Genoa Boys are Victors by Safe Score But Girls Get out by Narrow Margin-DeKalb and Genoa Highs Tonight

The same old story was re- by law. locals. In the boys' game it was almost too easy, Hampshire standing no show against the terrific onslaught of the Genoas. "Pete" Harvey played a good center and made a sensational goal throw from the center of the field. Downing's one hand throw was also worthy of special mention, Abiram Crawford was also charged with an extra quality of ginger. His running leap over the heads of two or three players being a feature of the game. The final score was 40 to 13.

The girls' game was close and naturally exciting and not until the last whistle blew could the game be conceded to either team. The Hampshire girls fought stub bornly and were only defeated by Miss Leonard's accuracy in landing the ball in the basket on free throws. The score was 5 to 3. DeKalb Tonight

On this (Friday) evening the locals will meet the strong teams from the DeKalb high school. Both the boys and girls will play. DeKalb has the strongest team in this section, with the possible exception of Genoa, and the contest should be good. Don't fail

The accident and the alleged injuries occurred one evening in September, 1904. The old Wells building on the north side of Main street had been moved, leaving the open cellar adjoining the side walk. Mrs. Riddle passed that way when it was quite dark and in some manner fell into the excavation. She bases her claim for damages on the plea that no provision had been made for the warning of pedestrians.

WOODMEN WORRIED

Into Trouble

The official publication of the Modern Woodmen of America, Dean, daughter of Moses and The Modern Woodman, has been denied the privilege of admission to the postoffice at Indianpolis, where it is now being printed, as second-class matter by the postoffice department.

F. O. VanGalder, editor of the Mr. Siglin showed his generous publication, left immediately for Washington, where he expects to be able to present the situation to the postoffice department in a manner that will remove the ban. He feels confident of his success as the question arose before and was settled satisfactorily.

It has been admitted as secondclass matter during the biennial period in the postoffice at Lincoln, Neb., but upon entering upon the new contract with the Indianapolis printers, it was necessary to make a new application to the department and this was when the ruling came.

It would cost the society \$8,000 per issue to circulate otherwise.

tale had already been told to Von Dessauer by Father Clement. The pair stood up under the golden glow of the swinging silver lamps. It was a strange scene. For, surely, never was marriage more wonderfully celebrated on this earth than this of two fair maidens (for so they still appeared) taking hands at the bidding of chancellor, to live only for each other in all the world.

Presently the solemn "Let no man put asunder" was said, the blessing pronounced, and Leopold von Dessauer came forward with his usual courtly grace to salute the newly made

"Dear lady," the Chancellor of Plassenburg answered gently, "I am an old man, and I have observed that Hymen is the most tricksome of the divinities. His omens go mostly by contraries. Where much is expected, little is obtained. When all men speak well or a wedding and all the prophets prophesy smooth things-my fear is great. But be of good cheer. Though you have chosen the rough road, the perilous venture, the dark night, the deep and untried ford, you will yet come out on a plain gladness, into a day of sunshine, and at the eventide reach a home of content."

OPEN PUBLICITY THE BEST

When the maker of a medicine, sold through druggists for family use, takes his patients fully into his confidence by frankly and fearlessly publishing broadcast as well as on its bottle wrappers, a full list of all its ingredients in plain English, this action on his part is the best possible evidence that he is not afraid to have the search light of investigation turned full upon his formula and that it will bear the fullest scrutiny and the most thorough investigation. Dr. Pierce's Favorite Prescription for the cure of the weaknesses, periodical pains and functional derangements of the organs distinctly feminine, is the only medicine put up for sale through druggists for woman's special use, the maker of which is not afraid to take his patients into his full confidence by such open and honest publicity.

woman's special test, the mater of which is not afraid to take his patients into his full confidence by such open and honest publicity.

A glance at the published ingredients on each bottle wrapper, will show that it is made wholly from native, American, medicinal roots, that it contains no poisonous or habit-forming drugs, no narcottes and no alcohol—pure, triple-refined glycerine, of proper strength being used instead of the commonly employed alcohol, both for extracting and preserving the active medicinal properties found in the roots of the American forest plants employed. It is the only medicine for women's pecular diseases, sold by druggists, that does not contain a large percentage of alcohol, which is in the long run so harmful to woman's delicate, nervous system. Now, glycerine is perfectly harmless, and serves a valuable purpose by possessing intrinsic value all its own, and besides it enhances the curative effect of the other ingredients entering into the "Favorite Prescription."

