All customers buying goods of us after June 9 will get 20c more on the dollar by the use of our New Trade Check Plan. Ask to see our Special Novelty Department.

D. G. OTTMAN,  
Kingston, Ill.

**The Horse Pedometers.**  
The whorls of hair on the coats of horses and other animals are natural pedometers, inasmuch as they register the locomotive activities of the animals on whose bodies they are found.

The best examples and the greatest number of these hairy whorls and crests are found on the domestic horse.

A study of the action of the underlying muscles explains the origin of these peculiarities in the lay of the hair and furnishes the justification for calling them pedometers, although the analogy is, of course, merely superficial.

### Fatal Gas.

Illuminating gas has caused more deaths in some states recently than have scarlet fever, infantile paralysis, or typhoid fever. In Massachusetts it has become an important cause of death and serious sickness. The repeal of the law regulating the amount of carbon monoxide in gas has been, according to Prof. Sedgwick of the Massachusetts Institute of Technology, one of the direct causes of the increase here, and it is recommended that the state go back to the old-fashioned coal gas and prohibit the manufacture of water gas.—Boston Post.

### Auto Burns

While driving his five-passenger Ford automobile on the road between Malta and DeKalb on Sunday evening, Guy Stanton of DeKalb with a party of friends saw everything inflammable about the car destroyed by fire. The gasoline tank began leaking, and while the owner was trying to repair it, the gasoline took fire and painfully burned his hands and arms and enveloped the car in flames. The party could do nothing but watch the car burn.

**Paper Goes Up**  
From all the big paper supply houses in Chicago and other large cities during the past month has come a notice of an advance in all paper stock, especially linen and bond papers used as stationery by merchants and business men. The advance amounts to quite a sum, and as a matter of course it will first effect the country newspaper man who is a buyer of these goods.

### Mrs. Pond is Home

Mrs. W. L. Pond arrived from the hospital in Chicago on the noon train. Judge Pond and Dr. Everett accompanied her and she stood the trip bravely. They think she is going to get along nicely from now forward and expect to have her walking about before the summer is over—DeKalb Advertiser.

### Origin of the Stocking.

A writer in a French newspaper has been investigating the origin of stockings. It appears that Henry II, when preparing for the marriage of his sister in 1559 first conceived the idea of silk hose, and was the first to wear silk knitted stockings at that epoch-making event. A hundred years later one Huidres established a factory for stockings in the Bois de Boulogne. This was the first hosiery factory in France. It was a success at the start, and, when it received protection from the then ministers, it was a kind of gold mine. In 1683 the venture was turned into a company. From it arose "the Society of Silk Stocking Makers."

### Tragic.

"Here's another aeroplane horror," remarked Cynicus, looking up from his newspaper.  
"Anybody killed?" asked Sillicus.  
"No," growled Cynicus. "Couple married in one!"

**Notice! Notice!**  
All persons desiring the street in front of their property oiled this spring are requested to call on R. B. Field on or before Monday evening at six o'clock. It is intended that oil will be ordered at that time and if you have not made known the fact that you want the improvement you may be too late. The size of the car ordered will depend on the wish of the residents. Do not forget, call Mr. Field by phone today or call and see him personally.

### Pipe Organ

Elmer Boynton of Sycamore is installing in his home a handsome Estey pipe organ. His is probably the first home in the county in which has been placed such an instrument, and it is needless to say that a great deal of enjoyment will come from it. The organ represents the very latest in organ construction and embodies the very best in design and tone qualities known to the manufacturers.

### Kicked by Horse

The eleven year old son of Emil Becker was kicked in the face by a horse Sunday, resulting in serious injuries. One tooth was knocked out and flesh torn from the nose. While leading the animal it turned and kicked the boy full in the face. He was brought to the home of his grandfather, Henry Becker, in this city where he is receiving medical attention.

Prof. Ellis of the Ellis Business College of Elgin was in Genoa Tuesday.

## What the Rambler 10,000 Mile Guarantee Means

Have You Seen  
The Rambler  
Cross Country?  
\$1650

This map gives you a graphic idea of what the Rambler guarantee means to you in point of mileage.

**T**HIS guarantee is backed by every one of our Rambler dealers and branches.

Back of them is a factory employing eighteen hundred men, with a floor area of twenty acres and producing ninety-six per cent of the parts that go to make up this car.

The Rambler factory has produced twenty-two thousand motor cars and the average cost for repair parts on each one of these cars last year was only twelve dollars and ninety cents.

Some of these cars have been in use eleven years. One-half of them have been in use five years or more. These are the facts which warrant the makers' confidence in the Rambler to the extent of giving the signed guarantee for ten thousand miles.

The Cross Country sales to date are three times those of last year.

See the car and you will learn the first reason—its appearance.

Ride in the car and you will know the second reason—its comfort.

Ask your banker about the stability of this company—his answer is the third reason.

This ten thousand mile guarantee is the fourth reason. Appearance, comfort, stability and the 10,000 mile guarantee.

Are not these reasons enough?

Write your name and address on the coupon below and forward it to us immediately that we may send you full information.
