon, July 6. After convincing custom officials that they were fit to enter Canada, they started through. Canada constitutes about such a maze of hazen recollections as the states mentioned above. They drove through Hamilton and London, two large cities, and left that country from Savina, ferrying across to Port Huron, Michigan, where they had to convince another set of custom officials that they were fit to enter the United States. They arrived a Milan, Michigan, at three p. m., July 7, and spent the night with Mr. and Mrs. Fred Fulkerson who are well known to many Kingston people. They left Milan at 6:30 a. m., July 8, arriving at Kingston at 1 a. m., July 9, after a continuous drive of 337 miles. They were away for six days and 2 hours and drove 1407 miles. It is a great trip but should be made in two or three weeks instead of one.

Mr. Bellas of Oregon was here on business Saturday.
W. H. Bell motored to Belvidere on business Friday.
P. Harlow of Aurora was here on business Wednesday.
Ed. Meade of Kirkland was calling on friends here Sunday.

Firestone
GUM-DIPPED CORDS
and Their High Mileage Records

The high mileage records of Firestone Cords continue to emphasize the fact that Firestone methods are different and better. These records, steadily increasing in number and in mileage totals, justify the Firestone contention that there is one best way to build tires.

Among the primary sources of Firestone extra mileage is double gum-dipping—the saturation of the cord plies in a vat of liquid gum—thus coating each cord and virtually eliminating internal heat and friction.

Another is Firestone air bag curing, with its 200 pound pressure, which places every cord accurately and equalizes the tension.

By blending the rubbers of different plantations and types, and by tempering it before mixing, Firestone men add still more mileage.

Many cord tires are good—a few are better—Firestone users say one is best.

Those who have already experienced Firestone mileage, have stopped shopping and experimenting—they have made these cords standard equipment. Investigate your friends' success with Firestone Cords—and buy your next tire accordingly. Come in and get your share of extra mileage.