Some of the ablest medical writers and teachers endorse these views and praise all the several ingredients of which "Favorite Prescription" is composed—recommending them for the cure of the very same diseases for which this world-famed medicine is advised. No other medicine for women has any such professional endorsement—worth more than any number of ordinary testimonials. If interested, send name and address to Dr. R. V. Pierce, Buffalo, N. Y., for his little book of extracts from the works of eminent medical writers and teachers, endorsing the several ingredients and telling just what Dr. Pierce's medicines are made of. It's free for the asking.

Any-Scalp Now in Good Condition Cured by Cuticura.

"I used the Cuticura Soap and Ointment for a diseased scalp, dandruff, and constantly falling of hair. Finally I had to cut my hair to save any at all. Just at that time I read about the Cuticura Remedies. Once every week I shampooed my hair with the Cuticura Soap, and I used the Ointment twice a week. In two months' time my hair was long enough to do up in French twist. That is now five years ago, and I have a lovely head of hair. The length is six inches below my waist line, my scalp is in very good condition, and no more dandruff or itching of the scalp. I used other remedies that were recommended to me as good, but with no results. Mrs. W. F. Griess, Clay Center, Neb., Oct. 23, 1905."

Thursday, January 4, 1906.

Representative Payne, Republican floor leader, spoke for four hours in the house advocating the passage of the Philippine tariff bill. Acting on a printed charge that members of the House were sending cows, libraries, and all manner of freight free through the mails the House instructed its postoffice committee to make an investigation as to whether members are abusing the tranking privilege. The question of which committee shall get the insurance question was referred to the judiciary committee for an opinion. Representative McCall introduced a resolution providing for an annual appropriation of \$15,000 for the President's traveling expenses. He also introduced a joint resolution providing for the neutralization of the Philippines. At \$1.55 p. m. the House adjourned to to-morrow.

In the Senate Mr. La Foilette of Wisconsin took the oath, being introduced by Senator Spooner. A resolution calling for information of affairs in Santa Domingo was presented by Mr. Tillman. INCIPIENT CONSUMPTION.

How Food Headed Off the Insidious Disease.

The happy wife of a good old fashioned Michigan farmer says: "In the spring of 1902 I was taken sick-a general breaking down, as it were. I was excessively nervous, could not sleep well at night, my food seemed to do me no good, and I was so weak I could scarcely walk across

the room. "The doctor said my condition was due to overwork and close confinement and that he very much feared that consumption would set in. For several months I took one kind of medicine after another, but with no good effect-in fact, I seemed to grow

"Then I determined to quit all medicines, give up coffee and see what Grape-Nuts food would do for me. I began to eat Grape-Nuts with sugar and cream and bread and butter three

times a day. "The effect was surprising! I be gan to gain flesh and strength forthwith, my nerves quieted down and grew normally steady and sound, sweet sleep came back to me. In six weeks' time I discharged the hired girl and commenced to do my own housework for a family of six. This was two years ago, and I am doing it still and enjoy it." Name given by

White lace waists are worn again this autumn, but unless the lace can be really good of its kind, and hence the bodice an expensive one, a simpler style of waist is preferable. Two or three differen t kinds of lace are now effectively combined on the same waist, and when a heavy and fine lace are employed at once, as Irish point lace and delicate Valencinnes, the result is most attractive.

While embroidered waists are as much in vogue as ever, elaborate insertions of lace are now as frequently seen alone as with the embroidered work. Hand sewing is more than ever in vogue, and while the seams of a fine waist may be machine stitched, all the tucks that bands of lace entredeux must be added by hand. Open embroidery is perhaps the most popular, while the waist of open English batiste embroidery is decidedly effective, particularly when worn over a slip of pale green or lilac or some light, becoming shade.

Vogue of Contrasts. The idea of contrast is emphasized in a great many coats. Cuffs and collar sometimes will be made of contrasting color, or perhaps only a deeper shade of the color of the coat, but deep enough for each shade to be set off by the other. Sometimes a tiny vest-almost a vestee-is introduced, with its color scheme made up of interesting braids, made rich by a thread or two of gold tangled up in some mysterious way among the silken threads. A pale-blue coat (the one pictured) had for its trimming blue silk braid, a shade that matched the foundation exactly, with a tiny line of gold peeping out from each side of the braid. The way it was done was by simply setting a narrow gold braid under the edge of the wide blue braid, like a piping.

Physicians tell us that all the blood in a healthy human body passes through the heart once in every two minutes. If this action becomes irregular the whole body suffers. Poor health follows poor blood; Scott's Emulsion makes the blood pure. One reason why

EMULSION

is such a great aid is because it passes so quickly into the blood. It is partly digested before it enters the stomach; a double advantage in this. Less work for the stomach; quicker, and more direct benefits. To get the greatest amount of good with the least possible effort is the desire of everyone in poor health. Scott's Emulsion does just that. A change for the better takes place even before you expect it.

We will send you a sample free. Emulsion you buy.
